

Aqualung i330R Dive Computer	
Aspect	Details
Images	 A black wristwatch-style dive computer with a digital display showing depth (19.8 M), time (29), and other metrics.
Alert Number	2205-0234
Product Type	Hobby / sports equipment - Dive Computers and Consoles
Product Identifiers	Serial Numbers Affected: GD-001004 to GD-015302 GM-001000 to GM-003305 GM-001011 to GM-001269
Product Description	Black wristwatch Aqualung i330R Dive Computers and Consoles produced and sold in 2021 and 2022 with operating firmware versions R1.001, R1.002 or R1.003
Country of Origin	Unknown
Counterfeit	No
Risk Type	Asphyxiation
Risk Description	The dive computer does not automatically adjust the pressure level when diving at 900m (3000 feet) altitude or higher, leading to miscalculation of the remaining dive time and ascent procedure. A diver who relies on the computer may exceed their no-decompression limit, leading to decompression sickness which can result in injury, serious illness or death.
Corrective Measures	The product has been recalled and consumers should immediately stop using their i330R Dive Computer for diving activities taking place at 900m (3000 feet) altitude or higher.
