

9000NFG

EXPORT OF RODENT EMBRYOS TO AUSTRIA

NOTES FOR GUIDANCE (NFG) FOR OFFICIAL VETERINARIANS AND EXPORTERS

This document should not be read as a standalone document but in conjunction with 9000EHC

1. SCOPE OF THE CERTIFICATE

This certificate may be used for the export of rodent embryos where the certification takes place in Wales, Scotland or England, i.e. Great Britain only.

In addition to 9000EHC a valid import permit must be obtained from the Austrian authorities in advance of the import.

2. CERTIFICATION

The basic principles of certification apply and although this is not an EU level harmonised EU entry certificate, the general requirements that the EU specifies for its harmonised certificates should be followed.

Please note that this certificate is taken from an English translation provided by Austria and the English text is therefore constrained by that model certificate.

Country of origin

Although the certificate has been prepopulated with UNITED KINGDOM, this certificate should and can only be issued for animals that are certified in England, Scotland and Wales (i.e. Great Britain).

This certificate may be used for embryos of more than one animal at a time. If necessary, create and include a schedule to add additional information should the space provided not be enough.

- I. The address of the community of origin and the consignor may be the same but 'community' is understood to be the place or establishment where the donor(s) of the embryos is/are resident whereas the consignor is the address of the person responsible for sending the consignment.
- II. Similar to I above

- III. Means of transport by which the consignment leaves GB, i.e. a ferry name and sailing time including the vehicle ID, or if flying, the flight number.
- IV. This certificate is limited to rodent species. Specify as appropriate.

V. **Health Certificate**

The phrase 'to my official knowledge is a translation of the German required text. It means that you, as an authorised veterinarian acting on behalf of the Competent Authority of the devolved Administration or Defra, should know and confirm that the establishment was or is not under official animal health restrictions at the time of either collection or despatch of the embryos. You do **not** need to obtain a statement in writing from the Centre for International Trade, APHA, Carlisle but it is suggested to obtain confirmation APHA.

Disclaimer: This certificate is provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, in Carlisle, via the link below.
