

## Questions for family and carers

**The government is making some new information and rules to help make life better for people with Down's syndrome in England**

**The new information and rules is called guidance.**

**Please tell us your ideas for the new guidance.**

**In this document we say Down's syndrome.  
But some people say Down syndrome.**

## About this document

We are the government.

We made a new law in April 2022 to help make life better for people with Down's syndrome.

The new law is called the **Down Syndrome Act 2022**.

The law says that the government must make some new **guidance**.

Guidance is information.

The information has rules in it that organisations must follow.

The guidance will help people with Down's syndrome to get better support.

We want people's ideas before we make the new guidance.

We want to know what people think should be in the new guidance.

We will look at what everyone says.

Then we will make the guidance.

We will share the guidance with people first to find out what they think about it.

There are some questions for you to answer in this document.

The questions are for family and carers of people with Down's syndrome.

You can also answer the questions if you have another condition.

Like a learning disability.

We want to know if the new guidance will work for people with those conditions as well.

Please give us your answers by  
11.45pm on **8 November 2022**.

You can find out how on page 36.

## Why we are making the new information with rules in it

The information with rules is called  
**guidance**.

People with Down's syndrome can have  
a good life with the right support.

But many people with Down's syndrome  
and their families find it hard to get  
the right support.

The new guidance will help people with Down's syndrome to get better support with:

- Healthcare and mental health care. Mental health is about how you think and feel.
- Social care. This is support from staff to live at home or do other important things. Like wash, cook or do things you enjoy.
- Education.
- Housing.

The guidance will tell organisations what they must do to give people with Down's syndrome good support.

That means organisations like:

- Schools and colleges
- Councils
- the NHS and other health organisations

They will have to follow the new guidance.
