Dear Sir/Madam

**OBJECTION to Berden Hall Solar Farm**  
**Section 62A Planning Application: S62A/22/0006 and UTT/22/2046/PINS (Uttlesford)**

I am writing to object to the application to construct a solar farm comprising ground mounted solar arrays together with inverter cabins, a substation, fencing and CCTV cameras on land adjacent to Ginns Road, Berden on the grounds that it will have a damaging effect on the wildlife in the area.

The National Planning Policy Framework includes an environmental objective which is expressed as an aim to protect and enhance the natural, built and historic environment.

The security fencing which will surround the large areas of land earmarked for this development will remove traditional pathways for transitory animals such as the deer and brown hares which wander across the fields.

Large solar energy installations destroy wildlife corridors and nesting and feeding habitats. I also understand that bird deaths are a common occurrence as large areas of glazing are mistaken for water.

The area is rich in protected birds such as Skylarks, Yellowhammers, Linnets, Yellow Wagtails and Song Thrushes. If the habitats of these birds are destroyed, they cannot be easily recovered and removing or attempting to relocate these established habitats has disastrous consequences for the species within them.

This application

Yours

  
ANDREW GRAVEBORN
