Dear Sir/Madam

**OBJECTION to Berden Hall Solar Farm Section 62A Planning Application: S62A/22/0006 and UTT/22/2046/PINS (Uttlesford)**

Dear Sir /Madam

I am writing to object to the application to construct a solar farm comprising ground mounted solar arrays together with inverter cabins, a substation, fencing and CCTV cameras on land near the Stocking Pelham Substation, Ginns Road, Berden because of the adverse impact that this development will have if the solar farm is built.

PLEASE CAN YOU AVOID CREATING A FURTHER ECOLOGICAL CRISIS FROM THOSE HOPING TO PROFIT FROM REAL CONCERNS ABOUT CLIMATE CHANGE. PLEASE LOOK AT HOW REAL SAFEGUARDS CAN BE BUILT INTO THE PLANNING PROCESS.

The development proposed by Stratera can only be described as industrial, In addition to over 100,000 solar PV panels the development will include 10 containerised inverters and a substation.

National planning policy includes an environmental objective – to protect and enhance our natural, built and historic environment; including making effective use of land, improving biodiversity, using natural resources prudently, minimising waste and pollution and mitigating and adapting to climate change including moving to a low carbon economy.

The development is also incompatible with Uttlesford's policy S7 which states that the countryside will be protected for its' own sake.

I do not understand how a massive solar farm, which is an industrial development, can possibly enhance the the natural environment. These sorts of development belong on brownfield site or in an industrial setting.

The site is very close to numerous listed buildings and scheduled monuments. I do not accept that it can possibly enhance the historic environment

Yours sincerely

Jane M Clay 28/08/22
