SECTION E: ELECTRICITY USE

(PAPER: SECTION E: ELECTRICITY USE)

ADD TIME STAMP

ASK ALL

TARIFFINTRO (*Display*)

The next few questions are about your household's electricity tariff. An electricity tariff is the pricing plan for the electricity that you use.

WEB: Please click the > button to continue

ASK ALL

TOUTAWARE1 (*Single*)

Some suppliers offer 'time of use' energy tariffs. These charge consumers cheaper 'off-peak' rates for their energy at times of night or day when demand is at its lowest, and higher 'peak' rates at popular times.

This means that energy demand can be better managed, and can help customers reduce their bills.

Before today, how much, if anything, did you know about a 'time of use' electricity tariff?

1. Never heard of this
2. Hardly anything but I've heard of this
3. A little
4. A fair amount
5. A lot

ASK ALL

TOUTAWARE2 (*Single*)

Some suppliers have introduced 'time of use' tariffs that offer rates of electricity that change throughout the day or night depending on overall demand and supply. Instead of just two rates (a daytime and night rate), prices typically change every half an hour.

These new tariffs can work with any appliance or form of heating. Using energy at off-peak times (for example at night or when there is a high renewable electricity available) can help people to reduce their electricity bills.

Before today, how much, if anything, did you know about 'time of use' tariffs which offer changing rates of electricity across the day and night?

1. Never heard of this
2. Hardly anything but I've heard of this
3. A little
4. A fair amount
5. A lot

ASK ALL

TARIFFTYPE (*Single*)

As far as you are aware, which type of electricity tariff is your household on?

1. A standard tariff where the cost of electricity remains the same regardless of time of day **GO TO TOUTLIKELY**
2. A tariff that changes depending on the time of day or night (sometimes referred to as a 'time of use' tariff) **GO TO WHICHTOU**
3. Not applicable - my home is not connected to the electricity grid **GO TO SMARTMET**
4. Don't know **GO TO TOUTLIKELY**

IF TARIFFTYPE=2

WHICHTOU (*Single*)

You said that your household is on a tariff that changes depending on the time of use.

As far as you are aware, which of the following types of electricity tariff is your household on?

1. **Dual rate 'time of use' tariff** - a plan that offers two fixed-price electricity rates (peak and off-peak) depending on time of day or night. **GO TO TOUTLIKELY**
2. **Agile 'time of use' tariff with variable pricing** - a plan that offers customers electricity prices that change throughout the day based on the wholesale price of energy **GO TO SMARTMET**
3. Other type of 'time of use' tariff **GO TO TOUTLIKELY**
4. Don't know **GO TO TOUTLIKELY**

ASK IF TARIFFTYPE=1/4 OR WHICHTOU=1/3/4 (I.E. NOT ALREADY ON AGILE TOU TARIFF)

TOUTLIKELY (*Single*)

Thinking again about a 'time of use' tariff where pricing varies throughout the day and night (for example every half an hour) to help people save money by using electricity at cheaper times.

If this was available to you, how likely would your household be to switch to it?

1. Very likely **GO TO SMARTMET**
2. Fairly likely **GO TO SMARTMET**
3. Not very likely **GO TO WHYNOTOUT**
4. Not at all likely **GO TO WHYNOTOUT**

Don't know/Not my decision to make **GO TO SMARTMET**

ASK IF UNLIKELY TO SWITCH TO TIME OF USE TARIFF (TOUTLIKELY=3/4)

WHYNOTOUT (*Multi*)

You said you would be unlikely to switch to a flexible 'time of use' tariff. Why is this?
Please select all that apply.

1. Happy with current tariff/provider
 2. Too much time and effort to switch
 3. Wouldn't save enough money
 4. Difficult to budget/I like to know my bills in advance
 5. I don't know enough about this
 6. I don't have a smart meter/I don't want a smart meter
 7. I don't trust energy companies
 8. I don't want to have to think about when to use electricity
 9. It sounds complicated
 10. Other reason (please specify)
 11. Not applicable - not my decision to make (EXCLUSIVE)
- Don't know

ASK ALL

SMARTMET (*Single*)

HH Weighted Question

The next question is about smart meters.

Smart meters automatically send meter readings to your energy supplier and usually come with a home energy monitor that provides information about your energy usage. Smart meters also allow prepayment customers to top up their credit online and over the phone.

Does your household have a smart meter?

1. Yes
 2. No

1. A plug-in hybrid (that plugs in to an external power source to recharge)
2. A non-plug-in hybrid (that recharges while driving and cannot be plugged in to an external power source)
3. Don't know which type

ASK ALL

EVSMARTINTRO (Display)

Smart electric vehicle charging is a way of charging an electric vehicle (EV) at times when demand for electricity is lower, for example at night.

Charging during these off-peak times can help reduce costs for EV drivers by using cheaper energy rates. It can also help reduce periods of high demand for electricity from the national grid (the system which distributes electricity throughout the country).

(PAPER: SECTION G: USE OF APPLIANCES AT HOME)

ADD TIME STAMP

ASK ALL

SMARTAPPINTRO1 (*Display*)

And now some questions about appliances in the home. New types of so-called 'energy-smart' appliances are becoming available.

An energy smart appliance (for example washing machine, dishwasher) is a particular type of smart appliance which works with your smart meter and allows your energy supplier to run it at the cheapest times. If it suits you, you could still decide to run your appliance at another time.

This will help people reduce their energy bills by changing the way in which they manage their household energy use.
