The BEIS Public Attitudes Tracker

Have your say, inform key decisions

The BEIS Public Attitudes Tracker is an official Government study that allows your views to be heard on a wide range of issues affecting how people live and work in the UK.

Please answer as honestly as you can. If you would prefer not to answer a question, you have the option to leave it blank.

Who should complete the questionnaire?

Up to four people in your household can complete the questionnaire as long as they are all aged 16 or over. If you need more paper questionnaires, please use the contact details in your invitation letter.

Please read the rest of the information on this page, then turn over to start the survey.

How do I fill in the questionnaire?

1. Most questions can be answered by putting a cross in the box next to the answer that applies to you, like this:
2. Some questions will ask you to: ➔ **Please cross one box only** and some will ask you to:
➔ **Please cross all boxes that apply.**
3. Some questions may not apply to you and you will be taken to the next one that does by following an arrow like this: ➔ **Go to Q49** or a box like this: **Go to Q26**
4. Please try to answer every question that applies to you. If you cannot remember or do not know, please cross the relevant box where shown or leave the question blank.
5. If you change your mind about an answer you have given, completely block out the box you have crossed like this, and then put a cross in your preferred box.
6. Please use black or blue ink to complete the questionnaire.

- Very concerned
- Fairly concerned

Q9 The UK government is aiming to reduce UK greenhouse gas emissions to 'net zero' by 2050. This will involve significantly reducing emissions produced by our industries, transport, food, and homes. Any remaining emissions will be balanced by actions that reduce greenhouse gases already in the atmosphere, such as planting trees.

Before today, how much, if anything, did you know about the concept of 'net zero'?

- Never heard of this
- Hardly anything but I've heard of this
- A little
- A fair amount

- Never heard of this
- Hardly anything but I've heard of this
- A little
- A fair amount

Q12 The next question is about low-carbon heating systems. By this we mean environmentally friendly heating systems which no longer rely on conventional gas central heating but instead use energy from low-carbon alternatives such as hydrogen, the sun, or heat pumps which draw heat from the ground, air or water to heat your home.

Before today, how much if anything did you know about low-carbon heating systems?

- Never heard of this
- Hardly anything but I've heard of this

Section E: Electricity Use

The next few questions are about your household's electricity tariff. An electricity tariff is the pricing plan for the electricity that you use.

Q22 Some suppliers offer 'time of use' energy tariffs. These charge consumers cheaper 'off-peak' rates for their energy at times of night or day when demand is at its lowest, and higher 'peak' rates at popular times.

This means that energy demand can be better managed, and can help customers reduce their bills.

Before today, how much, if anything, did you know about a 'time of use' electricity tariff?

- Never heard of this
- Hardly anything but I've heard of this
- A little
- A fair amount
- A lot

Q23 Some suppliers have introduced 'time of use' tariffs that offer rates of electricity that change throughout the day or night depending on overall demand and supply. Instead of just two rates (a daytime and night rate), prices typically change every half an hour.

These new tariffs can work with any appliance or form of heating. Using energy at off-peak times (for example at night or when there is a high renewable electricity available) can help people to reduce their electricity bills.

Before today, how much, if anything, did you know about 'time of use' tariffs which offer changing rates of electricity across the day and night?

- Never heard of this
- Hardly anything but I've heard of this
- A little
- A fair amount
- A lot

Q24 As far as you are aware, which type of electricity tariff is your household on?

➡ Please cross one box only ☒

A standard tariff where the cost of electricity remains the same regardless of time of day

Go to Q26

A tariff that changes depending on the time or day or night (sometimes referred to as a 'time of use' tariff)

Go to Q25

Not applicable – my home is not connected to the electricity grid

Go to Q28

Don't know

Go to Q26

Q25 You said that your household is on a tariff that changes depending on the time of use.

As far as you are aware, which of the following types of electricity tariff is your household on?

➡ Please cross one box only ☒

Dual rate 'time of use' tariff – a plan that offers two fixed-price electricity rates (peak and off-peak) depending on time of day or night

Go to Q26

Agile 'time of use' tariff with variable pricing – a plan that offers customers electricity prices that change throughout the day based on the wholesale price of energy

Go to Q28

Other type of 'time of use' tariff

Go to Q26

Don't know

Q26 Thinking again about a 'time of use' tariff where pricing varies throughout the day and night (for example every half an hour) to help people save money by using electricity at cheaper times.

If this was available to you, how likely would your household be to switch to it?

Very likely

Go to Q28

Fairly likely

Not very likely

Go to Q27

Not at all likely

Don't know / Not my decision to make

Go to Q28

Q27 You said you would be unlikely to switch to a flexible 'time of use' tariff. Why is this?

➡ Please cross all boxes that apply ☒

- Happy with current tariff/provider
- Too much time and effort to switch
- Wouldn't save enough money
- Difficult to budget/I like to know my bills in advance
- I don't know enough about this
- I don't have a smart meter/I don't want a smart meter
- I don't trust energy companies
- I don't want to have to think about when to use electricity
- It sounds complicated
- Other reason (please specify)

- Not applicable - not my decision to make
- Don't know

Q28 The next question is about smart meters.

Smart meters automatically send meter readings to your energy supplier and usually come with a home energy monitor that provides information about your energy usage. Smart meters also allow prepayment customers to top up their credit online and over the phone.

Does your household have a smart meter?

- Yes
- No
- Don't know

Section F: Vehicle Use

And now some questions about vehicle ownership.

Q29 Do you personally own or have regular use of a car or van? Please include any company cars that are also driven for private use.

Q30

Yes, more than one

Electric/battery only car or van

Hybrid (petrol/electric)

Go to
Q31

Go to
Q32

Q31 What type of hybrid car or van is this?

➡ Please cross one box only ☒

A plug-in hybrid (that plugs in to an external power source to recharge)

A non-plug-in hybrid (that recharges while driving and cannot be plugged in to an external power source)

Don't know which type

Q32 Smart electric vehicle charging is a way of charging an electric vehicle (EV) at times when demand for electricity is lower, for example at night.

Charging during these off-peak times can help reduce costs for EV drivers by using cheaper energy rates. It can also help reduce periods of high demand for electricity from the national grid (the system which distributes electricity throughout the country).

Before today, how much, if anything, did you know about the concept of smart electric vehicle charging?

- Never heard of this
- Hardly anything but I've heard of this
- A little
- A fair amount
- A lot

Section G: Use of Appliances at Home

And now some questions about appliances in the home. New types of so-called 'energy-smart' appliances are becoming available.

An energy smart appliance (for example washing machine, dishwasher) is a particular type of smart appliance which works with your smart meter and allows your energy supplier to run it at the cheapest times. If it suits you, you could still decide to run your appliance at another time.

This will help people reduce their energy bills by changing the way in which they manage their household energy use.

Q33 Before today, how much, if anything, did you know about these types of energy smart appliances?

- Never heard of this
- Hardly anything but I've heard of this
- A little
- A fair amount
- A lot

Q34 Thinking about when you next need to buy or replace an appliance (for example washing machine, dishwasher), how likely would you be to purchase an energy smart appliance like this to help reduce the cost of your household's energy bills?

- Very likely
- Fairly likely
- Not very likely
- Not at all likely
- Not applicable – not my decision to make
- Don't know
