

UK ETS Authority communication

Activity Level Changes – COVID-19

The UK ETS Authority has published an update to the [Participating in the UK ETS](#) page.

The page has been updated with further guidance on the Activity Level Changes Regulation due to the 2020 COVID year.

Following the ‘Developing the UK ETS’ consultation and as stated in the initial government response, the UK ETS Authority plans to legislate before 2023 to amend the Activity Level Changes (ALC) Regulation. The amendment will allow operators to apply for data from the 2020 scheme year to be omitted from the 2022 ALC process.
