| Country of Origin | Unknown |
| Counterfeit | Unknown |
| Risk Type | Choking |
| Risk Level | High |
| Risk Description | The product presents a high risk of choking as the metal hook and the magnet from the fishing rod detached at forces less than 90N, presenting small parts which fit into a small parts cylinder. A young child may put a small part in its mouth and the parents may not notice in time, so the small part can block the child's airways. The magnetic flux density of the fishing rod attachment is 88.8 kG2mm2, which is greater than the 50 kG2mm2 limit. Small, high-powered magnetic products can be easily swallowed and, when ingested, have the potential to cause serious internal injuries within the gastrointestinal tract. The product does not meet the requirements of the Toys (Safety) Regulations 2011. |
