Risk Description	The product presents a risk of choking as small parts are received from magnet bars, ball bearings, plastic triangle and diamond shapes which fit into the small parts cylinder. A young child may put a small part in its mouth and the parents may not notice in time, so the small part can block the child's airways. The magnet bars, when tested, were found to have a higher magnetic flux index than the limit of 50kG2mm2. Small, high-powered magnetic products can be easily swallowed and, when ingested, have the potential to cause serious internal injuries within the gastrointestinal tract.
