VETERINARY CERTIFICATE FOR EXPORT OF HATCHING EGGS OF POULTRY OTHER THAN RATITES
FROM THE UNITED KINGDOM TO GEORGIA

Part I: Details of dispatched consignment	I.1. Consignor Name Address Country		I.2. Certificate reference number			
			I.3. Central competent authority Defra			
			I.4. Local competent authority APHA			
	I.5. Consignee Name Address Country		I.6. No.(s) of related original certificates No.(s) of accompanying documents			
	I.7. Country of origin UNITED KINGDOM		ISO code GB	I.8. Region of origin		
			I.9. Country of destination GEORGIA		ISO code GE	
			I.10. Region of destination			
	I.11. Place of origin Name Address		Registration number		I.12. Place of destination	
	I.13. Place of loading Name Region Postal code		I.14. Date of departure			
	I.15. Means of transport Aeroplane <input type="checkbox"/> Ship <input type="checkbox"/> Railway wagon <input type="checkbox"/> Road vehicle <input type="checkbox"/> Other <input type="checkbox"/> Identification Number(s)					
		I.19. Number/Quantity		I.20. Total number of packages		
I.21. Seal/Container number						
I.22. Commodities certified for: Breeding <input type="checkbox"/>						
I.23. Transit countries			I.24. For export <input type="checkbox"/>			
I.25. Identification of the commodities						
Species (scientific name)		Breed/Category	Identification system	Identification number	Quantity	

II. Health information**II.a. Certificate reference number****I, the undersigned Official veterinarian certify that:**

1. The hatching eggs, described above, which are exported to Georgia are originating from flocks which at least for 3 months prior to dispatch have remained on the territory of the United Kingdom, or EU Member State(s);
2. They are obtained from flocks kept in (a) zone(s) of the United Kingdom which at the date of issue of this certificate was (were) free from:
 - a) Newcastle disease in accordance with Article 39 of Delegated Regulation (EU) 2020/692;
 - b) Highly pathogenic avian influenza in accordance with Article 38 of Delegated Regulation (EU) 2020/692, and have been kept in an establishment:
 - (i) in which low pathogenic avian influenza has not been present within the last 30 days prior to export to Georgia;
 - (ii) located in an area which is not placed under official veterinary restrictions by the competent authority in relation to an outbreak of low pathogenic avian influenza and in any case around which within a 1km radius low pathogenic avian influenza has not been present within the last 30 days prior to export to Georgia on any establishment;
 - (iii) where there has been no epidemiological link to an establishment where low pathogenic avian influenza has been present within the last 30 days prior to export to Georgia;
3. They come from flocks, which:

either⁽¹⁾ a) (i) have not been vaccinated against avian influenza;

or⁽¹⁾ (ii) have been vaccinated against avian influenza using (indicate name and type of used vaccine) at the age of _____ weeks

b) did not show symptoms of transmissible disease at the time of collection of the hatching eggs;

c) have been kept for at least 6 weeks prior to export to Georgia in the establishment:

 - (i) which is registered by and is under the control of the competent authority of the country of the origin
 - (ii) which, is (are) not subject to any animal health restriction imposed by the competent authority of the country of origin;
 - (iii) within a 10 km radius of which (including, where appropriate, the territory of a neighboring country) there has been no outbreak of highly pathogenic avian influenza or Newcastle disease for at least the previous 30 days;

d) have had no contact with poultry not meeting the requirements laid down in this certificate or with wild birds for at least 6 weeks prior to dispatch into Georgia;

either⁽²⁾ [e) have undergone disease surveillance programmes according to the retained EU Regulation No 2160/2003 on the control of salmonella; and have been tested in accordance with retained EU Regulation 2160/2003, retained EU Regulations No 200/2010 and retained EU Regulation No 1190/2012, with negative results for Salmonella serotypes with public health significance;

or⁽²⁾ [e) have undergo regular testing for Salmonella serotypes with public health significance (equivalent to the testing applicable for chicken and turkey breeding flocks under the national control programme), with negative results;

f) date of last sampling of the flock: _____;

g) have not been fed with raw materials derived through genetical engineering or other genetically modified sources;

either⁽¹⁾ [h) have not been vaccinated against Newcastle disease;

or⁽¹⁾ [h) have been vaccinated against Newcastle disease using an inactivated vaccine officially approved/ registered by competent authority of country of origin;

or⁽¹⁾ [h) have been vaccinated against Newcastle disease using a live vaccine officially approved/ registered by competent authority of country of origin;

Part II: Certification

II. Health information		II.a. Certificate reference number			
Identification of the flock	Age of the birds	Date of vaccination [dd/mm/yyyy]	Name and type (live or inactivated) of ND virus strain used in vaccine(s)	Batch number	Name and manufacturer of vaccine

i) have been vaccinated using officially approved/ registered vaccines by competent authority of country of origin:

Identification of the flock	Age of the birds	Date of vaccination [dd/mm/yyyy]	Vaccinated against	Batch number	Name, manufacturer and type of officially approved vaccines

- They have been marked using colour ink, with a stamp indicating the unique registration number of the establishment of origin or other unique identification number which is traceable back to the establishment of origin;
- They have been disinfected in accordance with the legislation of the country of origin, using (name of the product and active substance) for (time in minutes);
- They have been collected from (dd/mm/yyyy) to (dd/mm/yyyy).
- They have been examined by an official veterinarian of the country of origin and showed no signs of or grounds for suspecting any disease;
- They are transported in clean boxes which:
 - either*⁽¹⁾ [(a) are disposable, clean and used for the first time;
 - or*⁽¹⁾ [(a) are cleaned and disinfected before loading of the hatching eggs in accordance with the instructions of the competent authority of the country of origin;
 - b) contain only hatching eggs of the same species, category and type coming from the same establishment;
 - c) are closed in a manner which ensures no substitution of the content;
 - d) bear the following indications:
 - the word 'hatching'
 - the name of country/region/ administrative territory/compartiment of origin,
 - the species of poultry concerned,
 - the number of hatching eggs,
