I live in the village of Henham for the secretary of state to consider another 200 houses to be built in this village environment is ridiculous we do not have the infrastructure most of our roads are single lane and traffic is now a nightmare trying to get through lower Street in Stanstead and up Chapel Hill because of the amount of vehicles the developer states that there are excellent transport facilities this is a farce as there are very few buses and 95% of all people who live in Elesenham and Henham have to use a vehicle to either do shopping or getting to the train station we are swamped with new properties already being built around us and village life is being eroded so quickly we do not have the schools or the road infrastructure for more properties being built please refuse this application Do not let grade 1 and grade two agricultural land be lost even more in the surrounding area we have very productive agricultural land in this area and you have to look at the environmental impact that allowing more houses to be built will have in the long-term future for our children
