EXPORT OF MEAT PRODUCTS (NON BOVINE) TO BAHRAIN

No:

HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM (GREAT BRITAIN)

FOR COMPLETION BY: OFFICIAL VETERINARIAN

I. Identification of the products

- a) Description of the products:
- b) Species from which the product was obtained:
- b) Type and number of packages:
- c) Net weight of consignment:
- d) Shipping marks:

II. Origin of the products

-) Name and address of exporter:

III. Destination of the consignment

- a) The consignment was despatched from:
to: BAHRAIN:
(country and place of destination)

- b) Name and address of consignee:

c) Means of transportation:

IV. Health information

I, the undersigned certify that:

1. the meat products described above were derived from animals which were slaughtered in slaughterhouses
2. the meat products described above were derived from animals which have been subjected to ante- and post-mortem inspection, found to be free from any clinical evidence of infectious disease and fit for human consumption;
3. the meat products described above have been produced in an establishment approved under the European Union (EU) legislation (UK law as "retained EU law" under the European Union (Withdrawal) Act 2018) laying down hygiene rules for food of animal origin and its official controls.
- *4. the United Kingdom legislation requires that any sheep or goats suspected of being clinically affected with scrapie are compulsorily slaughtered and the carcasses destroyed by incineration;
5. the United Kingdom has a comprehensive programme in place to monitor radioactivity in food and the environment. The Food Standards Agency (FSA), in association with Food Standards Scotland (FSS) and the UK government, publish an annual report - Radioactivity in Food and the Environment - which summarises the results of such monitoring <https://www.gov.uk/government/publications/radioactivity-in-food-and-the-environment-rife-reports>. The results demonstrate that even the most exposed members of the UK public received radiation doses from consumption of local food and exposure to environmental radioactivity (due to discharges and direct radiation) that were below the dose limit to members of the public of 1 millisievert per year from artificially-produced radionuclides as set in the International Atomic Energy Agency (IAEA) Basic Safety Standard Radiation Protection and Safety of Radiation Sources: International Basic Safety Standards General Safety Requirements part 3 (No. GSR part 3) <https://www.iaea.org/publications/8930/radiation-protection-and-safety-of-radiation-sources-international-basic-safety-standards>
6. the United Kingdom is recognised by the World Organisation for Animal Health (WOAH) as a country free from foot and mouth disease (FMD) (without vaccination).

THIS IS TO CERTIFY

1. that a declaration has been received from the exporter of the consignment described on the attached certificate **NO:** stating:
 - a) that the products may lawfully be sold in the United Kingdom;
 - *b) that the products are fit for human consumption.

2. the United Kingdom has a comprehensive programme in place to monitor radioactivity in food and the environment. The FSA, in association with FSS and the UK environment agencies, publish an annual report - Radioactivity in Food and the Environment - which summarises the results of such monitoring and is available at <https://www.gov.uk/government/publications/radioactivity-in-food-and-the-environment-rife-reports>. The results demonstrate that even the most exposed members of the UK public received radiation doses from consumption of local food and exposure to environmental radioactivity (due to discharges and direct radiation) that were below the dose limit to members of the public of 1 millisievert per year from artificially-produced radionuclides as set in the IAEA Basic Safety Standard Radiation Protection and Safety of Radiation Sources: International Basic Safety Standards No. GSR part 3 <https://www.iaea.org/publications/8930/radiation-protection-and-safety-of-radiation-sources-international-basic-safety-standards>
