## Bibliography (2007 to 2021)

September 2022

### **Condition of Publication**

This document is made available by Radioactive Waste Management Limited trading as Nuclear Waste Services (NWS). Information on its activities is being made readily available to enable interested parties to have access to and influence on its future programmes.

NWS is a wholly owned subsidiary of the Nuclear Decommissioning Authority (NDA). All copyright, database rights and other intellectual property rights reside with the NDA.

This document may be freely used for non-commercial purposes provided that the source of this document is acknowledged when it is shared with third parties.

Any commercial use of this document including (but not limited to) sharing, distribution, copying and/or re-publication of this document (and/or any extracts thereof) is prohibited. Accordingly, all commercial use of this document requires express written permission from the NDA.

Applications for permission to use the report commercially should be made to the NDA Information Manager.

Although great care has been taken to ensure the accuracy and completeness of the information contained in this publication, neither the NDA nor NWS accepts any liability or responsibility for consequences that may arise from its use or reliance by other parties.

## Documents Published by RWM 2000 to 2006

List and links to a range of scientific and technical information relating to geological disposal in published reports, conference and journal papers that are available in the National Web Archive. The publications that are linked to in this document have been archived and, in some cases, might have been superseded. Current publications are available via GOV.UK. Please contact Nuclear Waste Services (contact details are available on GOV.UK) if you would like to check the status of any publication in the archive.
