

Air Quality and Dust Monitoring Monthly Report – October 2022

Warwick District Council

Department for Transport

High Speed Two (HS2) Limited has been tasked by the Department for Transport (DfT) with managing the delivery of a new national high speed rail network. It is a non-departmental public body wholly owned by the DfT.

High Speed Two (HS2) Limited,
Two Snowhill
Snow Hill Queensway
Birmingham B4 6GA

Monthly Summary

- 1.1.1 This Summary Report is published in fulfilment of commitments detailed in the High Speed Rail (London-West Midlands) Environmental Minimum Requirements, Annex 1: Code of Construction Practice, for the nominated undertaker to present the results of air quality and dust monitoring undertaken in Warwick District (WDC) during October 2022.
- 1.1.2 Figures 1 – 3 in Appendix A indicate the current worksites together with the dust monitoring locations for October 2022.
- 1.1.3 This summary should be read in conjunction with the overview monitoring report monthly available from www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2, which highlights: the applicable standards and guidance, as well as the air quality and dust monitoring methodologies to be implemented by nominated undertakers throughout construction.
- 1.1.4 The current worksites as presented in Appendix A, Figures 1 – 3, include:

The Stoneleigh Park worksite and Fosse Way Compound (Sublot 2A2)

- Topsoil stripping;
- Haul roads construction; and
- Earthworks cutting (transporting material to River Leam embankment via haul road).

Burton Green Tunnel (Sublot 2B2)

- Construction of the haul road and compound at the South Portal;
- Earthworks in the vicinity of Hodgetts Lane; and
- Removal of tree roots and vegetation from North Cromwell Lane to Waste Lane.

Welsh Road Underbridge Satellite Compound (Sublot 2AS)

- Compound extension;
- Crossing construction and road widening;
- Subsoil stockpile; and
- Earthworks cutting.

A429 Kenilworth Road Overbridge (Sublot 2B1)

- Soil stripping;
- Stockpiling; and
- Temporary drainage construction.

1.1.5 Seven (7) dust monitors have been installed at worksites, where works are underway. These sites returned a low to medium dust risk rating.

1.1.6 Dust monitoring location and results are presented in Appendix B, Table 1, together with line charts of monthly data from the dust monitors presented in Figure 4. All continuous dust monitoring is undertaken using indicative monitors. Despite being Environment Agency (MCERTS) certified, indicative monitors carry a higher level of uncertainty than reference monitors, and therefore cannot be strictly compared with Air Quality Standards for human health and the environment. The purpose of the monitoring undertaken is to ensure the effectiveness of the on-site mitigations.

1.1.7 The trigger level for PM₁₀ concentrations of 190 µg/m³, over a 1-hour period, in accordance with the updated guidance document '*Guidance on Monitoring in the Vicinity of Demolition and Construction Sites – (October 2018)*' has been applied.

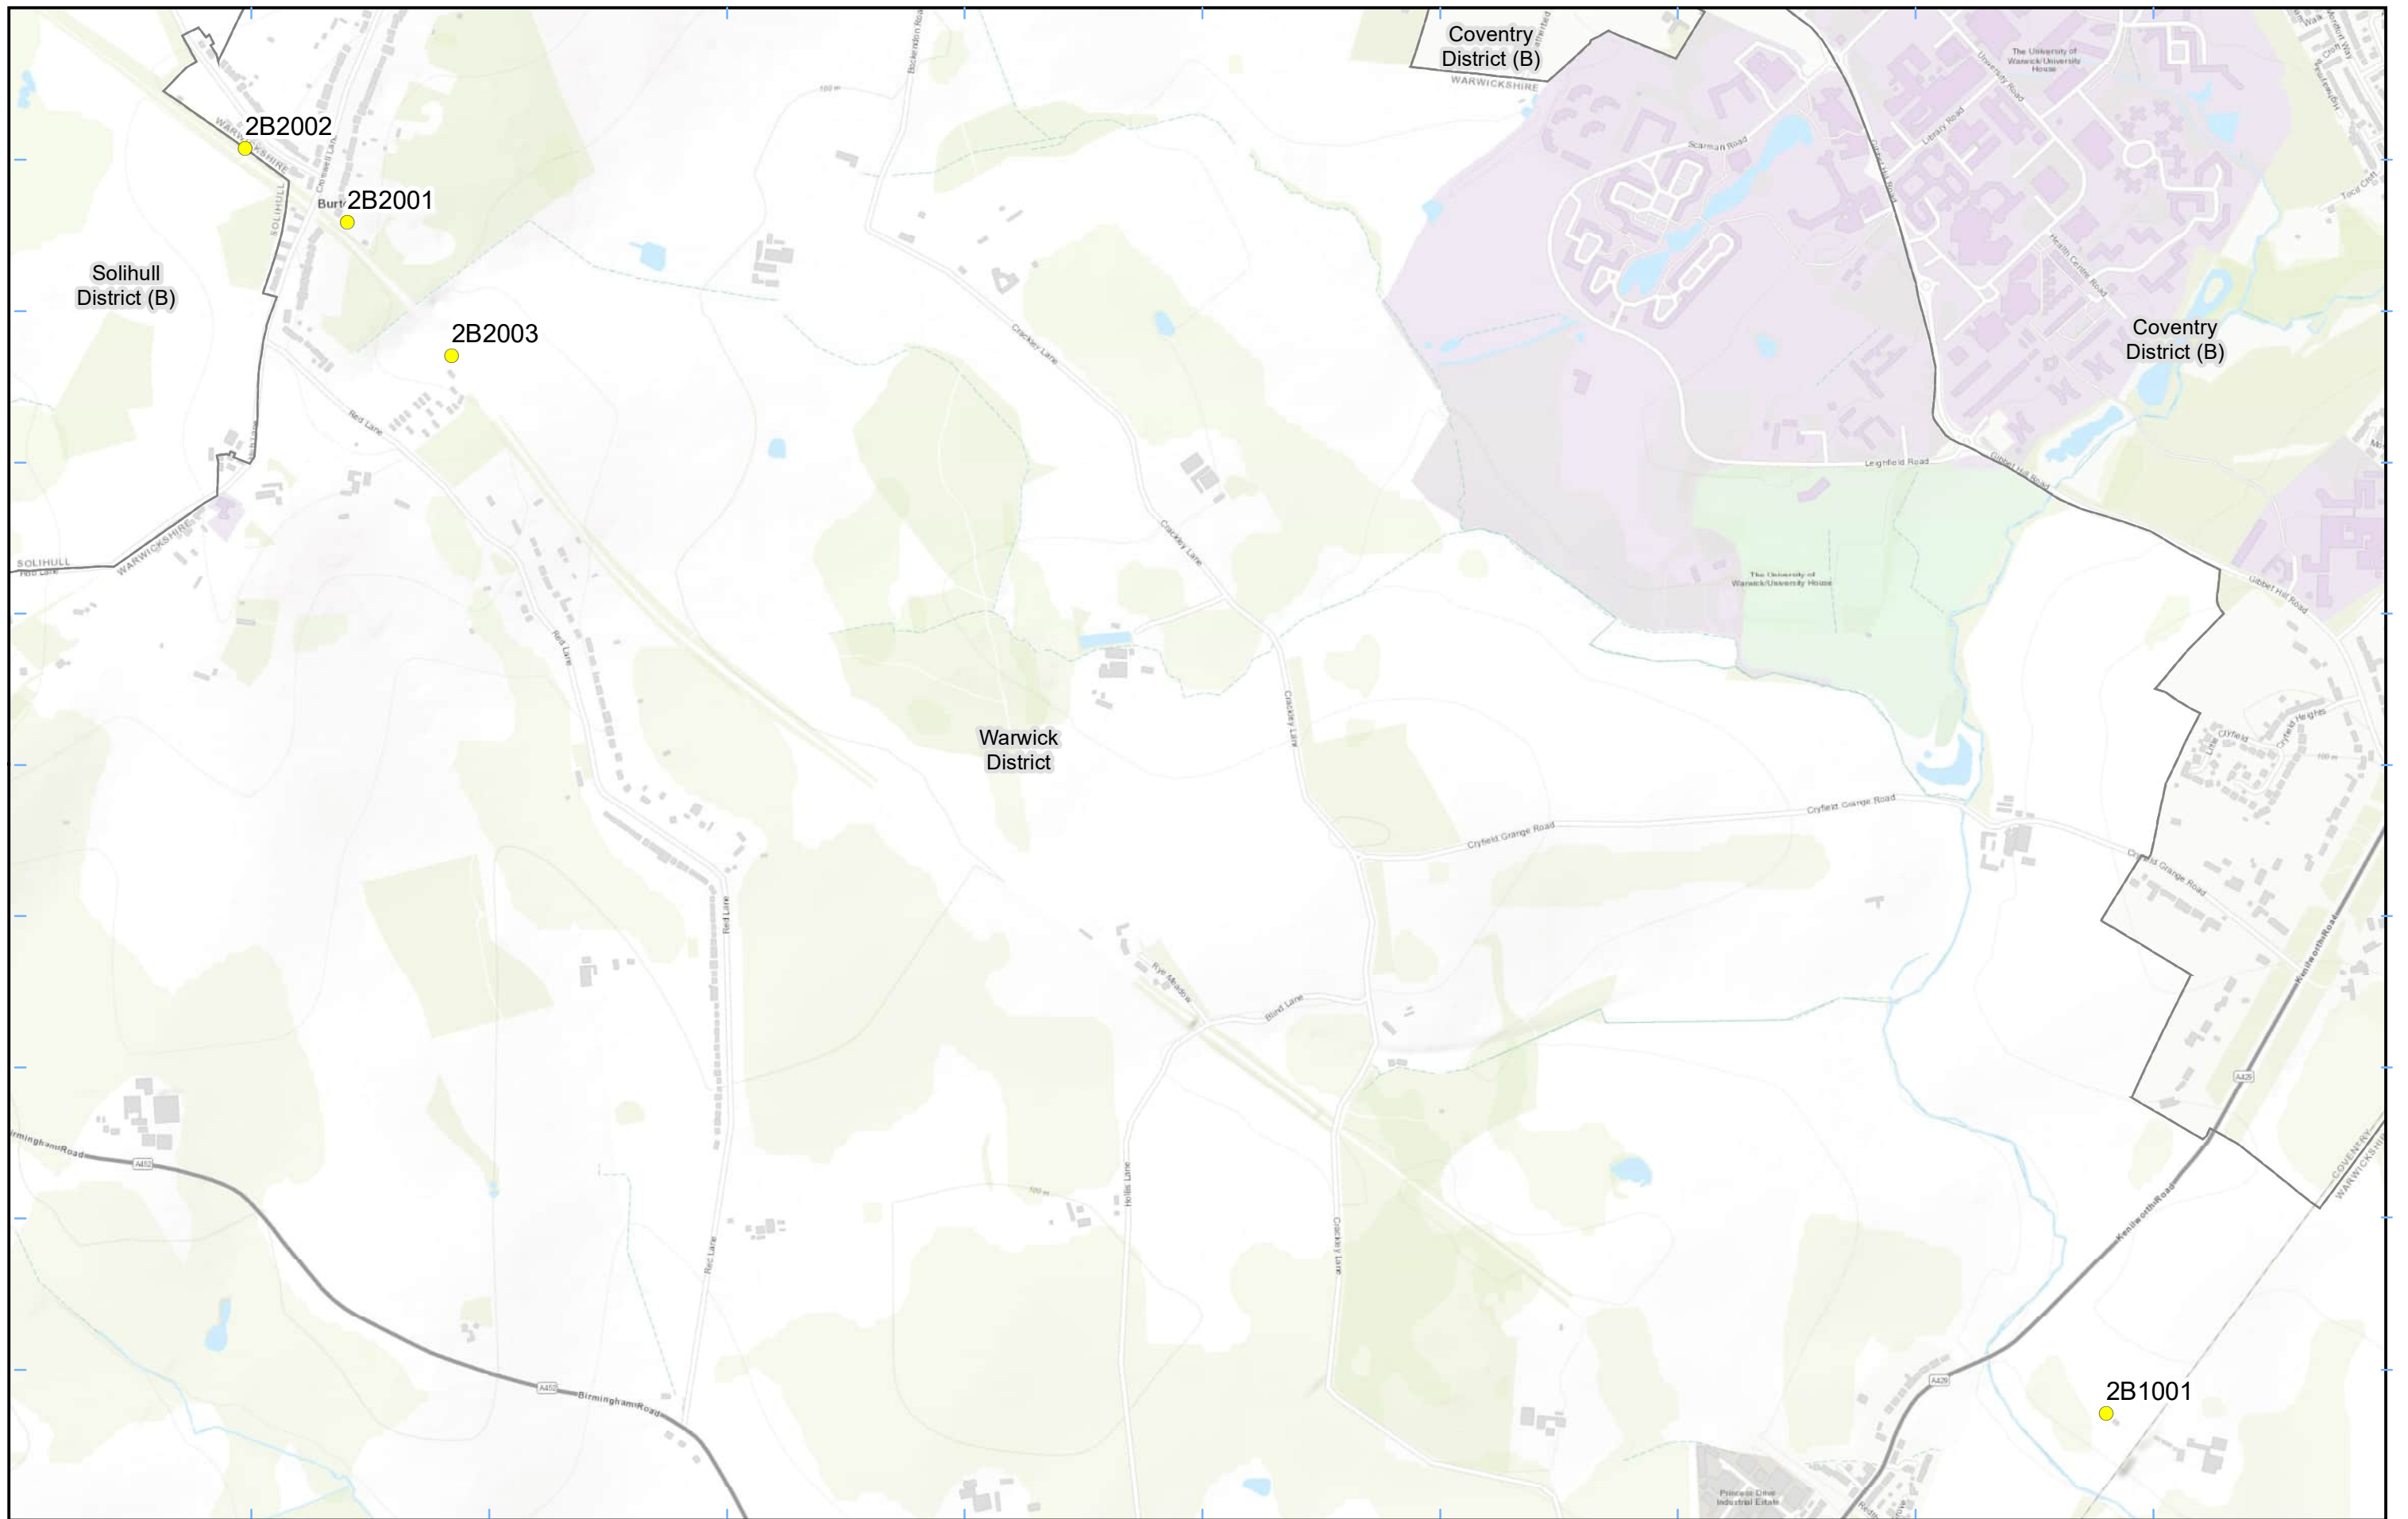

1.1.8 No (0) dust trigger alerts were recorded during the monitoring period.

1.1.9 Data capture was below 90% for 2B2002 due to problems with the monitor resulting in the collection of invalid data from 18th October onwards (monitor currently awaiting calibration), and for monitor OC001, which was only set up on the 18th October.

1.1.10 There were no (0) complaints received during this reporting period (October 2022).
