Location: Berden Hall Farm, Ginns Road, Berden

Proposal: Development of a ground mounted solar farm with a generation capacity of up to 49.99MW, together with associated infrastructure and landscaping at Berden Hall Farm, Ginns Road, Berden

Application Number: S62A/22/0006

Dear Sir/Madam

Thank you for consulting Hertfordshire County Council as the Minerals and Waste Planning Authority. We wish to be kept informed on future developments regarding this application.

We have no specific comments to make but should the appointed person be minded to permit this application, a number of detailed matters should be given careful consideration.

Waste

Government policy seeks to ensure that all planning authorities take responsibility for waste management. This is reflected in the County Council's adopted waste planning documents. In particular, the waste planning documents seek to promote the sustainable management of waste in the county and encourage Districts and Boroughs to have regard to the potential for minimising waste generated by development.

The National Planning Policy for Waste (October 2014) sets out the following:

'When determining planning applications for non-waste development, local planning authorities should, to the extent appropriate to their responsibilities, ensure that:

- *the likely impact of proposed, non-waste related development on existing waste management facilities, and on sites and areas allocated for waste management, is acceptable and does not prejudice the implementation of the waste hierarchy and/or the efficient operation of such facilities;*

- *new, non-waste development makes sufficient provision for waste management and promotes good design to secure the integration of waste management facilities with the rest of the development and, in less developed areas, with the local landscape. This includes providing adequate storage facilities at residential premises, for example by ensuring that there is sufficient and discrete provision for bins, to facilitate a high quality, comprehensive and frequent household collection service;*
- *the handling of waste arising from the construction and operation of development maximises reuse/recovery opportunities, and minimises off-site disposal.'*

This includes encouraging re-use of unavoidable waste where possible and the use of recycled materials where appropriate to the construction. In particular, you are referred to the following policies of the adopted Hertfordshire County Council Waste Core Strategy and Development Management Policies Development Plan Document 2012 which forms part of the Development Plan. The policies that relate to this proposal are set out below:

- Policy 1: Strategy for the Provision for Waste Management Facilities. This is in regards to the penultimate paragraph of the policy;
- Policy 2: Waste Prevention and Reduction; &
- Policy 12: Sustainable Design, Construction and Demolition.

In determining the planning application it is urged that due regard be given to these policies and ensure their objectives are met. Many of the policy requirements can be met through the imposition of planning conditions.

As a general point, new housing and other built development should have regard to the overall infrastructure required to support it, including a sufficient number of waste management facilities that should be integrated accordingly and address the principles of sustainability and the proximity principle. This includes providing adequate storage facilities for waste arisings through the arrangement of separate storage of recyclable wastes.

Yours sincerely

Daniel Clark
Minerals and Waste Planning Officer
