

Note to employer

You do not have to use this form but you may find it a useful way to calculate the cash equivalent if you provided interest-free or low interest loans for a director, or an employee during the year 2016 to 2017 (that is 6 April 2016 to 5 April 2017).

Read the 'P11D Guide' before you complete this form. Enter details of non-qualifying loans made to, or arranged for, a director or employee (or for any of his or her relatives) on which no interest was paid, or on which the amount of interest paid was less than interest at the official rate. Include 'notional loan' benefits of shares acquired by the director or employee at undervalue.

As a guide to whether a loan needs to be reported on the form 'P11D', see booklet '480'.

If you use this form you must also fill in forms 'P11D' and 'P11D(b) Return of Class 1A National Insurance contributions due'. Booklet 'CWG5(2017) Class 1A National Insurance contributions on benefits in kind' gives more information. You are advised to keep a copy of each completed working sheet as it could help you to deal with enquiries. You do not have to give a copy of the completed working sheet to the director or employee, or to your HM Revenue and Customs office.

The term employee is used to cover both directors and employees throughout the rest of this form.

The loans

If the total amount outstanding on all the loans is not more than £10,000 at any time in the year, there is no need to complete this working sheet or Section H of form 'P11D'.

You may find it helpful to complete the table below to identify:

- other small exempt loans
- for directors of close companies only, non-qualifying loans which may be treated as a single loan for the purpose of calculating the benefit

	Loan 1	Loan 2	Loan 3	Loan 4	Loan 5
Maximum amount outstanding at any time in the year	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Currency if other than sterling	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

If you know that the total amount outstanding on all non-qualifying loans does not exceed £10,000 at any time in the year, ignore such loans when completing the remainder of this working sheet and Section H of form 'P11D'.

If you are a close company and the borrower is one of the company's directors, you can elect to treat all loans which are:

- in the same currency
- non-qualifying
- owing at the same time

as a single loan.

You can make the election by showing all such loans as a single loan in Section H on the form 'P11D'. Please note that if you make the election and do not include all such loans within the single loan, you will be making an incorrect return.

Please turn over

Official rates of interest

To calculate the cash equivalent of a loan you will need to know:

- the average official rate of interest for the year ended 5 April 2017 for loans made in sterling (or if the loan was outstanding for less than the full year, the average official rate of interest for the part of the year during which the loan existed)
- the official rate for Japanese Yen or Swiss Francs where the loan was made in one of those currencies and the conditions in paragraph 17.5 of booklet '480' are met

Note: Where the official rate of interest remains unchanged throughout a whole tax year, the average official rate of interest will be the same as the official rate even if the loan is only in place for part of the tax year.

For details of the official rates of interest for 2016 to 2017, go to

www.gov.uk/government/publications/rates-and-allowances-beneficial-loan-arrangements-hmrc-official-rates

Calculating the cash equivalent

Use the formula below for each loan separately except where an election has been made to treat a director's loans as a single loan.

	Loan 1	Loan 2	Loan 3	Loan 4	Loan 5
A Maximum balance on either 5 April 2016 or the date the loan was taken out, whichever is later					
B Maximum balance on earlier of day loan was discharged or 5 April 2017					
C Total (A + B)					
D Divide C by 2					
E Number of complete tax months in tax year (6th of month to 5th of following month) throughout which loan was owing					
F Multiply D by E, then divide by 12					
G Official rate of interest	%	%	%	%	%
H Multiply F by G					
J Enter interest paid in 2016 to 2017					
K Cash equivalent of loans H minus J					

The figures at K are the amounts to be entered in Section H box 15 on form 'P11D'.

If the employee has more than two loans, you can write 'see attached' in Section H box 15 and attach a copy of this working sheet. But you must remember to add together the cash equivalents of all the loans for the purpose of calculating the total benefits liable to Class 1A NICs when completing form 'P11D(b) Return of Class 1A National Insurance contributions due'.

Employees may elect for a more complex but accurate method of calculating the benefit from interest-free or low interest loans. Employers are not responsible for providing such a calculation.
