Subject: 62A/22/0006 Berden Hall

Dear Sirs, I am writing regarding the above application, I have noticed that the mitigation statement regarding skylarks really isn't adequate, the amount of space really isn't enough, and wild birds are very affected by change, these birds have been using this site for a very long time, more thought needs to be given as these are on the red list and declining at a rapid rate. I am not against green power at all but please be mindful of these protected species

Yours faithfully

Ellen Ridler
