Subject: Objection to Solar Farm on land East of Pelham substation, Maggots End Manuden-
Application number S62A/2022/0011

I am writing to object to the application to construct a solar farm comprising ground mounted solar arrays together with battery storage, inverter cabins, a substation, fencing and CCTV cameras on land near Pelham Substation Maggots End road Manuden CM23 1BJ.

My name is Ann Haskins and I live at [REDACTED]

Reasons for my objection are as follows:

The site proposed by low carbon for Pelham Springs Solar Farm extends to 196 acres.
This would be the largest solar farm in Uttlesford.
The visual impact would completely change the character of the area.
The site is mainly sloping so would be impossible to hide the 3 metre high solar panels.
The panels would be completely visible to passers by along Brick House Lane.
A solar farm should not be built next to an ancient woodland.
The site for the development is also rich in ecology.
I often see deer wandering across the site when out walking as they shelter in Styles Wood.
Solar panels are for roofs of houses not for farm land.
Yours sincerely
Ann Haskins
