Subject: Objection to Solar Farm on Land East of Pelham substation, Maggots End Manuden - Application number: S62A/2022/0011

I am writing to object to the application to construct a solar farm comprising ground mounted solar arrays together with (among other things) battery storage, inverter cabins, a substation, fencing and CCTV cameras on land near Pelham Substation Maggots End Road Manuden CM23 1BJ

My name is Charlotte thomas and I live at [REDACTED]

The reasons for my objection are as follows:

Farmland should be used for farming. With the current food crisis we need to ensure we can produce food here in the UK

- Low Carbon suggest that the majority of the land on the site is Grade 2 agricultural land. Over 81% of the site has been classified by Low Carbon as “best and most versatile” agricultural land.
- The Agricultural assessment is unreliable, because it does not reflect the actual site which is the subject of the planning application. For example, the area immediately to the West of Battles Hall has been included in the assessment but this is not part of the site.
- This is productive farm land which should be used for farming.
- We currently import more than 40 per cent of our food, and recent threats by countries to ban exports of vaccinations have highlighted the threat that similar bans could be imposed on food if countries are themselves short of supplies in the future.
- It is predicted that we will need to produce 56 per cent more food by 2050 due to increasing populations. We have not increased food production by 56 per cent in the last 30 years, and if we continue to build on farmland we have no hope of achieving it in the next 30 years either.

Regards

Charlotte Thomas
