Subject: Objection to Solar farm on land east of Pelham Sub Station, Maggots End Manuden application number S62A/2022/0011

Hi Planning Inspectorate

The purpose of this mail is to register my objection in the strongest terms to the aforementioned application. My reasons are set out below:

1. Prime productive farmland should not be used for solar panels. Its prime purpose is food production.
2. The more food we produce the less need there will be for importation of food from abroad.
3. There are any number of other more suitable locations for solar panels. Commercial properties and new builds in particular.
4. There will be a huge impact on local traffic. Our narrow uncared for roads will be further damaged by additional heavy traffic flow.
5. Offshore wind turbines are so much more efficient.

Please reject this application.

Yours faithfully

John Tippett
