Dear Sirs.

I would like to voice my objections to the new solar farm due to be built opposite my home.

1. The roads are barely wide enough for 2 cars to pass in some places never mind large lorries thundering through.
2. The land chosen for this project is prime farm land and with the world as it is at the moment we need to plant as much food as we can and not build on prime land.
3. I'm sure I have read that wind turbines are more cost effective for alternative energy.
4. When I watched Click on bbc1 one morning they reported solar panels are going to be obsolete very shortly due to new inventions
Such as film which covers building etc which cuts the cost by millions

Please don't allow this to happen wildlife around here has been shoved off lots of land due to the airport. now with all the new houses being built. Plus the planned solar farm they will disappear for ever and what shame for future generations who will not know or see local wildlife.

Mrs Jane Parrish
Mr Jason Oliver
