Subject: Support for Planning Application Pelham Spring UTT/21/3356/FUL

To whom it may concern

Re the above planning application

I live in the village of Manuden, close to the proposed development, I would like to place on record my support for the application as I believe those objecting to it don't fully grasp the energy crisis we live in. and once it has been developed it will go unnoticed and as documented in other solar farms both wildlife and certain types of farming can flourish on these sites.
