20th February 2023

Dear Sir or Madam,

Ref. Application S62A/2022/0011

WE wish to object to the above applications related to the proposed solar farm in Manuden and Berden.

There is a growing amount of evidence suggesting solar farms are not environmentally friendly when one considers the construction from start to finish i.e. production of the equipment required, construction of the site, transport and maintenance.

Furthermore we understand one offshore wind turbine would be able to generate at least the equivalent, if not more reliable power, than the proposed solar farm.

In addition this will lose, permanently, prime productive agricultural land, which we understand is approximately 196 acres, when we already import a significant amount of our food from abroad.

Yours faithfully,

Mr & Mrs R. Young
