Transmissible Spongiform Encephalopathy Regulations (Wales) 2018

Registration Form to use Restricted Animal Proteins in Non-ruminant Feed or to Transport Bulk Straight (unmixed) Processed Animal Proteins or Restricted Proteins

What is a restricted protein?

An animal protein restricted for feeding to non-ruminant animals like pigs, poultry, horses and farmed fish.

Which are the restricted proteins?

Fishmeal, blood products, blood meal (to farmed fish only), dicalcium and tricalcium phosphate of animal origin.

What is a processed animal protein?

A product made from Category 3 low risk animal by-products: meat and bone meal, poultry meal, meat meal, bone meal, hoof meal, feather meal, horn meal, greaves, poultry offal meal.

Read guidance on transmissible spongiform encephalopathy (TSE) regulations on GOV.UK at https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/398007/TSE-feed-controls.pdf

The guidance explains:

- the feed ban
- separation requirements for producing feed containing restricted proteins on farms with livestock
- requirements for cleaning down hauliers and mobile mixer vehicles before changing vehicle use

You can request hard copy guidance from CSCOneHealthAFC@apha.gov.uk

Application to register:

I hereby apply to register:

(Tick appropriate boxes)

- for authorisation to produce non-ruminant feed using restricted proteins - mobile mixer
- for authorisation to produce non-ruminant feed using restricted proteins - feedmill
- for authorisation to produce non-ruminant feed using restricted proteins - farm
- for permission to purchase and use feed containing restricted proteins on premises where ruminants are kept
- to transport bulk straight (unmixed) prohibited or restricted animal proteins

Contact detailsName Address
Postcode Telephone (*including national dialling code*) CPH/Customer ID (if available) **Details of premises to be registered (If different)**Name Address
Postcode CPH/Customer ID

Tick the box below as appropriate to record the registration activity required and identify the protein products involved:

Registration requirement

Type of protein	Transport unmixed restricted or processed animal protein	Produce feed containing restricted protein	Buy in and use feed containing restricted protein where ruminants are kept
Fishmeal	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Bloodmeal (<i>farmed fish only</i>)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Blood products	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Dicalcium or tricalcium phosphate of animal origin	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Processed animal proteins	<input type="checkbox"/>	Specify type	<input type="text"/>

Where vehicles are involved in transport (involving restricted or processed animal proteins) or mobile mixing activities (involving restricted proteins only), complete the table below:

Vehicle registration	Transport		Mobile mixing (must be dedicated to mixing non-ruminant feed)
	Dedicated	Not dedicated (specify other uses)	
	<input type="checkbox"/>		<input type="checkbox"/>
	<input type="checkbox"/>		<input type="checkbox"/>
	<input type="checkbox"/>		<input type="checkbox"/>
	<input type="checkbox"/>		<input type="checkbox"/>
	<input type="checkbox"/>		<input type="checkbox"/>

I have read and understood the requirements. I understand that:

- an Animal and Plant Health (APHA) inspector will inspect my property to ensure that I keep non-ruminant feed containing restricted protein well separated from ruminant feed or ruminant access
- APHA will only give me authorisation or permission after this inspection

DATA PROTECTION

For information on how we handle personal data please go to www.gov.uk and search Animal and Plant Health Agency Personal Information Charter.

Glossary of Terms

1. Non-ruminants: include pigs, poultry, horses and farmed fish.
2. Ruminants: includes cattle, goats, sheep, camels, llamas, giraffes, bison, buffalos, deer, wildebeest and antelope.
3. Fishmeal: processed animal protein derived from wild fish caught in the open sea.
4. Dicalcium or tricalcium phosphate: refers to dicalcium and tricalcium phosphate derived from animals only, not products derived from mineral sources. Mineral-derived versions are permitted for all livestock feed and are more commonly used. Feed labels which mention these ingredients, but do not actually specify that they are of 'animal' origin can be taken to be mineral. The use of mineral-derived products does not require authorisation/registration under the TSE regulations.
5. Blood products: includes dried, frozen or liquid plasma, dried whole blood, dried, frozen or liquid red cells or its fraction and mixtures of these. Derived from non-ruminant animals that have passed ante and post-mortem inspection. Product is sourced and processed in accordance with the UK Animal By-Product Regulations.
6. Blood meal: product derived from the heat-treatment of blood or fractions of blood derived solely from non-ruminants. The blood for blood meal can be derived from blood from non-ruminants that have passed ante and post-mortem inspection. Unlike blood products, it can be derived from animals that have failed post-mortem inspection. Blood meal is therefore only permitted for feeding to farmed fish rather than all non-ruminants. Blood meal is sourced and processed in accordance with the UK Animal By-Product Regulations.

Send completed form to:

APHA One Health Customer Service Centre
Animal and Plant Health Agency
County Hall
Spetchley Road
Worcester
WR5 2NP

Email: CSCOneHealthAFC@apha.gov.uk

APHA is an Executive Agency of the Department for Environment, Food and Rural Affairs and also works on behalf of the Scottish Government, Welsh Government and Food Standards Agency to safeguard animal and plant health for the benefit of people, the environment and the economy.
