Dear Planning Inspector.

Reference S62A/2023/0015 Planning at the Village of Elmdon in Essex.

I Object to this planning, S62A/2023/0015 building houses in the heart of Elmdon village is just madness, it will be a Carbuncle in the heart of our country side.

Elmdon is at a beautiful village to visit, walking around Elmdon all year round is a very relaxing time spent with family and friends, any extra housing built in this beautiful picturesque village will have a massive impact on the village and surrounding villages alike.

Heavy vehicles will impact on the infrastructure, the roads are simply not constructed to take such heavy industrial vehicles and would also have a massive impact on the village people, environment and the wild life.

Elmdon village simply does not have the services or amenities to support extra housing, there are no shops, clubs or pubs, it is simply a beautiful village that should stay unspoilt for future generations yet to be born.

**I am not a resident of Elmdon but feel a duty to protect villages in our country, greedy planners and land owners that want to destroy our countryside should hang their heads shamefully.**

Please reject this planning so that we can preserve the beauty that is our villages and countryside for future generations yet to be born.

Mr Robert Fawcett
