Subject: Solar Farms

Dear Sirs, can we really afford to cover agricultural land with these developments when we only produce

40 percent of our food

All new build should have panels first before we ruin our little villages by surrounding listed buildings, ancient woodland , &protected lanes with these solar farms proposed at the Pelhams & Berden Our narrow roads & lanes ,many with side ditches as a hazard for passing large vehicles,are in a shocking state already, caused by existing traffic & huge farm equipment so what will happen when hundreds of journeys by the site lorries arrive along our small roads. Please come & see this problem & vote against these applications The panels may be a good idea (I have them) but entirely in the wrong place outlined in these applications Thank you for your time SMF Rochford (Mrs)
