MERCHANT SHIPPING NOTICE

MSN 1874 (M+F) Amendment 7 Marine Equipment – United Kingdom conformity assessment procedures for marine equipment, Other Approval and Standards

Notice to all:

- Manufacturers and Distributors of Marine Equipment
- Masters, Officers and Skippers of: Merchant Ships, Fishing Vessels, Small Commercial Vessels and Pleasures Vessels
- Ship: Builders, Designers, Operators, Owners and Managers
- Marine Consultants, Recognised Organisations, Certifying Authorities, and Approved and Nominated Bodies

This Notice should be read with the Merchant Shipping (Marine Equipment) Regulations 2016 SI 2016/1025 as amended by the Merchant Shipping (Marine Equipment) (Amendment etc.) (EU Exit) Regulations 2019 SI 2019/470 and the Merchant Shipping (Marine Equipment) (Amendment) (UK and US Mutual Recognition Agreement) (EU Exit) Regulations 2019 SI 2019/1304 (“the Regulations”), MIN 590 Amendment 5 – United Kingdom conformity assessment procedures for marine equipment following the transition period and relevant UK carriage requirement instruments.

This Notice replaces MSN 1874 (M+F) amendment 6.

Summary

This Notice has been given force of law by Statute (SI 2016/1025) as amended.

The objective of the Regulations is to enhance safety at sea and prevention of pollution to the marine environment through the uniform application of the relevant international instruments relating to equipment to be placed on board ships registered with the UK.

This Notice gives technical information and guidance about the procedures for obtaining type approval in conformity with the Regulations. It also gives information regarding the United Kingdom's policy for enforcing these requirements, and other standards to be applied to equipment on board United Kingdom ships.

This Notice replaces Merchant Shipping Notice 1874 (M+F) amendment 6 in view of amendments to the Regulations to address failures of the Regulations (as originally enacted) to operate effectively and other deficiencies arising from the withdrawal of the United Kingdom from the European Union.

1. Introduction

1.1 The Merchant Shipping (Marine Equipment) Regulations 2016 SI 2016/1025 as amended ("the Regulations") and this Notice sets out performance and testing standards to be met by marine equipment placed or to be placed on board a UK ship in accordance with the UK's conformity assessment procedures, as detailed in Part I of this Notice.

1.2 This Notice also sets out type approval procedures for equipment placed or to be placed on board UK ships which is outside the scope of the UK's conformity assessment procedures for marine equipment, but which requires conformity approval by various UK instruments. Such type approvals are carried out by nominated bodies in accordance with the procedures in Part II of this Notice.

1.3 Further, this Notice sets out the technical standards for equipment not requiring conformity assessment of type approval, before being placed on board a UK ship and for which the carriage requirement does not provide for a specific standard of equipment.

1.4 This Notice is split into three parts, covering three overarching categories of equipment:

1.4.1 Part I, sets out the equipment within the scope of the UK's conformity assessment procedures for marine equipment and the associated technical requirements to which equipment must be approved by an approved body;

1.4.2 Part II, sets out the requirements for equipment that falls outside the scope of the UK's conformity assessment procedures for marine equipment but nonetheless requires approval of the Maritime & Coastguard Agency ("MCA") as the flag administration for UK ships under the international instruments, and equipment required to be approved in accordance with other UK domestic instruments; and

1.4.3 Part III, sets out technical standards and arrangements for other equipment, where there is no specified standard for such equipment in existing UK instruments.

1.5 Interpretation:

In this Notice:

1.5.1 “The Regulations” shall mean the Merchant Shipping (Marine Equipment) Regulations 2016 SI 2016/1025 as amended by the Merchant Shipping (Marine Equipment) (Amendment etc.) (EU Exit) Regulations 2019 SI 2019/470.

1.5.2 Where a specific regulation is cited, unless specifically stated otherwise, this shall be construed as reference to a regulation within the Regulations.

1.5.3 Where the term “Part” is used in relation to Part I, II or III of this Notice, this refers to the respective part of this Notice.

1.5.4 Unless expressly stated otherwise, a term used in this Notice shall have the same meaning as defined in regulation 2 of the Regulations.

PART I – Equipment within the scope of the UK conformity assessment procedures for marine equipment

2. Scope of equipment approval according to the UK conformity assessment procedures for marine equipment

2.1 Equipment within the scope of Part I is that which is required by the international instruments and must be approved by the flag State administration of the relevant ship, as provided for in regulation 5(1).

2.2 Equipment to which Part I applies must be approved by one or more approved bodies. For more information regarding the approval procedure and/or the application of requirements of such equipment, an approved body which may assess the relevant equipment should be contacted. A full list of approved bodies can be found in paragraph 5.3 of this Part.

2.3 Manufacturers with existing approval certificates in accordance with the Marine Equipment Directive (Directive 2014/90/EU on marine equipment) (“MED”) were, until 1 January 2023, able to make their equipment available to the UK market and be placed on board UK ships as provided for in regulation 5 (provided MED and UK standards remained equivalent). However, from 1 January 2023, this is no longer accepted – except for the circumstances outlined in paragraphs 2.5 and 2.6 below.

2.4 MED approved marine equipment placed on board a UK flagged vessel before 1 January 2023 can remain on board for the duration of its operational life and only when items are replaced, after 1 January 2023, must they be replaced with UK approved marine equipment in accordance with the requirements in this MSN. This means that MED approved equipment that is on board a UK flagged vessel prior to the 1 January 2023 can remain on board until the end of the equipment’s operational life. For example, if a piece of MED approved equipment was on board a UK flagged vessel prior to 1 January 2023,

and then reached the end of its operational life after 1 January 2023; it would need to be replaced with UK approved marine equipment thereafter.

2.5 Equipment that is defined as a 'spare' part can continue to be placed on board a United Kingdom ship, this includes after 1 January 2023. A 'spare' is defined as: '*Spare*s are replacements of Wheelmarked or Red Ensign marked products which ensure continued functionality (i.e., via maintenance or repair) of a wider product or system on board a United Kingdom ship.'

2.6 Additionally, EU-approved marine equipment that has been manufactured **before 1 January 2023** can continue to be placed on board United Kingdom ships as if it was a United Kingdom approved piece of marine equipment, subject to the timeframes around placing on board outlined elsewhere in this notice. If such equipment has been manufactured after 1 January 2023, then it must be UK approved.

3. Requirements for equipment to be placed on board a UK Ship

3.1 Equipment placed on board a UK ship to which this Part applies must meet the design, construction and performance requirements of the international instruments detailed in Annex 1 of this Notice applicable at the time when that equipment is placed on board in accordance with regulation 5(1)

3.2 Unless there is a change in the applicable standards specified in Annex 1 of this Notice for equipment already placed on board a UK ship, existing approval will continue to be accepted providing equipment continues to operate in accordance with its existing approval. If equipment is replaced, it must be replaced with equipment which complies with the Regulations.

4. Domestic Passenger Ships and Large Fishing Vessels

4.1 As required by regulation 5(2), where equipment is specified in Annex 1 of this Notice, a domestic passenger ship or fishing vessel must carry equipment that complies with applicable international standards, except where a carriage requirement provides for an alternative standard. The carriage requirements are listed in Annex 4 of this Notice.

4.2 Regulation 5(2)(c) provides an exception to regulation 5(2) detailed above, such that equipment voluntarily placed on board must meet the standard(s) specified by the Secretary of State. This provision is to allow flexibility while ensuring a minimum standard of safety. Such specified standards will be agreed by a ship's appointed MCA surveyor where it is proven that the equipment complying with applicable international standards does not offer a practicable solution for reasons of size of the equipment/ integration with the ship or vessel etc.

5. UK Approved Bodies

5.1 The MCA has designated organisations listed below as approved bodies for the purpose of carrying out approvals of equipment to undertake the examination, testing and certification of the equipment specified in Annex 1 of this Notice.

5.2 For information regarding the equipment types and modules of conformity an approved

body may perform, the specific body must be contacted.

5.3 Please see paragraph 6 for information regarding provisionally appointed UK Approved Bodies, including a definition.

5.4 Approved Bodies must meet the requirements of Schedule 3 of the Regulations and will be assessed at least once every 2 years to confirm compliance with these requirements. The United Kingdom Accreditation Services (UKAS) as the national accreditation body is delegated this assessment responsibility. Further information and guidance is available for conformity assessment bodies wishing to be designated as an approved body in Marine Guidance Note 554 as amended.

5.5 The MCA is responsible for designating approved bodies on behalf of the Secretary of State. For this purpose, the MCA can be contacted at the following address:

UK Technical Services Ship Standards
 Maritime and Coastguard Agency
 Bay 2/21
 Spring Place
 105 Commercial Road
 Southampton
 SO15 1EG
 United Kingdom

Email: MEQA@mcga.gov.uk

6. Provisionally appointed UK Approved Bodies

- 6.1 The MCA has provisionally designated organisations listed as approved bodies for the purpose of carrying out approvals of equipment to undertake the examination, testing and certification of the equipment specified in Annex 1 of this Notice. These are specified in the Approved Bodies table in section 5 above, on pages 6 – 8 of this Notice.
- 6.2 Provisionally appointed UK Approved Bodies must meet the requirements of Schedules 3 and 4 of the Merchant Shipping (Marine Equipment) Regulations 2016 as amended, and must successfully complete accreditation with the United Kingdom Accreditation Service (UKAS) before 30th June 2023. Provisionally appointed UK Approved Bodies cannot approve marine equipment under the terms of the UK-US Mutual Recognition Agreement for marine equipment. This means they cannot issue the USCG mark for these items of equipment. Once provisionally appointed UK Approved Bodies become fully accredited and appointed as UK Approved Bodies, they will be able to approve items under the terms of the UK-US Mutual Recognition Agreement for marine equipment.
- 6.3 For information regarding the equipment types and modules of conformity an approved body may perform, the specific body must be contacted. Alternatively, please see the information on the UKMCAB database:

https://www.gov.uk/uk-market-conformity-assessment-bodies?uk_market_conformity_assessment_body_legislative_area%5B%5D=marine-equipment

7. UK Market Surveillance

- 7.1 The MCA, on behalf of the Secretary of State for Transport, is the market surveillance authority for equipment and is required to carry out market surveillance. Approved Bodies, manufacturers and manufacturers' authorised representatives must cooperate with MCA market surveillance inspectors as indicated in this Part and in accordance with the Regulations. Market surveillance seeks to ensure the safety of products offered for supply to the UK market and UK ships. Such market surveillance will take into consideration the conformity assessment procedures applicable to equipment and the responsibilities of the flag State administrations in the international instruments.
- 7.2 Market surveillance may include the inspection of documents supplied with equipment to confirm its compliance as well as checks of equipment specified in regulation 5(1), whether or not it has been placed on board a UK ship. Where checks are carried out on equipment placed on board a UK ship, such checks will be limited to examinations that can be carried out while the equipment remains fully functional on board.
- 7.3 When the MCA has received evidence to suggest equipment specified in Part I may not be in compliance with the international instruments and/or poses a risk to the safety of persons on board UK ships or the marine environment it may seek further evidence by carrying out sample checks of such equipment. Accordingly, the MCA may request the manufacturer to provide the necessary samples at the manufacturer's own cost or give on-the-spot access to the samples at the manufacturer's premises.

- 7.4 Where the MCA has sufficient reason to believe that equipment to which this Part is applicable presents a risk to maritime safety, to health or to the environment, it may carry out an evaluation in relation to the equipment concerned covering all the requirements for such equipment. The relevant economic operators must cooperate as necessary with the MCA in accordance with the Regulations. Additionally, the MCA may inform the public on the potential risk via the publication of safety bulletins etc.
- 7.5 Where the MCA finds that, subject to the evaluation in 6.4, the equipment does not comply with the requirements in this Part, the MCA may without delay require the relevant economic operator to take all appropriate corrective actions to bring the equipment into compliance with those requirements, using existing powers in the Merchant Shipping Act 1995 by way of an Improvement or Prohibition Notice. This will be commensurate with the nature and extent of the risk which the MCA considers is posed by the equipment, as it may prescribe, or any other corrective measure justified by the MCA. The MCA will inform the relevant approved body accordingly. Where the economic operator does not carry out such corrective measures within the timeframe specified by the MCA, the MCA may initiate such appropriate measures as are necessary to prohibit or restrict non-compliant equipment from being supplied to the UK market or placed on board UK ships.
- 7.6 Where it is considered that non-compliance may not be limited to the UK market, the MCA may inform other parties to the international instruments flag administrations and international organisations to include the nature of the non-compliance and the corrective actions which has been implemented.

PART II – Approved equipment outside the scope of the UK’s conformity assessment procedures but requiring approval under international instruments or other UK domestic instruments

8. Scope of Approval

8.1 Equipment to which this Part applies is that equipment outside the scope the UK’s conformity assessment procedures for marine equipment, but nonetheless requires approval by the MCA as a UK ship’s flag administration under international instruments. Part II also applies to equipment that requires approval by other UK domestic instruments and are specified in Annex 2 of this Notice. This equipment must be type approved by the UK nominated bodies.

8.2 Where equipment within the scope of this Part is of a novel nature or subject to significant design changes or the specifications or testing requirements are not considered to be sufficiently developed or experience of their usage is limited, the MCA must be contacted regarding the undertaking of the necessary approval procedure. For this purpose, the MCA contact details in paragraph 5.5 above should be used. This is in addition to also contacting a relevant Nominated Body.

9. Requirements for Equipment

9.1 Equipment which is placed on board a UK ship to which this Part applies must hold a valid type approval certificate issued by a nominated body at the time when that equipment is placed on board.

9.2 The performance and testing standards of equipment within the scope of this Part are specified in Annex 2 of this Notice. In consultation with the MCA, a nominated body may waive the requirements for any test specifically cited in a performance standard providing it is satisfied that the sample has met the criteria of a specification superior to that of the prescribed test.

9.3 Existing type approval certificates for equipment within the scope of this Part will remain valid before the certificate’s expiry date, or until cancelled. Upon the expiry date of the certificate, manufacturers must re-apply for renewal of their certificate to a nominated body. If requirements have not changed a new certificate will be issued. All certificates of type approval will be valid for up to 5 years.

9.4 Unless there is a change in the required standards specified in Annex 2 of this Notice applicable to equipment already placed on board a UK ship, existing approval will continue to be accepted providing the equipment operates satisfactorily. If it needs to be replaced, then it must be replaced with equipment for which a current type approval certificate is in force.

10. Domestic Passenger Ships and Large Fishing Vessels

10.1 As required by regulation 5(2), where equipment is specified in Annex 2 of this Notice, a domestic passenger ship or fishing vessel must carry equipment that has been approved

by a nominated body, except where a carriage requirement provides for an alternative standard to be met. The carriage requirements are listed in Annex 4 of this Notice.

10.2 Regulation 5(2)(c) provides an exception to regulation 5(2) detailed above, such that equipment voluntarily placed on board must meet the standard(s) specified by the Secretary of State. This provision is to allow flexibility while ensuring a minimum standard of safety. Such specified standards will be agreed by a ship's appointed MCA surveyor where it is proven that the equipment complying with applicable international standards does not offer a practicable solution for reasons of size of the equipment/ integration with the ship or vessel etc.

11. Application for Type Approval

11.1 A manufacturer or person wishing to obtain type approval of equipment specified in Annex 2 of this Notice must submit an application to a nominated body, in accordance with Part 4 of the Regulations. The application must include:

11.1.1 The name and address of the manufacturer and, if the application is lodged by an authorised representative, their name and address;

11.1.2 A written declaration that the same or a similar application has not been lodged with another nominated body;

11.1.3 The technical documentation described in 11.3 below; and

11.1.4 The applicant must place at the disposal of the nominated body sufficient specimens representative of the production envisaged. The nominated body may request further specimens if needed for carrying out the test programme.

11.2 The technical documentation must enable a nominated body to assess conformity of the product with the requirements and testing standards specified in Annex 2 of this Notice. It must cover the design, build standards, manufacture and functioning of the equipment, as far as relevant for conformity assessment.

11.3 The technical documentation must contain all relevant data or means used by the manufacturer to ensure that the equipment complies with the essential requirements relating to it. It must also enable understanding of the design, manufacture and operation of the product and assessment of conformity with the relevant requirements.

11.4 The documentation shall contain so far as is relevant for assessment:

11.4.1 A general description of the equipment;

11.4.2 Conceptual design and manufacturing drawings and schemes of components and relevant supporting drawings;

11.4.3 Descriptions and explanations necessary for the understanding of the drawings and schemes including operation of the equipment;

11.4.4 Results of design calculations made, impartial examinations carried out etc;

11.4.5 Impartial test reports; and

11.4.6 Manuals for installation, use and maintenance.

11.5 Where appropriate, the design documentation must contain the following elements:

11.5.1 Attestations relating to the equipment incorporated in the appliance;

11.5.2 Attestations and certificates relating to the methods of manufacture and/or inspections and/or monitoring of the appliance; and

11.5.3 Any other document making it possible for the nominated body to improve its assessment.

12. Assessment of Type Approval

12.1 On receipt of an application for type approval in accordance with paragraph 11 above, a nominated body must:

12.1.1 Examine the technical documentation and verify that the equipment has been manufactured in conformity with the technical documentation;

12.1.2 Agree with the applicant the location where the examination and necessary tests are to be carried out; and

12.1.3 Perform or have performed the appropriate examination and necessary tests to check whether the relevant requirements specified in Annex 2 are complied with.

12.2 Type approval tests must be conducted at a laboratory accredited for such tests by the UKAS or equivalent national accreditation body. However, if no such laboratory is available, a laboratory recognised by the nominated body as offering suitable and satisfactory guarantee of technical and professional competence, quality procedures and autonomy with particular reference to the application of ISO/IEC 17025 (2017), as amended may be used.

12.3 Where the equipment meets the provisions of the relevant requirements specified in Annex 2 of this Notice and test and performance standards, the nominated body must issue a certificate of type approval to the applicant. The certificate must contain the name and address of the manufacturer, details of the equipment, conclusions of the examination, conditions for its validity and the necessary data for identification of the approved type.

12.4 A list of the relevant parts of the technical documentation including drawings and instructions must be annexed to the certificate and a copy kept by the nominated body.

12.5 If the manufacturer is refused a certificate of type approval, the nominated body must provide detailed reasons for such refusal in writing, to the applicant for type approval.

12.6 Where an application is rejected after completion of the type approval procedure, the

manufacturer must modify the equipment to take account of the reasons for rejection before making a new submission to the nominated body. In the manufacturer's application to the nominated body they must include:

12.6.1 the original examination and test results;

12.6.2 the detailed reasons provided by the nominated body for the previous refusal; and

12.6.3 details of all modifications made to the equipment since the previous application.

12.7 Upon receipt of the re-submission of the application for type approval, the nominated body must re-open the approval procedure.

12.8 The applicant must inform the nominated body that holds the technical documentation concerning the certificate of type approval of all modifications to the approved product which must receive additional approval where such changes may affect the conformity with the requirements or the prescribed conditions for use of the equipment. This additional approval must be given in the form of an addition to the original certificate of type approval.

13. Issue of Type Approval

13.1 Providing that a nominated body is satisfied that the equipment complies in all respects with the requirements in Annex 2 of this Notice and any specifications laid down by the MCA and subject to the provisions below, the nominated body must issue a certificate of type approval stating the terms and conditions of approval and period of validity which must be up to 5 years.

13.2 A certificate of type approval refers only to equipment identical to that assessed. It is also a condition of issue of the certificate that a manufacturer must consult with the nominated body prior to any alteration to the approved standard of the equipment, hardware, software or firmware.

13.3 The nominated body may require further testing and assessment to be undertaken in the event of a modification, or series of modifications, being considered to constitute sufficient departure from the approved standard of the equipment hardware, software or firmware for which the certificate of type approval was originally issued.

13.4 The certificates of type approval and/or their additions and annexes to the certificates, technical documentation, other documentary evidence used to type approve the equipment must be kept at the disposal of the MCA and other nominated bodies for a period of not less than 10 years after the last product has been manufactured.

13.5 The manufacturer or his authorised representative shall keep with the technical documentation copies of certificates of type approval and their additions for a period of at least 10 years after the last product has been manufactured.

14. Nominated Bodies

14.1 Nominated bodies are those bodies which have been designated by the Secretary of State to carry out type approval of equipment placed on board UK ships under regulation 4 of the Regulations. The designated UK nominated bodies are listed below along with the equipment types they are designated to approve.

<p>Bureau Veritas</p> <p>Bureau Veritas 206 Fort Dunlop Fort Parkway Birmingham B24 9FD</p> <p>Email: marineequipment.paris@bureauveritas.com</p>	<p>DNV UK Ltd</p> <p>Vivo Building 30 Stamford Street London SE1 9LQ Tel: 020 3816 4000</p> <p>Technical Manager for DNV UK Ltd – Andrew.Derbyshire@DNV.com MER Mailbox: UKMER@DNV.com</p>

- 14.2 Each nominated body must provide upon request to the MCA and other nominated bodies the relevant information concerning the certificates of type approval and additions issued and withdrawn.

PART III – Other Equipment Standards

15. Scope of Equipment Standards and Requirements

- 15.1 Equipment within this Part is equipment required by UK instruments and specified in Annex 3 of this Notice, but where no standard for such equipment is specified to provide an acceptable level of safety to domestic ships outside the scope of the international conventions. This equipment may not be of an approved type and in all cases must comply with the relevant standard specified in Annex 3 of this Notice.

16. Requirements for Equipment

- 16.1 Equipment specified in Annex 3 of this Notice and placed on board a UK ship to which this Part applies in accordance with regulation 5(3) must meet the design, construction and performance requirements of the standards in Annex 3 valid at the time when that equipment is placed on board. Annex 3 of this Notice also sets out the ship type to which each specified standard is applicable.

Annex 1

This annex sets out in full the design, construction and performance requirements and testing standards for marine equipment to which approval by an approved body is required in accordance with regulation 5.

The requirements below replace those in Merchant Shipping Notice 1874 (M+F) amendment 4.

General note: references to 'SOLAS' Regulations refer to the provisions of the International Convention for the Safety of Life at Sea, as amended.

List of acronyms used

A.1, Amendment 1 concerning Standard Documents other than IMO.
A.2, Amendment 2 concerning Standard Documents other than IMO.
AC, Amending Corrigendum concerning Standard Documents other than IMO.
CAT, Category for radar equipment as defined in section 1.3 of IEC 62388 Circ., Circular.
COLREG, Convention on the International Regulations for Preventing Collisions at Sea, 1972.
COMSAR, IMO's Sub-Committee on Radiocommunications and Search and Rescue.
EN, European Standard.
ETSI, European Telecommunication Standardisation Institute.
FSS, International Code for Fire Safety Systems.
FTP, International Code for Application of Fire Test Procedures.
HSC, High Speed Craft Code.
IBC, International Bulk Chemical Code.
ICAO, International Civil Aviation Organization.
IEC, International Electrotechnical Commission.
IGC, International Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk.
IMO, International Maritime Organization.
ISO, International Organisation for Standardization.
ITU, International Telecommunication Union.
LSA, Life saving appliance.
MARPOL, International Convention for the Prevention of Pollution from Ships
"The Regulations" shall mean the Merchant Shipping (Marine Equipment) Regulations 2016 SI 2016/1025 as amended
MEPC, Marine Environment Protection Committee.
MSC, IMO's Maritime Safety Committee.
NOx, Nitrogen Oxides.
O₂/HC systems: Oxygen Hydro Carbon systems.
SOLAS, International Convention for the Safety of Life at Sea, 1974.
SOx, Sulphur Oxides.
Reg., Regulation.
Res., Resolution.

Notes applicable to the whole of this Annex

(a) General: In addition to the testing standards specifically referred to in this Annex, type-

examination (type approval) requires compliance with the applicable requirements of the international conventions and the relevant resolutions and circulars of the IMO. Such compliance is referred to in the modules for conformity assessment in the Regulations.

- (b) Column 3: Where two sets of testing standards are separated by 'or', each set fulfils all the testing requirements to meet IMO Performance Standards; thus testing to one of those sets is sufficient to demonstrate compliance with the requirements of the relevant international instruments. On the contrary, when other separators (such as comma) are used all the listed references apply.
- (c) Column 6: In order to take into consideration timeframes for shipbuilding, depending on the characteristics of the specific marine equipment, the following meanings of 'placing on board' (indicated in brackets behind the dates) apply:
 - I : first installation of the equipment in its functional position on board a UK ship;
 - II : first installation of the equipment in its functional position or stowing in its functional position on board a UK ship;
 - III: delivery of the equipment to the shipyard if this takes place within 30 months before the first installation of the equipment in its functional position.
- (d) Where there are two rows for one marine equipment entry (e.g. UK/3.12), the second (lower) row contains the updated requirements of the international instruments in respect to the ones shown in the first (upper) row.
- (e) In the situations referred to in point (d) where no date is given in columns 5 and 6, this indicates that there has been no change in the testing standards and that the marine equipment item concerned shall comply with the requirements indicated in the (second) lower row.
- (f) Where there are three rows for one marine equipment entry (such as UK/3.51a), the third (lowest) row contains the updated requirements of the international instruments in respect to the ones shown in the first two (upper) rows.

5. Radio-communication equipment

Notes applicable to section 5: Radio-communication equipment.

Column 3: In case of conflicting requirements between IMO MSC/Circ.862 and the product testing standards, the IMO MSC/Circ.862 requirements shall take precedence.

Column 3: In case of conflicting conditions, requirements and tests between Table 5 and Table 6 of IEC 60945 and other listed standards (i.e. ETSI standards), the IEC 60945 conditions, requirements and tests shall take precedence.

9. Equipment for which the set of standards for UK certification is not complete

Note applicable to section 9:

A set of standards for UK certification is deemed to be complete where:

IMO Provisions for:

- Type approval,
- Carriage Requirements; and,
- Testing Standards,

are available and appropriate.

1. Life-saving appliances

No	Item designation
UK/9/1.1	Radar reflector for liferafts
UK/9/1.2	Immersion suit materials
UK/9/1.3	Float-free launching appliances for survival craft
UK/9/1.5	Public address & general emergency alarm system (when used as fire alarm device item A.1/3.53 shall apply) – Moved to UK/1.44a and UK/1.44b by MSN 1874 amendment 7.
UK/9/2.3	Equipment using other equivalent methods to reduce on board NOx emissions
UK/9/2.4	Equipment using other technological methods to limit SOx emissions
UK/9/2.5	On board NOx analysers using a measurement method other than the Direct Measurement and Monitoring Method of the NOx Technical Code 2008

2. Marine pollution prevention equipment

No	Item designation
UK/9/2.3	Equipment using other equivalent methods to reduce on board NOx emissions
UK/9/2.4	Equipment using other technological methods to limit SOx emissions
UK/9/2.5	On board NOx analysers using a measurement method other than the Direct Measurement and Monitoring Method of the NOx Technical Code 2008

3. Fire protection equipment

No	Item designation
UK/9/3.8	Electric safety lamp
UK/9/3.9	Protective clothing resistant to chemical attack
UK/9/3.13	Compressed airline breathing apparatus (High Speed Craft)
UK/9/3.21	Paint lockers and flammable liquid lockers fire extinguishing systems components
UK/9/3.24	Portable Foam Applicator Units
UK/9/3.26	Gaseous Fuel Systems Used for Domestic Purposes (components)
UK/9/3.27	Fixed Gas Fire Extinguishing Systems (CO ₂) components.
UK/9/3.31	Water Spraying Hand Operated System
UK/9/3.33	Fire hoses with diameter > 52 mm
UK/9/3.74	Alcohol resistant foam system – Added by MSN 1874 amendment 7
UK/9/3.75	Flexible hoses suitable for methyl/ethyl alcohol for fuel piping systems – Added by MSN 1874 amendment 7
UK/9/3.76	Vapour outlets suitable for methyl/ethyl alcohol fuel tanks – Added by MSN 1874 amendment 7

4. Navigation equipment

No	Item designation
UK/9/4.11	Combined GPS/GLONASS equipment
UK/9/4.20	Track control system for - high-speed craft

UK/9/4.33	Track control system (working at ship's speed from 30 knots and above)
UK/9/4.37	Electronic Inclinator
UK/9/4.66	Nautical publications in digital form as defined by SOLAS V/27

5. Radiocommunication equipment

No	Item designation
UK/9/5.8	Aeronautical two-way VHF radio telephone apparatus - Moved to UK/5.16

6. Equipment required under COLREG 72

No	Item designation
UK/9/6.2	Sound signal appliances
UK/9/6.4	Two-way voice and data communication with a Telemedical Assistance Service (TMAS)
UK/9/6.5	Sound signalling system mounted to face astern to indicate escort and emergency manoeuvres

7. Other safety equipment

No	Item designation
----	------------------

UK/9/7.1	Loading instrument
UK/9/7.2	Water level detectors on bulk carriers – item deleted

8. SOLAS Chapter II-1 equipment

No	Item designation
UK/9/8.1	Cold weather starting of generator sets (starting devices)

Annex 2

This Annex sets out equipment within the scope of part II of this Notice and would previously have been specified in Merchant Shipping Notice 1735 (M+F). This equipment is that requiring approval by a ship's Flag Administration but which is not within the scope of the UK's conformity assessment for marine equipment. The table below sets out the relevant Regulations of the applicable IMO Convention and performance standards and as applicable testing standards. Such equipment is to be type approved by a Nominated Body. Similar to Annex 1, equipment is grouped into categories (Life-Saving Appliances, Pollution Prevention, Fire Protection, Navigation, Radio communication and equipment required by COLREG).

This Annex also specifies other equipment which requires approval which is approved by a Nominated Body.

Note applicable to this entire Annex: Where no testing standard is stated in column 4 of the relevant table for equipment in question, the testing standard is to be agreed between the relevant Nominated Body and the MCA ahead of the type approval regime being agreed with the applicant for type approval.

a. Life-saving appliances

Column 4: IMO MSC/ Circular 980 should apply except when superseded by the specific instruments referred to in Column 3.

Item designation	Regulation SOLAS 74, as amended, where "type approval" is required	Regulations of SOLAS 74, as amended, and the relevant resolutions and circulars of the IMO, as applicable	Testing standards
1	2	3	4
Radar reflector for liferafts	-Reg. III/4, -Reg. III/34, -Reg. X/3.	-IMO Res. MSC.48(66)- (LSA Code).	ISO 8729 standards and SOLAS
Float-free launching appliances for survival craft	-Reg. III/4, -Reg. III/34.	Reg. III/13, -Reg. III/16, -Reg. III/26, -Reg. III/34, -IMO Res. MSC.36(63)- (1994 HSC Code) 8, -IMO Res. MSC.48(66)- (LSA Code) I, IV, VI, -IMO Res. MSC.97(73)- (2000 HSC Code) 8.	

“Public address & general emergency alarm system (when used as fire alarm device item UK/3.53 in Annex 1 shall apply): **item moved to UK/1.44a and UK/1.44b in Annex 1 of this Notice by MSN 1874 amendment 7.**

b. Marine pollution prevention

Item designation	Regulation MARPOL 73/78, as amended, where "type approval" is required	Regulations of MARPOL 73/78, as amended, and the relevant resolutions and circulars of the IMO, applicable	Testing standards
1	3	4	5
Equipment using other equivalent methods to reduce on board NOx emissions	-Annex VI, Reg. 4.	-Annex VI, Reg. 4	
Equipment using other technological methods to limit SOx emissions	- IMO Res. MEPC.176(58) - (Revised MARPOL Annex VI, Reg. 4), -IMO Res. MEPC.184(59).	- IMO Res. MEPC.176(58) - (Revised MARPOL Annex VI, Reg. 4).	
On board NOx analysers using a measurement method other than the Direct Measurement and Monitoring Method of the NOx Technical Code 2008	-IMO Res. MEPC.176(58) - (Revised MARPOL Annex VI, Reg. 4)	-IMO Res. MEPC.176(58) - (Revised MARPOL Annex VI, Reg. 4)	

c. Fire protection equipment

Item designation	Regulation SOLAS 74, as amended, where “type approval” is required	Regulations of SOLAS 74, as amended, and the relevant resolutions and circulars of the IMO, as applicable	Testing standards
1	2	3	4
Electric safety lamp	-Reg. II-2/10, -Reg. X/3, -IMO Res. MSC.98(73)-(FSS Code) 3.	-Reg. II-2/10, -IMO Res. MSC.36(63)-(1994 HSC Code) 7, -IMO Res. MSC.97(73)-(2000 HSC Code) 7, -IMO Res. MSC.98(73)-(FSS Code), 3.	-IEC 60079 series.
Protective clothing resistant to chemical attack	-Reg. II-2/19.	-Reg. II-2/19, -IMO Res. MSC.36(63)-(1994 HSC Code) 7, -IMO Res. MSC.97(73)-(2000 HSC Code) 7.	-EN 943-1 (2002) including AC (2005), -EN 943-2 (2002), -EN ISO 6529 (2001), -EN ISO 6530 (2005), -EN 14605 (2005) including A1(2009), -IMO MSC/Circ.1120.
Paint lockers and flammable liquid lockers fire extinguishing systems components	-Reg. II-2/10.	-Reg. II-2/10, -IMO MSC.1/Circ.1239.

Cold-weather starting of generator sets (starting devices)	-Reg. II-1/44, -Reg. X/3.	-Reg. II-1/44, -IMO Res. MSC.36(63)-(1994 HSC Code) 12, -IMO Res. MSC.97(73)-(2000 HSC Code) 12.	

9. Other Equipment requiring type approval

Other ~ Life-saving appliances

Item designation
Lifeboat equipment (oars, knives, matches, torches, electrical equipment, etc)
LSA gas inflation system
LSA miscellaneous equipment (emergency life-line etc.)
Lifeboat manual pumps
Emergency equipment lockers
Sea anchors
Survival craft first aid kits
Survival craft rations and water
Non-SOLAS liferafts, rescue boats and inflatable boats
Float free arrangements for Search and Rescue Transponder (SART)
Equipment Requiring Approval in accordance with SI 1999 No. 2721 - The Merchant Shipping (Life-Saving Appliances for Ships other than Ships of Classes III to VI(A)) Regulations, but not specified in Annex 1 of this notice.
Equipment Requiring Approval in accordance with SI 1999 No. 2723 - The Merchant Shipping (Life-Saving Appliances for Passenger Ships of Classes III to VI(A)) Regulations, but not specified in Annex 1 of this notice.

Other ~ Marine Pollution prevention equipment

Item designation
Crude oil washing machines

Other ~ Fire Protection Equipment

Item designation
Hydrants (components)
Fire blankets

Equipment Requiring Approval in accordance with SI 1998 No.1011 – The Merchant Shipping (Fire Protection: Small Ships) Regulations, but not specified in Annex 1 of this notice.
--

Equipment Requiring Approval in accordance with SI 1998 No.1012 – The Merchant Shipping (Fire Protection: Large Ships) Regulations, but not specified in Annex 1 of this notice.
--

Equipment Requiring Approval in accordance with SI 2003 No.2950 – The Merchant Shipping (Fire Protection) Regulations, but not specified in Annex 1 of this notice.

Other ~ Crew accommodation equipment

Item designation

Vacuum discharge piping systems

Thermostatic mixing valves

Plant used to produce drinking and/or fresh water

Annex 3

This annex sets out equipment within the scope of part III of this Notice. This is equipment which does not require approval. This is equipment to which an explicit standard is not cited in UK instruments forming a carriage requirement.

The table below sets out minimum standards for acceptance on board the relevant UK ship listed in column 2. Column 1 states the item designation and column 3 states the minimum standard. When a minimum standard is not indicated, MCA will develop minimum standards through a separate MGN to be included in updates to this Notice. A ship carrying equipment which exceeds these minimum standards will be taken as meeting these standards.

Item Designation	Applicable Ships	Standard
Firefighter's Radios	UK Class I – II(A), VII – VIII(A), as required by SOLAS Regulation II-2 paragraph 10.4	<p>The two-way portable radiotelephone apparatus shall be of an explosion-proof type or intrinsically safe.</p> <p>In order for such equipment to meet the explosion proof or intrinsically safe requirements, the radio telephone apparatus are to be certified in accordance with relevant standards for equipment and protective systems intended for use in potentially explosive atmospheres, and maintained as such, for example:-</p> <p>Directive 94/9/EC (ATEX) - with approval rating such as II2G Ex ib IIA T3; or</p> <p>IEC 60079-0 2009 - Electrical apparatus for explosive gas atmospheres - Classification of areas; or</p> <p>IEC 60092-502 1999 - Electrical installations in ships - Tankers – Special features.</p> <p>Intrinsically safe radios should have a power output of 1 watt or less.</p> <p>The radio telephone apparatus are to be fit for purpose, i.e. they are able to work within the environment to be expected in a fire scenario, that their operating range is sufficient and that they are safe.</p>

Draught Gauge Indicators	UK Class I – II(A) – as required by SI 1998 No. 2514, Regulation 41.	
Lifebuoys-lightweight type (horseshoe)	Small Commercial Vessels ¹	
Means of Recovery	Passenger Ships certificated to MSN 1823 (Cat A-D)	
ORIL	Ships Certificated in accordance with MGN 469	
Radar Reflector	Ships Certificated in accordance with MGN 469	
Flares	Ships Certificated in accordance with MGN 469	
HRUs	Small Commercial Vessels ¹	
TPAs	Small Commercial Vessels ¹	
Hand held orange smoke flare	Small Commercial Vessels ¹	
Line Thrower	Small Commercial Vessels ¹	
VHF	Small Commercial Vessels ¹	
EPIRB	Small Commercial Vessels ¹	
SART	Small Commercial Vessels ¹	
Lifebouy	Inland small Pax code	
Radar Reflector	Fishing 15-24	
Fire Detection	Inland small Pax Code	
Fixed Fire Extinguishing	Inland small Pax Code	
Fixed Fire Extinguishing	Fishing less 15	
EPIRB	Small Commercial Vessels ¹	
VHF DSC	Small Commercial Vessels ¹	
Magnetic Compass	Inland small pax	

Search Light	Large Yacht	
Echo Sounder	Small Commercial Vessels ¹	
GPS	Small Commercial Vessels ¹	
Vessel's Log	Small Commercial Vessels ¹	
Signalling Lamp	Small Commercial Vessels ¹	
SART	Small Commercial Vessels ¹	
Compass/ Bearing Compass	Small Commercial Vessels ¹	
Echo Sounder	Small Commercial Vessels ¹	
GPS	Small Commercial Vessels ¹	
Signalling Lamp	Small Commercial Vessels ¹	
Search Light	Small Commercial Vessels ¹	

¹ Small Commercial Vessels are deemed to be any vessel which has been issued certification in accordance with the Codes of Practice for Vessels in Commercial use for Sport or Pleasure, Workboats and Pilot Boats or MGN 280.

Annex 4 – Carriage Requirements

The following instruments are those mentioned in the Regulations which form carriage requirements for Domestic Passenger Ships and Fishing Vessels to carry equipment which meets a standard other than the applicable international standards.

Instruments Applicable to Domestic Passenger Ships Certificated to Operate on Category C Waters or Seaward of that Limit:

The following Instruments to be read, as amended.

MSN 1823 (M) - The Safety Code for Passenger Ships Operating Solely in UK Categorised Waters – Which is given Legal Force by The Merchant Shipping (Passenger Ships) (Safety Code for UK Categorised Waters) Regulations 2010, SI 2010 No. 680;

MSN 1823 (M) Edition 2 Amendment 1 – The Safety Code for Passenger Ships Operating Solely in UK Categorised Waters, Edition 2, Amendment 1 - Which is given Legal Force by The Merchant Shipping (Passenger Ships) (Safety Code for UK Categorised Waters) Regulations 2010, SI 2010 No. 680;

The Small Sea Going Passenger Ship Code (A Code for Ships of Class VI);

The Merchant Shipping (Passenger Ships on Domestic Voyages) Regulations 2000, SI 2000 No. 2687;

The Merchant Shipping (Life-Saving Appliances for Ships other than Ships of Classes III to VI(A)) Regulations, SI 1999 No. 2721;

The Merchant Shipping (Life-Saving Appliances For Passenger Ships Of Classes III To VI(A)) Regulations 1999 SI 1999 No. 2723;

The Merchant Shipping (Fire Protection: Small Ships) Regulations 1998, SI 1998

No. 1011; The Merchant Shipping (Fire Protection - Large Ships) Regulations, SI

1998 No. 1012;

The Merchant Shipping (Fire Protection) Regulations 2003, SI 2003 No. 2950;

The Merchant Shipping (Prevention of Pollution by Sewage and Garbage from Ships) Regulations 2008, SI 2008 No. 3257;

The Merchant Shipping (Prevention of Air Pollution from Ships) Regulations 2008, SI 2008 No. 2924;

The Merchant Shipping (Prevention of Oil Pollution) Regulations 1996, SI 1996 No. 2154;

The Merchant Shipping (Distress Signals and Prevention of Collisions) Regulations, SI 1996 No. 0075;

The Merchant Shipping (Safety of Navigation) Regulations 2002, SI 2002 No. 1473; The Merchant Shipping (Radio Installations) Regulations 1998, SI 1998 No. 2070;

Instruments Applicable to Fishing Vessels of 24 metres Length or Over:

The following Instruments to be read, as amended.

The “Code of Practice for the Safe Construction and Operation of Fishing Vessels of 24 metres Registered Length and Over”;

The Fishing Vessels (Safety Provisions) Rules 1975 (S.I. 1975/330);

The Fishing Vessels (Life-Saving Appliances) Regulations 1988 (S.I.1988/38);

The Fishing Vessels (EC Directive on Harmonised Safety Regime) Regulations 1999 (S.I. 1999/2998) (which give effect to the Torremolinos Protocol (Cmnd.3339) relating to the Torremolinos International Convention for the safety of Fishing Vessels (Cmnd. 7252);

The Merchant Shipping (Distress Signals and Prevention of Collisions) Regulations SI 1996, No. 75;

The Merchant Shipping (Prevention of Oil Pollution) Regulations 1996 S.I. 1996 No. 2154;

SI 1999, No. 2205 The Merchant Shipping and Fishing Vessels (Personal Protective Equipment) Regulations SI 1999, No. 2205;

The Merchant Shipping (Radio)(Fishing Vessels) Regulations SI 1999,

No.3210; The Merchant Shipping (Safety of Navigation) Regulations SI

2002, No 1473;

The Merchant Shipping (Prevention of Air Pollution from Ships) Regulations SI 2008 No 2924; and

The Merchant Shipping (Prevention of Pollution by Sewage and Garbage from Ships) Regulations SI 2008 No.3257.

ANNEX 5 - UK Conformity Mark for Marine Equipment

The UK Conformity Mark must be affixed to marine equipment in accordance with the Regulations and must take the form set out below.

In any event, the UK Conformity mark for marine equipment must:

Be legible and permanently marked on the equipment which is in compliance with the Regulations;

contrast the background it is printed/ stamped etc on such that is either printed on a block white background or transparent background, providing legibility is maintained;

have vertical dimensions of at least 5mm with the ability to waive this for smaller products and/ or where the size of the conformity mark would not provide for legibility due to the size or nature of the product or it is not otherwise practicable to place the mark on the product in which case the mark should be placed on the accompanying paperwork or packaging; and

as per the Regulations, be accompanied by the identification number of the Approved Body which issues the quality assurance module of conformity (Module D, E or F) or if module G is used, the module G certificate as well as the date of affixing the mark as indicated below (where ##### would be the Approved Body Number and YY the year of affixing the conformity mark).

#####/YY

#####/Y

YYY

ANNEX 6 - Equipment in Scope of the UK-US MRA on Marine Equipment

ANNEX II to the Agreement between the United Kingdom of Great Britain and Northern Ireland and the United States of America on the Mutual Recognition of Certificates of Conformity for Marine Equipment

PRODUCT COVERAGE FOR MUTUAL RECOGNITION

General note:

The international conventions apply in their up-to-date version. For the purpose of identifying correctly the relevant standards, test reports, certificates of conformity and declarations of conformity shall identify the specific testing standard applied and its version.

Life-saving appliances

NAVIGATION EQUIPMENT

Notes applicable to this section:

1. Resolution A.1021(26) and Resolution MSC.302(87) shall be considered, as applicable, for all the navigation equipment - They refer to “Code on alerts and indicators, 2009,” and to “Adoption of performance standards for bridge alert management,” respectively.

2. **IEC 61162 series refer to the following reference standards for Maritime navigation and radio-communication equipment and systems - Digital interfaces:**

- IEC 61162- 1 (2016) - Part 1: Single talker and multiple listeners □
IEC 61162- 2 ed1.0 (1998- 09) - Part 2: Single talker and multiple listeners,
high- speed transmission
- IEC 61162- 3 ed1.2 Consol. with am1 ed. 1.0 (2010- 11) and am2 ed. 1.0 (2014- 07) - Part 3: Serial data instrument network
- **IEC 61162- 3 ed1.0 (2008- 05) - Part 3: Serial data instrument network**
- IEC 61162- 3- am1 ed1.0 (2010- 06) Amendment 1 - Part 3: Serial data instrument network
- **IEC 61162- 3- am2 ed1.0 (2014- 07) Amendment 2 - Part 3: Serial data instrument network**
- IEC 61162- 450 ed1.0 (2011- 06) with am1 (2016)- Part 450: Multiple talkers and multiple listeners - Ethernet interconnection
