**RE: Request for Information – RFI4237**

Thank you for your request for information which was processed in accordance with the Freedom of Information Act 2000 (FOIA).

You requested the following information:

*Could you please forward a copy of all the data passed to Homes England for the demolition of the Ceramtec Factory in Colyton from Autumn 2020 to early 2022 as logged by your contractor Hughes and Salvidge Demolition. Hughes and Salvidge have advised me that they passed all this data to you as part of their "completion of contract" procedure.*

*In particular I request a copy of all the data from all five sensor systems which Hughes and Salvidge Demolition installed to monitor the site during their work and which they describe as follows:*

1. Site monitor - close to gate
2. Site monitor - close to fence
3. Monitor in domestic property - "Gilpin"
4. Monitor in domestic property - "Mayfield"
5. Monitor in domestic property - "Waterloo"

**Response**

We can confirm that we do hold some of the requested information. Please find attached the Annexes listed below which contain a copy of the data passed to Homes England for the demolition of the Ceramtec Factory. However, please note we are unable to provide some of the raw data from the site monitors in the domestic properties (Gilpin and Waterloo). We can confirm that this data was not provided to Homes England as it was not a contractual requirement to do so. However, a copy of the data was provided to the residents by the demolition contractor.

- Annex A – Gate monitor raw data
- Annex B – Fence monitor raw data
- Annex C – all domestic property data

# Environmental Monitoring Report

## Introduction

The following Environmental Monitoring Report includes full details of:

- Framework;
- Monitor information;
- Noise evidence;
- Air Quality evidence;
- Vibration evidence.

## Framework

### Noise and Vibration

Due to the nature of demolition works, a temporary noise and vibration increases during this period is inevitable. Mitigation methods to reduce potential disturbance caused by demolition activities have been introduced via various control measures by Hughes and Salvidge. The adoption of Best Practicable Means, as defined in the Control of Pollution Act 1974 is the most effective means of controlling noise from construction sites. On and around site, noise levels are to be monitored in accordance with guidance set out in Annex E of BS5228: Part 1:1997 and will be displayed in decibels (dB); and vibration levels are monitored in millimetres per second (mm/s).

### Air Quality

Dust levels will increase during demolition; therefore, measures to suppress dust is required throughout to keep dust levels to a minimum. Particular care is required to maintain dust emissions at the site boundary adjacent to neighbouring properties. The use of Best Practicable Means (BPM) (as defined in part III of the Environmental Protection Act 1990) shall be employed. At the project site, Particulate Matter (PM) will be monitored at three levels: 10 microns, 2.5 microns and 1 micron and the readings are displayed in micrograms per metre cubed ( $\mu\text{g}/\text{m}^3$ ).

## Monitor information

This report is subject to the following monitors:

- Gate monitor;
- Fence monitor;
- **s. 40(2)** Cottage monitor;
- Gilpin Cottage monitor.

Gate and Fence monitor's commenced monitoring from 05<sup>th</sup> October 2020 and **s. 40(2)** Cottage and Gilpin Cottage monitors commenced monitoring from 16<sup>th</sup> November 2020. Gate and fence monitors record information on vibration, noise and air quality, while **s. 40(2)** cottage and Gilpin cottage monitors only record vibration.
