Part II. Certification

Animal Health

I, the undersigned official veterinarian, declare that I am aware of the relevant requirements of the GB regulations, and certify that the rendered fats described in Part I of this certificate consist of rendered fats not intended for human consumption and that satisfy the health requirements below:

AH/T504 Territory requirements

it comes from a country that satisfies the relevant GB animal health requirements for the species concerned:

(*) **EITHER** [in the case of material of porcine origin;]

(*) **AND/OR** [in the case of material of poultry origin;]

(*) **AND/OR** [in the case of material of ruminant origin;]

(*) **AND/OR** [where there has been an outbreak of one of the diseases referred to in this attestation during the relevant period referred to in the notes for completion and where the rendered fats derived from a susceptible species, have been subjected to a heat treatment for at least 70 °C for 30 minutes or at least 90 °C for at least 15 minutes, and details of the critical control

II.a. Certificate reference no.	II.b.
---------------------------------	-------

points are recorded and maintained so that the owner, operator or their representative and, as necessary, the competent authority can monitor the operation of the plant; information must include the particle size, critical temperature and, as appropriate, the absolute time, pressure profile, raw material feed rate and fat recycling rate;]

AH/E104 Establishment requirements

have been prepared and stored in a plant approved and supervised by the competent authority in accordance with GB regulations;

AH/P101D Product requirements (composition)

have been prepared exclusively with the following Category 3 materials as set out in the notes for completion: (*)[A] (*)[B] (*)[C] (*)[D] (*)[E] (*)[F] (*)[G] (*)[H] (*)[I] (*)[J];

AH/P510 Processing, packaging and labelling

the rendered fats:

(a) have been subjected to processing in accordance with the GB requirements; and

(*) **EITHER** [(b) are packaged in new containers or in containers that have been cleaned and disinfected if necessary for the prevention of contamination, and all precautions have been taken to prevent their contamination;]

(*) **OR** [(b) where bulk transport is intended, the pipe, pumps and bulk tanks and any other bulk container or bulk road tanker used in the transportation of the product from the manufacturing plant either directly on to the ship or into shore tanks or directly to plants have been checked under the responsibility of the competent authority and found to be clean before use;]

and which bear labels indicating 'NOT FOR HUMAN CONSUMPTION';

AH/D200A TSE (scrapie)

the animal by-products described above:

(*) **EITHER** [does not contain ovine or caprine milk or milk products or is not intended for feed for farmed animals, other than fur animals;]

(*) **OR** [contains ovine or caprine milk or milk products intended as feed for farmed animals, other than fur animals, and the milk or milk products:

(a) are derived from animals from countries which meet GB requirements in regards to scrapie controls;

(b) originate from holdings where no official restrictions are imposed due to a suspicion of TSE;

(c) originate from holdings where no case of classical scrapie has been diagnosed during the period of the preceding seven years or, following the confirmation of a case of classical scrapie:

(*) **EITHER** [all ovine and caprine animals on the holding have been killed and destroyed or slaughtered, except for animals which meet GB requirements;]

(*) **OR** [all animals in which classical scrapie was confirmed have been killed and destroyed, and the holding has been subjected to TSE monitoring which meets GB requirements;]

Public Health

PH/D011A Bovine spongiform encephalopathy (BSE)

the products described in Part I

(*) **EITHER** [come from other ruminants than bovine, ovine or caprine animals;]

Rendered fats for feed (RFF)
GBHC510

II.a. Certificate reference no.	II.b.
---------------------------------	-------

- (*) **OR** [come from bovine, ovine or caprine material:
- (*) **EITHER** [(a) derived from animals that were born, continuously reared and slaughtered in a country or region with a negligible BSE risk as set out in a document published on GOV.UK in accordance with GB regulations;]
- (*) **OR** [(b) that does not contain and is not derived from:
- (i) specified risk material and mechanically separated meat, in compliance with GB regulations;
 - (ii) animal by-product or derived product obtained from animals which have not been killed in compliance with GB regulations in regards laceration of certain tissues after stunning;]]

(*) Keep as appropriate.

Official Veterinarian / Official Inspector

By signing this certificate, I certify that the requirements laid out above and in the accompanying notes for completion have been met.

Name (in capital letters):

Qualification and title:

Date:

Stamp:

Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been retained in Great Britain (retained EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

Part I

- Box reference I.6: *Person responsible for the consignment in Great Britain*: this box is required to be filled in only if it is a certificate for a commodity to be transited through Great Britain; it may be filled in if the certificate is for a commodity that is to be imported into Great Britain.
- Box reference I.12: *Place of destination*: this box is to be filled in only if it is a certificate for a transit commodity. Products in transit may only be stored in free zones, free warehouses and custom warehouses.
- Box reference I.15: Registration number (railway wagons or container and lorries), flight number (aircraft) or name (ship) is to be provided. In the case of unloading and reloading, the consignor must inform the border control post of the point of entry into Great Britain.
- Box reference I.19: Use the appropriate HS code: 04.05; 15.01; 15.02; 15.03; 15.04; 15.05; 15.06; 15.16.10 or 15.18.
- Box reference I.23: For bulk containers, the container number and the seal number (if applicable) must be included.
- Box reference I.25: *Technical use*: any use other than feeding of farmed animals, other than fur animals, and the production or manufacturing of pet food.
- Box reference I.26 and I.27: Fill in according to whether it is a transit or an import certificate.
- Box reference I.28: *Species*: select from the following: *Ruminantia*, other than *Ruminantia*
Manufacturing plant: provide the registration number of the treatment/processing establishment

Part II

Animal Health

By signing this certificate, you, the official veterinarian, are certifying that you have read and understood Regulation (EC) No 1069/2009 and in particular Article 10 thereof, and Commission Regulation (EU) No 142/2011, and in particular Chapter II of Annex XIV thereto.

AH/T504 Territory requirements

GB animal health requirements - species specific:

- **Porcine origin**: come from a country or part of the territory of a country free from foot-and-mouth disease for the period of the preceding 24 months and free from classical swine fever and African swine fever for the period of the preceding 12 months.

Rendered fats for feed (RFF) GBHC510

- **Poultry origin:** come from a country or part of a territory of a country free from Newcastle disease and avian influenza for a period of the preceding 6 months.
- **Ruminant origin:** come from a country or part of a territory of a country free from foot-and-mouth disease for the period of the preceding 24 months and free from rinderpest for the period of the preceding 12 months.

If derived from ruminant animals, the rendered fats were purified in such way that the maximum levels of remaining total insoluble impurities does not exceed 0.15 % in weight.

AH/E104 Establishment requirements

GB Requirements

The plant where the products have been prepared and stored must have been approved and supervised by the competent authority in accordance with Article 24 of Regulation (EC) No 1069/2009 or in accordance with Article 4(2) of Regulation (EC) No 853/2004 of the European Parliament and of the Council, in order to kill pathogenic agents.

AH/P101D Product requirements (composition)

One or more options can be selected.

- A:** Carcasses and parts of animals slaughtered or, in the case of game, bodies or parts of animals killed which were deemed fit for human consumption in accordance with retained EU law until irreversibly declared as animal by-products for commercial reasons.
- B:** Carcasses and the following parts originating either from animals that were slaughtered in a slaughterhouse and were considered fit for slaughter for human consumption following an ante-mortem inspection or bodies and the following parts of animals from game killed for human consumption in accordance with retained EU law :
 - (i)** carcasses or bodies and parts of animals which were rejected as unfit for human consumption in accordance with retained EU law, but which did not show any signs of disease communicable to humans or animals;
 - (ii)** heads of poultry;
 - (iii)** hides and skins, including trimmings and splitting thereof, horns and feet, including the phalanges and the carpus and metacarpus bones, tarsus and metatarsus bones of animals, other than ruminants;
 - (iv)** pig bristles;
 - (v)** feathers.
- C:** Blood of animals which did not show any signs of disease communicable through blood to humans or animals, obtained from animals other than ruminants that have been slaughtered in a slaughterhouse after having been considered fit for slaughter for human consumption following an ante-mortem inspection in accordance with GB regulations.
- D:** Animal by-products arising from the production of products intended for human consumption, including degreased bone, greaves and centrifuge or separator sludge from milk processing.
- E:** Products of animal origin, or foodstuffs containing products of animal origin, which are no longer intended for human consumption for commercial reasons or due to problems of manufacturing or packaging defects or other defects from which no risk to public or animal health arises.
- F:** Petfood and feedingstuffs of animal origin, or feedingstuffs containing animal by-products or derived products, which are no longer intended for feeding for commercial reasons or due to problems of manufacturing or packaging defects or other defects from which no risk to public or animal health arises.
- G:** Blood, placenta, wool, feathers, hair, horns, hoof cuts and raw milk originating from live animals that did not show signs of any disease communicable through that product to humans or animals.

Rendered fats for feed (RFF) GBHC510

- H:** Aquatic animals, and parts of such animals, except sea mammals, which did not show any signs of diseases communicable to humans or animals.
- I:** Animal by-products from aquatic animals originating from establishments or plants manufacturing products for human consumption.
- J:** The following material originating from animals which did not show any signs of disease communicable through that material to humans or animals:
- (i)** shells from shellfish with soft tissue or flesh;
 - (ii)** the following originating from terrestrial animals:
 - hatchery by-products;
 - eggs;
 - egg by-products, including egg shells;
 - (iii)** day-old chicks killed for commercial reasons.

AH/P510 Processing, packaging and labelling

GB processing requirements set out in Section 3 of Chapter II of Annex X to Regulation (EU) No 142/2011, or a treatment in accordance with Section XII of Annex III to Regulation (EC) No 853/2004, in order to kill pathogenic agents.

AH/D200A TSE (scrapie)

Where the animal by-products described above contains milk or milk products of ovine or caprine animal origin and is intended for feed for farmed animals, other than fur animals, they must:

- (a)** be derived from ovine and caprine animals which were kept continuously since birth in a country where the following conditions are fulfilled:
 - (i)** classical scrapie is compulsorily notifiable;
 - (ii)** an awareness, surveillance and monitoring system is in place for classical scrapie;
 - (iii)** official restrictions apply to holdings of ovine or caprine animals in the case of a suspicion of TSE or the confirmation of classical scrapie;
 - (iv)** ovine and caprine animals affected with classical scrapie are killed and destroyed;
 - (v)** the feeding to ovine and caprine animals of meat-and-bone meal or greaves, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health (WOAH (formerly OIE)), of ruminant origin has been banned and effectively enforced in the whole country for a period of at least the preceding seven years.
- (b)** originate from holdings where no official restrictions are imposed due to a suspicion of TSE.
- (c)** originate from holdings where no case of classical scrapie has been diagnosed during the period of the preceding seven years or, following the confirmation of a case of classical scrapie:
 - EITHER** all ovine and caprine animals on the holding have been killed and destroyed or slaughtered, except for breeding rams of the ARR/ARR genotype, breeding ewes carrying at least one ARR allele and no VRQ allele and other ovine animals carrying at least one ARR allele;
 - OR** all animals in which classical scrapie was confirmed have been killed and destroyed, and the holding has been subjected for a period of at least two years since the date of confirmation of the last classical scrapie case to intensified TSE monitoring, including testing with negative results for the presence of TSE in accordance with the laboratory methods set out in point 3.2 of Chapter C of Annex X to Regulation (EC) No 999/2001, of all of the following animals which are over the age of 18 months, except ovine animals of the ARR/ARR genotype:
 - animals which have been slaughtered for human consumption; and

Rendered fats for feed (RFF)
GBHC510

- animals which have died or been killed on the holding but which were not killed in the framework of a disease eradication campaign.

Public Health

PH/D011A Bovine spongiform encephalopathy (BSE)

The products described in Part I of the certificate:

EITHER are derived from other ruminants than bovine, ovine or caprine animals.

OR are derived from bovine, ovine or caprine animals, and do not contain and are not derived from:

EITHER (a) bovine, ovine and caprine materials other than those derived from animals born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001^(‡);

OR (b) the following:

(i) specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001 of the European Parliament and of the Council and mechanically separated meat obtained from bones of bovine, ovine or caprine animals, except from those animals that were born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001^(‡), in which there have been no indigenous BSE cases.

(ii) animal by-product or derived product obtained from bovine, ovine or caprine animals which have been killed, after stunning, by laceration of the central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity, except for those animals that were born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001.^(‡)

^(‡) A document relating to the 'Bovine Spongiform Encephalopathy (BSE) risk status' of approved trading partners published by the Secretary of State, with the consent of the Scottish and Welsh Ministers, can be found at:
