Planning Inspectorate

By email: section62a@planninginspectorate.gov.uk

Dear Sir/Madam,

Re. Planning Application Consultation: S62A/2022/0014 – Land West of Thaxted Road, Saffron Walden

Proposal: Outline application for the erection of up to 170 dwellings with access from Thaxted Road with all other matters reserved

Thank you for consulting the Hertfordshire and West Essex Integrated Care Board (HWE ICB) on the above-mentioned planning application.

The HWE ICB became a statutory body on 1 July 2022 and is the health commissioner responsible for delivering joined up health and social health care to a population of c1.8m. in Hertfordshire and west Essex.

The HWE ICB works in partnership with health providers, local authorities, and other organisations to:

- improve the general health and wellbeing of Hertfordshire and west Essex residents and improve health care services in the area.
- tackle the inequalities which affect people's physical and mental health, such as their ability to get the health services they need, and the quality of those services help tackle health and wider inequalities.
- get the most out of local health and care services and make sure that they are good value for money.
- help the NHS support social and economic development in Hertfordshire and west Essex.

Dr Jane Halpin, Chief Executive

Rt. Hon. Paul Burstow, Chair

Assessment of impact on existing Healthcare Provision

The HWE ICB has assessed the impact of the proposed development on existing primary health care provision in and around the vicinity of Saffron Walden.

The proposed development would deliver 170 dwellings, which based on an average occupancy of 2.4 occupants per dwelling will create circa **408 new patient registrations**.

Within the HWE ICB there are 34 Primary Care Networks (PCNs) across the 14 localities; each covering a population of between circa 27,000 and 68,000 patients. These PCNs are expected to deliver services at scale for its registered population whilst working collaboratively with acute, community, voluntary and social care services in order to ensure an integrated approach to patient care. As such a doctors' general practitioners' surgery may include an ancillary pharmacy and ancillary facilities for treatments provided by general practitioners, nurses and other healthcare professionals. The PCN that covers Saffron Walden (North Uttlesford PCN) and under which this development falls has a combined patient registration **list of 41,847**, which is growing.

Patients are at liberty to choose which GP practice to register with providing they live within the practice boundary. However, the majority of patients choose to register with the surgery closest and/or most easily accessible to their home for the following reasons: it is the quickest journey, accessible by public transport or is in walking distance), parking provision, especially for families with young children and for older adults.

Despite premises constraints GP Practices are not allowed to close their lists to new registrations without consultation with, and permission from the HWE ICB. Even when surgeries are significantly constrained the NHS will seek to avoid a situation where a patient is denied access to their nearest GP surgery, with patient lists only closed in exceptional circumstances.

As a result of significant growth proposed in Local Plans, the HWE ICB expects applications to close lists to increase. It is therefore important that new developments make a financial contribution to mitigate any primary health care impacts the development will have.

Healthcare Needs Arising from the Proposed Development

Development at Land West of Thaxted Road, Saffron Walden will have an impact on primary health care provision in the area, and its implications, if unmitigated, would be unsustainable for the NHS.

The financial contribution for health infrastructure that the HWE ICB is seeking, to mitigate the primary health care impacts from this development, has been calculated using a formula based on the number of units proposed and does not take into account any existing deficiencies or shortfalls in Saffron Walden and its vicinity, or other development proposals in the area.

Cost calculation of additional primary healthcare services arising from the development proposal

408 new patient registrations/2000 = 0.204 of a GP *GP based on ratio of 2,000 patients per 1 GP and 199m² as set out in the NHS England “Premises Principles of Best Practice Part 1 Procurement & Development”

0.204 x 199 m² = 40.59 m² of additional space required

40.59 m² x £5,410* per m² = £219,591.90 (*Build cost; includes fit out and fees)
£219,591.90/ 170 dwellings = £1,292.00 per dwelling (rounded up)

Total GMS monies requested: 170 dwellings x £1,292.00 = £219,640

The HWE ICB therefore requests that this sum is secured through a planning obligation attached to any grant of planning permission, in the form of a Section 106 planning obligation. A trigger point of payment on occupancy of the 1st Dwelling & 100th Dwelling is also requested.

Please note, the developer contribution figure referred to in this response is a calculation only and that the final payment will be based on the actual dwelling unit mix and the inclusion of indexation.

If planning permission is granted, the HWE ICB propose to focus Section 106 monies on Gold Street Surgery and Crocus Medical Practice in Saffron Walden.

Gold Street Surgery has an identified need for additional space and for compliant premises. The current surgery premises cannot facilitate new patients arising from new developments in Saffron Walden, with the age, condition and tenure of the existing premises a further constraint.

Following ‘joined up’ working with the Uttlesford District Council, a significant footprint of underutilised space has been found at the District Council Offices located close to the existing Gold Street Surgery.

Relocating Gold Street Surgery will change the patient’s journey in visiting the surgery and will involve the patient not only having their health needs cared for, but also the potential for social prescribing, housing, citizen’s advice, etc, with many more partner organisations able to support patients/residents in leading healthier lifestyles.

The Council and the Gold Street GP partners have worked together with the HWE ICB premises team to produce a feasibility business case for the Gold Street Surgery to relocate to this underutilised space. A full business case is now being drawn up, which will require approval by the HWE ICB and NHS England.

Dr Jane Halpin, Chief Executive

Rt. Hon. Paul Burstow, Chair

With regard to the Crocus Medical Practice, the HWE ICB has explored re-configuring, extending or relocating the GP premises to provide sufficient space to increase resources and clinical services and thus keep the patient lists open. As a result, in 2021 the practice relocated into the Saffron Walden Community Hospital to provide better premise but also allow to cater for the future growth of the Saffron Walden area. These works were paid for by the NHS using capital monies, therefore section 106 monies should be to offset that previous expenditure.

In conclusion, in its capacity as the primary healthcare commissioner with full delegation from NHS England, the HWE ICB has identified a need for additional primary healthcare provision to mitigate the impacts arising from the proposed development. The cost calculation, set out above are those that the HWE ICB and NHS England deem appropriate having regard to the formulated needs arising from the development.

The HWE ICB is satisfied that the basis and value of the developer contribution sought is consistent with the policy and tests for imposing planning obligations, as set out in the NPPF. Further, NHS England and the HWE ICB reserve the right to apply for S106 money retrospectively and the right to amend and request that this be reflected in any S106 agreement.

Subject to certainty that primary healthcare will form part of the development, with developer contributions secured, as set out above, the HWE ICB does not raise an objection to the proposed development.

The HWE ICB looks forward to working with the Council and applicant to satisfactorily address the issues raised in this consultation response and would appreciate acknowledgement of receipt of this letter.

Yours faithfully,

Sue Fogden MRICS LLB (Hons)
Assistant Director – Premises
NHS Hertfordshire & West Essex ICB

CC. Mr Lindsay Trevillian, Principal Planning Officer, Uttlesford District Council
