### Introduction

This statistical release contains Official Statistics on the government's Help to Buy: ISA scheme, covering the number and value of bonuses paid, property completions by value, and breakdowns by age and geographical area. Excel tables with all the data set out in this release are available at:

www.gov.uk/government/collections/official-statistics-on-the-help-to-buy-isa-scheme

The quarterly release of the Official Statistics for the 2021 mortgage guarantee scheme can be found at:

www.gov.uk/government/collections/official-statistics-on-the-mortgage-guarantee-scheme

The quarterly release of the Official Statistics for the Help to Buy: Equity Loan scheme can be found at:

### Help to Buy: ISA

The Help to Buy: ISA scheme was launched on 1 December 2015 with accounts available through banks, building societies and credit unions. The scheme enables people saving for their first home to receive a 25% boost to their savings from the government when they buy a property of £250,000 or less (with a higher price limit of £450,000 in London). This means that for every £200 saved, first-time buyers can receive a government bonus of £50. The maximum government bonus is £3,000.

The scheme closed to new accounts on 30 November 2019. Help to Buy: ISA holders can, however, continue saving into their account until 30 November 2029 when accounts will close to additional contributions. The Help to Buy: ISA government bonus must be claimed by 1 December 2030.

### **Monthly figures**

Table 1 below shows the number of Help to Buy: ISA bonuses paid through the scheme (the detailed breakdown of the earlier data is shown on page 10) alongside the number of property completions <sup>1,2</sup>, the total value of bonuses paid and the total value of the properties purchased. There were 714,878 bonuses paid through the scheme to the end of December 2022, which supported 547,187 property completions. The total value of the bonuses paid in this period was £860.43 million which were used to finance properties worth £97 billion in total.

<sup>1</sup> Total property completions include property purchases where confirmation of completion is still being awaited from the acting solicitor or conveyancer.

<sup>2</sup> Total property completions is lower than the total bonuses paid as multiple bonuses can be used for a single property, e.g., a couple each with a Help to Buy: ISA buying a property together.

### **Property value**

Table 2 and Chart 1 below show the number of property completions supported by the scheme broken down by property value. The mean value of a property completion supported by the Help to Buy: ISA scheme to the end of December 2022 was £177,217, compared to the average first-time buyer price of £245,958 and the average UK house price of £294,329.<sup>3</sup> 69% of completions were in the lower value bands of £200,000 or less.

### Age breakdown

Table 3 and Chart 2 below show the number of bonuses paid broken down by the age of the first-time buyer.

65% of first-time buyers who have been supported by the scheme were between the ages of 25 to 34. The median age of a first-time buyer in the scheme is 28 compared to a median first-time buyer age across the market of 30 in the same period.<sup>4</sup>

<sup>5</sup> To account for multiple bonuses used for a single property, property completions by age band are allocated by splitting the property in two and calculating the average age of buyers.

### **Country and regional breakdowns**

Table 4 below shows the country and regional distribution of the number of bonuses paid and property completions through the scheme in each region of England<sup>6</sup>, as well as in the devolved administrations. It also shows the country and regional breakdown of the mean property values.

73% of bonuses paid were in England and this supported approximately 72% of total property completions through the scheme. At a regional level, property completions are distributed fairly evenly across England. London and the South East accounted for 14% of total bonuses paid and made up 14% of total property completions. A higher number of property completions were supported by the scheme in the North West and Yorkshire and The Humber, while there has been a proportionally lower number of completions supported by the scheme in the North East of England, Northern Ireland and Wales.

### Local authority breakdown

Map 1 below shows the value of bonuses paid through the Help to Buy: ISA scheme by local authority from 1 December 2015 to 31 December 2022.

Accompanying tables are available to download alongside this release:

- Table 5: Breakdown by local authority, England, Scotland, Wales and Northern Ireland.
- Table 6: Breakdown by postcode district, England, Scotland, Wales and Northern Ireland.
- Table 7: Breakdown by constituency, England, Scotland, Wales and Northern Ireland.

Map 1: Number of bonuses paid through the Help to Buy: ISA from 1 December 2015 to 31 December 2022, by local authority, UK.<sup>8</sup>

<sup>8</sup> Where the number of bonuses paid falls on the boundary between two bands, it is allocated to the lower band, e.g. where 500 bonuses have been paid, this figure will be included in the 0-500 band.

### **Background notes**

#### **Data collection**

National Savings and Investments (NS&I), who administer the scheme on behalf of HM Treasury, collect data from providers participating in the scheme in accordance with monitoring and reporting requirements set by HM Treasury.

#### **Data quality**

Both NS&I and HM Treasury quality assure the data, using IT solutions and manual processes.

#### Audit and financial reporting

The scheme requires a rigorous audit regime to monitor and enforce compliance with the eligibility criteria and scheme rules. Providers are required to conduct internal audits, in addition to administrator audits carried out by NS&I to seek assurance as to the provider's compliance with the scheme rules.

#### Mean and median

The following explanation uses property value as an example, but the median and mean are used in the same way throughout the publication. The median property value is the midway point of all the properties values included in the analysis. That is, if there were 101 property completions during a time period and they were ranked by value, the median property value would be the value in the middle i.e., that has 50 house prices above it and 50 house prices below it.

This differs to the arithmetic mean value, which equates to the average price – adding the property values together and then dividing this by the number of completions included in the analysis.

It can be useful to look at both the mean and median with property values. Extreme values at either end of the scale can skew the mean. Therefore, the median can give users an additional way of interpreting the data.

#### **Revisions policy**

This policy has been developed in accordance with the UK Statistics Authority Code of Practice for Official Statistics and the Treasury Revisions policy:

www.gov.uk/government/uploads/system/uploads/attachment\_data/file/191042/statistics\_revisions\_policy.pdf

There are two types of revision covered by the policy above, unscheduled revisions and scheduled revisions.

In line with the policy above, if a significant unscheduled revision is needed (for example from an error in the result of the compilation, imputation or dissemination process), the statistical release and accompanying tables would be updated with a correction notice as soon as is practical.

There should be relatively few scheduled revisions as the data is compiled from established administrative systems. Where there are scheduled revisions these will be indicated in the time series and highlighted in the release.

#### Users of the data

The data is used for monitoring the delivery of the Help to Buy: ISA scheme by users including the public, Parliament, financial and housing companies and markets. They are also used to inform wider government policy on housing.

#### **Data sources**

The publications of this scheme use the official UK House Price Index (UK HPI) which replaces the existing, and previously used, house price indices published by the Office for National Statistics (ONS) and Land Registry for England and Wales.

An explanation of the change in House Price Index by the ONS is published here:

 $\underline{www.ons.gov.uk/economy/inflation and price indices/articles/introducing the single of ficial house price index/2016-03-30 and the single of ficial house$ 

#### User engagement

Users are encouraged to provide feedback on how these statistics are used and how well they meet user needs. Comments on any issues relating to this statistical release are welcomed and encouraged. Responses should be addressed to the "Public enquiries" contact given in the "Enquiries" section below.

The department's engagement strategy to meet the needs of statistics users is published here:

<sup>9</sup> Total property completions include property purchases where confirmation of completion is still being awaited from the acting solicitor or conveyancer.

10 Total property completions are lower than the total bonuses paid as multiple bonuses can be used for a single property, i.e. a couple each with a Help to Buy: ISA buying a property together.
