

We use property technology products to make better-informed, strategic decisions about how we manage, maintain and evolve our buildings:

Upgraded more than 120 meeting and conferencing facilities with interoperable technology to enable hybrid working

Rolled GovPass out to 25 properties and 30,648 people and the velocity of deployment continues to increase

Introduced GovPrint to 700 users and have a pipeline in place to introduce GovPrint to other departments

Increased the number of buildings reporting occupancy data to 100 and continue to engage with Government departments to improve further

Continuing to transform our corporate systems and data to support our growth

Data-driven, people-led decisions
Creating great places to work
