

## Miss Eleanor Cox

I strongly oppose to this application for a number of reasons.

- 1) Noise and pollution - the disruption and damage to local residents, wildlife and the environment within the area.
- 2) Traffic volume – an increase to the already existing problems through our village and the existing roads around the proposed site would be a complete disaster.

I regularly walk through the village for exercise and fresh air and I have found this becoming increasingly dangerous with the increase from all the new residential sites in and around Bishops Stortford. Also, the increase in the way we shop and live etc has led to more delivery vehicles on the roads. Very rarely do vehicles adhere to the speed limit, this will only get worse if this proposal is allowed to go ahead. Whilst out on my walks, I have noticed that larger vehicles and farm vehicles can't pass each other on the roads - the road is simply not wide enough for the larger vehicles so they mount what little footpaths are provided in our village. The increase in traffic has also had an effect on the road conditions, the amount of pot holes has multiplied drastically.

It is evident that this is purely a relocation from Wren Kitchens who will undoubtedly move with the same work personnel. I fail to see how jobs will be created for the local community. There surely must be an alternative, suitable site to accommodate this operation.

This from a company who portray themselves as 'green' having decimated a beautiful piece of land with established trees and what was a haven to much wildlife in recent years.

As a twenty year old who has always lived in the village we talk about more so in recent times of looking after our environment. This is my future and I love living here. Please don't allow this to go ahead. It will just exacerbate problems that already exist.

I am all for change for the RIGHT reasons but I can see NO benefits other than a geographical one for Wren Kitchens operational needs.
