Subject: Wren kitchens

To whom it may concern

I am writing to object to the planning application to the land at start hill great hallingbury to be used as a logistics depot for wren kitchens This land has always been a area for a diverse species of plants and animals and now is in danger of being destroyed, we are losing to much ancient lands which animals and plants have lived very happily Land like this is also carbon positive helping to remove pollutants from aircraft which flies over it constantly.

I think that the residents of great hallingbury has been subjected to environmental issues caused by the airport now we are going to be forced to be subjected to excessive amounts of light pollution and heavy vehicles using the small country road, which has already speeding vehicles and copious amounts of pot holes.

I feel it would be irresponsible, for any planning/governmental authority to grant any permission for building on this beautiful piece of land and destroy habitat for rare animals and plants, and destroying more of our green belt countryside What I cannot understand is that stansted airport has many areas to be re-developed for industrial purposes, would it make more sense to build a logistic centre there keeping industrial areas and green spaces separate to protect the fragile ecosystem So I fully object to any plans for this application

Regards
