Subject: S62A/2023/0017

Dear Sir/Madam

Re: Land Tilekiln Green, Great Hallingbury.

I would like to put forward my objections to the above proposal as I feel that there has already been a large amount of damage done to the local wildlife and any further development would totally destroy what remains.

This proposal should not be considered as it started prior to any biodiversity study being undertaken meaning any pre-existing natural habitat has not been considered and therefore should be given time to fully regenerate before any further consideration is given.

Please send a message to these companies that they can't destroy local wildlife and start work without seeking any prior permission.

Regards

Mrs Maxine Galert
