**Notes**

Before 2023, Tables 3 to 5 were called "Tables 5 to 7".

Does not include corrections to tax returns after publication or tax returns submitted after that date (the deadline is 31 January after the end of the tax year). Components may not sum to totals due to rounding.

"All Self Assessment individuals" means those who sent a Self Assessment tax return to HMRC for that tax year, including those with no tax liability or no income. Direct comparison with other Personal Tax statistics published by HMRC may not be straightforward due to different treatment of corrections and late returns. This means that it will include some individuals who did not benefit from the tax reliefs available under these provisions e.g. due to nil or insufficient taxable income or capital gains, or due to other reliefs reducing their liability.

"as a proportion of all taxpayers" means, for each row, the number of Self Assessment individuals in that category who declared a donation (whether Gift Aid, shares, securities, land, buildings or any combination), divided by "All Self Assessment individuals" in that category.

Direct comparison with other Personal Tax statistics published by HMRC may not be straightforward due to different treatment of corrections and late returns.

The values declared may not always constitute a donor's total donations for the appropriate tax year as individuals might only enter donations on which they claim a tax relief, for example Gift Aid.

It is not possible to use the value of Gift Aid donations to work out the value of higher rate relief as reported in Table 1. This is because this table includes donations that did not benefit from the Gift Aid higher rate relief (i.e. non-taxpayers or basic rate taxpayers). This table reports only donations declared via Self Assessment and excludes Gift Aid higher rate relief claimed by individuals who ask HMRC to adjust their Pay As You Earn tax code to claim the relief. Calculations of donations as a proportion of income exclude individuals with nil income or where the ratio of donation to income was over 100%.
