## Introduction and purpose of the document

1. This document provides technical information about how we process information provided in the Individualised Learner Record (ILR) data collection to produce the qualification achievement rates (QAR) dataset.
2. This dataset produces the education and training 2021 to 2022 QAR products. This document also provides information about how we generate the information in the QAR dashboard.
3. Please read this document alongside the [ILR standard file specifications and reference data documents](#) and the relevant QAR business rules, technical specifications, National Achievement Rate tables and guidance on links available from the [QAR collections page](#).

## Understanding the terminology

4. The term 'we' refers to the 'Department for Education' (DfE) or Education and Skills Funding Agency' (ESFA), an executive agency sponsored by the Department for Education (DfE) and associated staff.
5. When we refer to 'you' or 'providers', this includes colleges, training organisations, local authorities and employers that report provision in the ILR funded through:
  - the Adult Education Budget (or previously called the Adult Skills Budget as we use data from the last 5 years). This includes devolved delivery. Both devolved and non-devolved delivery are recorded in the ILR under Funding model 35 ('Adult Skills')
  - Advanced Learner Loans recorded in the ILR under Funding model 99 ('Non-funded') using the Learning Delivery Funding and Monitoring Code 'ADL'
  - 16 to 19 recorded in the ILR under Funding model 25 ('16 to 19 (excluding Apprenticeships and 16-18 learner programmes funded through school or academy funding model)')

## Changes since the publication of 2021 to 2022 version 1.0 in May 2022

- P\_Complete\_Overall to Overall\_Completer

4. SWSupAimID changed to Software\_Supplier\_Aim\_ID

## Changes from the 2020 to 2021 technical specification document

6. In 2020 to 2021, qualifications were identified as subject to normal assessment or alternative alternative/Teacher Assessed Grade (TAG) arrangements. Where qualifications were subject to alternative assessment/TAG arrangements these were out of scope for QAR. This will not apply in 2021 to 2022 and the expectation is all qualifications have returned to normal assessment arrangements and therefore in scope for QAR.

## Education and training QAR methodology

7. We base the overall QAR on the hybrid end year, which is the later of:

- the actual end year of a learning aim
- the planned end year of a learning aim
- the reporting year

We include the reporting year to capture those overdue continuing learning aims, overdue planned breaks or late completions recorded in the following academic year (up to R04). See later section [Calculating the hybrid end year](#) for further details on how we calculate the hybrid end year.

8. The learning aims included in the 2021 to 2022 overall QAR are those with a hybrid end year of 2021 to 2022.

9. There can be a delay between completing a learning aim and the notification of the achievement. To account for this delay and ensure all relevant leavers are included, we use information from the 2022 to 2023 R04 ILR to identify learning aims with a planned end date in 2021 to 2022. If you update records in your 2022 to 2023 R04 return that you submitted in your 2021 to 2022 R14 return, then we will use the R04 record to determine your QAR.

## Exclusions from education and training QARs

10. The business rules available from the [QAR collections page](#) describe how we calculate the QARs and which learning aims will not be included in the QAR calculations.

11. We exclude some learning aims from QARs to ensure the results are more credible and appropriate. The reasons include (and this is not an exhaustive list):

- if it is part of a new programme of learning, such as a new pilot, that providers need time to get used to delivering
- if we do not fund the aim, or is not financed by an advanced learner loan
- if the aim not a qualification
- if it is affected by circumstances where we have agreed an exception (for example, if the learner is transferred to a new provider due to intervention from us)

12. The table below describes the scenarios where we exclude learning aims. The definition of the derived variables below are in the [ILR standard file specifications and reference data documents](#).

# Processing standard files

## Process flow diagram

13. This flow diagram below shows how we process ILR information for multiple funding years to produce the QARs dataset, which is the source of the information used for the QAR dashboard.

## Identifying education and training aims

14. The method for choosing learning aims are:

- the **Aim Type** is not 1 (Programme aim) and
- the **Programme Type** is not 2, 3, 10, 20, 21, 22, 23, 24 or 25  
(Advanced level apprenticeship, Intermediate Level Apprenticeship, Higher Apprenticeship, Higher Apprenticeship – level 4, Higher Apprenticeship – level 5, Higher Apprenticeship – level 6, Higher Apprenticeship – level 7+, Traineeship, Apprenticeship standard respectively)

## Processing learner reference number changes

15. Providers assign the Learner reference number and we use this number to match aims across years.

16. If, for any reason, a learner's Learner reference number changes, either within a funding year or between years, then you must record this using the Learner reference number in previous year field.

17. We use the information in the Learner reference number in the previous year field to change the Learner reference numbers for previous years to the latest Learner reference number. We keep the original Learner reference number in the QAR dataset in the LearnRefNumber\_orig field.

18. If you do not return the Learner reference number in previous year field when there has been a change, then the process of matching aims does not work correctly. This creates 2 records in the QAR dataset for the same aim: one using the old Learner reference number and one using the new Learner reference number. Where the aim from the earlier year's ILR file does not have any achievement data, this will reduce your QAR.

19. If you use the Learner reference number in previous year field when there **has not** been a change in the learner's Learner reference number, then this will prevent us from correctly matching that learner's aims.

20. You **must** remove the data from this field between years, as detailed in the [ILR specification](#), otherwise the learners will not match correctly.

**Example:**

Learner A has a Learner reference number of 'LNA1234' in 2018 to 2019. Due to a change in the provider's management information system, Learner A has a new Learner reference number in 2020 to 2021 of 'LRA9876'. For the QAR to match correctly, you must record the references as follows:

- In 2019 to 2020:
  - Learner reference number = LNA1234
  - Learner reference number in previous year is not returned
- In 2020 to 2021:
  - Learner reference number = LRA9876
  - Learner reference number in previous year = LNA1234
- In 2021 to 2022:
  - Learner reference number = LRA9876
  - Learner reference number in previous year is not returned (2020/21 QAR cannot match if reported in R04)

## Matching learning aims across years

21. Many learning aims take more than one year to complete, meaning that the same learning aims for a learner can appear on more than one ILR file.

22. We use various combinations of variables to ensure we match the correct records across years. We match the UKPRN, Learner reference number, and Aim reference together with the following combinations, in the following sequence.

- Learning start date, Learning planned end date, Learning actual end date
- Learning start date, Learning planned end date
- Learning start date, Expected end year (Expected\_End\_Year), Learning actual end date
- Learning start date, Expected end year

23. Once we have matched learning aim records, we discard those from previous years, leaving just the latest information for each learning aim in the QAR dataset.

## Identifying overdue continuing aims and planned breaks

24. Continuing learning aims (with a Completion status of 1 'The learner is continuing or intending to continue the learning activities leading to the learning aim') in the R14 ILR return for a funding year, that do not have a corresponding record in the following funding year, are treated as a withdrawal for the overall methodology.

For example, if the year you submitted the record on the ILR is '2020/2021' and there is no corresponding record in 2021 to 2022 R14 ILR return:

- the hybrid end year (Hybrid\_End\_Year) is set to 2021; and
- Overall\_Leaver is set to 1; and
- Overall\_Achiever is set to 0

If you subsequently return the record in the ILR in any of the years after, we will exclude it from your QAR so that the same record is not counted against QARs in two different years.

25. Aims where the learner is on a planned break (with a Completion status of 6 'Learner has temporarily withdrawn from the aim due to an agreed break in learning'), are treated as a withdrawal for the overall methodology where either of these apply:

- they do not have a corresponding restart record in the same funding year
- they do not have a corresponding restart record in the following funding year
- if the planned break was recorded in the ILR R14 return for funding year 2020 to 2021, they do not have a corresponding restart record by the R04 ILR return of the funding year 2022 to 2023.

26. An ILR record is a restart record if it has a Learning Delivery Funding and Monitoring Type of 'RES' with a Learning Delivery Funding and Monitoring Code of 1 (Learning aim restarted).

27. We match restart records to planned break records by matching on UKPRN, Learner reference number and Learning aim reference where the Original learning start date on the restart record matches the Learning start date or Original learning start date of the planned break record; this allows for situations where the planned break was itself a restart.

28. For example, an aim where the learner is on a planned break, that is submitted in the 2019 to 2020 ILR (YearAimSubmitted is '2019/20'), **has** a corresponding restart record if:

- the UKPRN, Learner reference number and Learning aim reference number on the planned break record is the same as the UKPRN, Learner reference number and Learning aim reference number on a restart record; and
- either the Learning start date or the Original learning start date on the planned break record is the same as the Original learning start date on the restart record; and
- the restart record was submitted in the 2019 to 2020, 2020 to 2021 or 2021 to 2022 ILR (YearAimSubmitted is '2019/20', '2020/21' or '2021/22')

29. If an aim where the learner is on a planned break that is submitted in the 2019 to 2020 ILR (YearAimSubmitted is '2019/20'), **does not have** a corresponding restart record:

- the reporting year is set to one year after the later of the expected end year or actual end year; and
- Overall\_Leaver is set to 1; and
- Overall\_Achiever is set to 0

30. An aim where the learner is on a planned break, that is submitted in the 2020 to 2021 ILR (YearAimSubmitted is '2020/21'), **has** a corresponding restart record if:

- the UKPRN, Learner reference number and Learning aim reference number on the planned break record is the same as the UKPRN, Learner reference number and Learning aim reference number on a restart record; and
- either the Learning start date or the Original learning start date on the planned break record is the same as the Original learning start date on the restart record; and
- the restart record was submitted in the 2020 to 2021 or 2021 to 2022 ILR, or the 2022 to 2023 R04 ILR (YearAimSubmitted is '2020/21', '2021/22' or '2022/23')

31. If an aim where the learner is on a planned break that is submitted in the 2020 to 2021 ILR (YearAimSubmitted is '2020/21'), **does not have** a corresponding restart record:

- the reporting year is set to one year after the later of the expected end year or actual end year; and
- Overall\_Leaver is set to 1; and
- Overall\_Achiever is set to 0

## Key principles for QAR, pass rate and retention rate calculations

32. The key principles of calculating QARs, pass rate and retention rates are as follows:

- we only include learning aims funded by us or by an advanced learner loan
- we exclude the aims described in the earlier section [Exclusions from education and training QARs](#)
- we class uncashed AS levels as non-achievement

## Overall qualification achievement, pass and retention rate calculations

33. We use the following fields from the QAR dataset to calculate overall QARs, pass rates and retention rates:

- Hybrid end year (Hybrid\_End\_Year) - This field is the later of the actual learning end year (Actual\_End\_Year), expected learning end year (Expected\_End\_Year), or the reporting year
- Overall\_Leaver - This field indicates whether a learning aim has ended (a Learning actual end date is present), or it is an overdue continuing learning aim or an overdue continuing planned break
- Overall\_Achiever - This field indicates whether a learning aim has been achieved (achieved learning aims have an Outcome of 1 or 7 (Achieved or Achieved and cashed (AS levels only))
- Overall\_Completer - This field indicates whether a learning aim has been successfully completed (successfully completed learning aims have a Completion status of 2 (The learner has completed the learning activities leading to the learning aim))

34. For each funding year the overall QAR percentage is:

$$\frac{\text{Number of learning aims that have achieved}}{\text{Number of learning aims that have ended}} \times 100$$

35. For each hybrid end year (Hybrid\_End\_Year) the overall QAR percentage is:

$$\frac{\text{Number of learning aims where Overall_Achiever is 1}}{\text{Number of learning aims where Overall_Leaver is 1}} \times 100$$

36. For each funding year, the overall pass rate percentage is:

$$\frac{\text{Number of learning aims that have achieved}}{\text{Number of learning aims that have been successfully completed}} \times 100$$

37. For each hybrid end year (Hybrid\_End\_Year), the overall pass rate percentage is:

$$\frac{\text{Number of learning aims where Overall_Achiever is 1}}{\text{Number of learning aims where Overall_Completer is 1}} \times 100$$

38. For each funding year, the overall retention rate percentage is:

$$\frac{\text{Number of learning aims that have successfully completed}}{\text{Number of learning aims that have ended}} \times 100$$

39. For each hybrid end year (Hybrid\_End\_Year), the overall retention rate percentage is:

$$\frac{\text{Number of learning aims where Overall_Completer is 1}}{\text{Number of learning aims where Overall_Leaver is 1}} \times 100$$

## Calculating the Qualification\_Type field in the QAR dataset

43. We derive Qualification\_Type from the LearnAimRef, LearnAimRefType, BasicSkillsType, MapCode, RegulatedCreditValue, and CreditBasedFwkType fields held on the LARS data file.

44. The Qualification\_Type derivation of 'Award', 'Certificate' and 'Diploma' include qualifications of equivalent size based on **RegulatedCreditValue** as detailed below.

45. For aims where **CreditBasedFwkType** is 1, 2 or 3 and **RegulatedCreditValue** is not zero, **Qualification\_Type** is set as follows:

- set to 'Basic Skills Maths and English' if **BasicSkillsType** is 29 or 30
- set to 'GCSE Maths and English' if **BasicSkillsType** is 33 or 34
- set to 'ESOL' if **BasicSkillsType** is 36, 37, 38, 39, 40, 41 or 42
- set to 'QCF unit' if **LearnAimRefType** is 1448 (QCF Unit) and **BasicSkillsType** is not 29, 30, 33, 34, 36, 37, 38, 39, 40, 41 or 42
- set to 'Award' if **RegulatedCreditValue** is 1 to 12, **LearnAimRefType** is not 1448 and **BasicSkillsType** is not 29, 30, 33, 34, 36, 37, 38, 39, 40, 41 or 42
- set to 'Certificate' if **RegulatedCreditValue** is 13 to 36, **LearnAimRefType** is not 1448 and **BasicSkillsType** is not 29, 30, 33, 34, 36, 37, 38, 39, 40, 41 or 42
- set to 'Diploma' if **RegulatedCreditValue** is 37 or more, **LearnAimRefType** is not 1448 and **BasicSkillsType** is not 29, 30, 33, 34, 36, 37, 38, 39, 40, 41 or 42

46. For aims where **CreditBasedFwkType**:

- is -1 or -2; or
- is 1, 2 or 3 and the **RegulatedCreditValue** is less than 1, 0 or blank; or
- has no value

Qualification\_Type is set as follows:

- set to 'Access to HE' if **LearnAimRefType** is 1440 or 1460

48. For any learning aim not classified using the rules above, set to 'Other Non-Reg'.

## Calculating the hybrid end year

49. To understand the logic that hybrid end year uses, it is important to highlight the key QAR derived variables that we use to calculate the hybrid end year, and then how we use these in the calculation. The following examples relate to the 2021 to 2022 QAR data set and we refer to this as the current QAR.

50. The key derived variables are:

- Actual End Year – this is the same as Actual\_End\_Year
- Planned End Year – this is the same as Expected\_End\_Year
- Reporting Year – this refers to the academic year you submitted the learning aim to us. If the academic year is after the current QAR year, then we set this variable to 2021.5 (for example, if you report the learning aim in 2022 to 2023)
- Overdue Continuing Aim – this is the same as Overdue\_Continuing\_Aim
- Overdue Planned Break – this is the same as Overdue\_Planned\_Break
- Year First Reported Completed – this refers to the academic year you first reported the record with a Completion status of code 2 ('Complete') or 3 ('Withdrawn'). If the academic year you first reported the record with a Completion status of code 2 or 3 is after the current QAR year, then we set this variable to 2021.5 (for example, if you report the learning aim in 2022 to 2023)

51. We then implement 2 steps to calculate the hybrid end year:

### Step 1

52. We assign all records an initial value in step 1, based on the Actual End Year (Actual\_End\_Year) and Planned End Year (Expected\_End\_Year) derived variables. The table below explains the conditions we use to set the values. If the data does not meet the first condition, then we apply the second condition. If the data does not meet the second condition, then we apply the third condition.

Condition	Outcome	Example
If the actual end year is unpopulated...	...we set hybrid end year to 2021.5.	
If the planned end year is greater than or equal to the actual end year...	...we set hybrid end year to equal the planned end year.	The planned end date is 31/08/2021. The actual end date is 30/05/2021.  The planned end year is 2021. The actual end year is 2020.  2021 is greater than 2020, so the hybrid end year is set to 2021.
Else...	...we set hybrid end year to equal the actual end year.	

## Step 2

53. We use the output from step 1 for step 2, when we account for the other derived variables.

Condition	Outcome	Example
If the record is marked as an overdue continuing aim...	...we set the hybrid end year to the maximum value recorded in the actual end year, planned end year and reporting year derived variables.	The record is marked as an overdue continuing aim, the reporting year is 2019, the actual end year is unpopulated and the planned the planned end year is 2021.  The hybrid end year is set to 2021.
If the record is marked as an overdue planned break and the hybrid end year from step 1 is after the current QAR year...	...we set the hybrid end year to 2021.5.	
If the record is marked as an overdue planned break and the hybrid end year from step 1 is <b>not</b> after the current QAR year...	...we set the hybrid end year to the hybrid end year from step 1 plus one year.	The record is marked as an overdue planned break, the planned end year is 2020 and the actual end year is 2019.  The hybrid end year from step 1 is 2020, the hybrid end year in step 2 is set to 2020 plus one year, so the hybrid end year is set to 2021.
If the year first reported completed is after the hybrid end year from step 1...	...we set the hybrid end year to equal the first year reported complete.	The planned end year is 2020, the actual end year is 2019, the year first reported complete is 2021.  The hybrid end year from step 1 is 2020, the year first reported complete is after this, so the hybrid end year is set to 2021.
Else...	...hybrid end year is set to the value from step 1.	

## Further examples

54. The following table gives some more examples using the steps given above.

<b>Key criteria</b>	<b>Hybrid end year and explanation</b>
<ul style="list-style-type: none"> <li>Planned end date = 20/05/22</li> <li>Actual end date (AED) = 20/05/21</li> <li>AED first reported in 2020/22</li> </ul>	<b>2021/22</b> – because the later of the 3 dates is in the 2021 to 2022 funding year.
<ul style="list-style-type: none"> <li>Planned end date = 20/05/22</li> <li>Actual end date = 25/07/22</li> <li>AED first reported in 2020/22</li> </ul>	<b>2021/22</b> – because the later of the 3 dates is in the 2021 to 2022 funding year.
<ul style="list-style-type: none"> <li>Planned end date = 20/06/22</li> <li>Actual end date = 25/07/22</li> <li>AED first reported in R04 2022/23 rather than occurring in 2021/22</li> </ul>	<b>2022/23</b> – because the later of the 3 dates is in the 2022 to 2023 funding year.
<ul style="list-style-type: none"> <li>Planned end date = 20/08/22</li> <li>Actual end date = 25/07/22</li> <li>AED first reported in 2021/22</li> </ul>	<b>2022/23</b> – because the later of the 3 dates is in the 2022 to 2023 funding year.
<ul style="list-style-type: none"> <li>Planned end date = 20/05/22</li> <li>Actual end date = 25/07/22</li> <li>AED first reported in 2020/22</li> <li>AED then corrected to a month earlier in R04 2022/23 to 25/06/22</li> </ul>	<p><b>2021/22</b> – because the later of the 3 dates is in the 2021 to 2022 funding year.</p> <p>The actual end date was first reported in 2021 to 2022, so we discount the second instance that was reported in 2022 to 2023</p>
