# Monthly Summary

- 1.1.1 This Summary Report is published in fulfilment of commitments detailed in the High Speed Rail (London-West Midlands) Environmental Minimum Requirements, Annex 1: Code of Construction Practice, for the nominated undertaker to present the results of dust monitoring undertaken in the West Northamptonshire (WNDC) during April 2023.
- 1.1.2 Figures 1 and 2 in Appendix A present the current worksites together with the dust monitoring locations for April 2023.
- 1.1.3 This summary should be read in conjunction with the overview monitoring report available from [www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2](http://www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2), which highlights: the applicable standards and guidance, as well as the air quality and dust monitoring methodologies to be implemented by nominated undertakers throughout construction.
- 1.1.4 The current worksites as presented in Appendix A, Figures 1 and 2, include:

## **Twyford to Greatworth**

### Radstone and Hall Farm

- Topsoil Stripping
- Bulk Excavation
- Site Access Road and Haul Road Use & Maintenance
- Drainage
- Stockpile creation and management
- Preparation for piling works at Radstone Road Overbridge

### Greatworth Hall

- Topsoil Stripping
- Stockpile Management
- Bulk Excavation
- Site Access Road and Haul Road Use & Maintenance
- Drainage

## **G2S**

### Chipping warden – Ramac

- Chipping warden Green tunnel PPCC erection
- Green Tunnel maintenance for PCC erection
- Bulk earthworks

- Site Access Road maintenance
- Utilisation of haulage road for moving material
- Chipping warden batching plant
- General maintenance
- Stockpile management
- Vegetation maintenance
- Site Access Road maintenance
- Compound maintenance
- Water management
- Ditch maintenance
- Plant maintenance
- Material processing

#### CW Village

- Chipping warden Green tunnel PCC erection
- Green Tunnel maintenance for PCC erection
- Bulk earthworks
- Site Access Road maintenance
- Utilisation of haulage road for moving material
- Chipping warden batching plant
- General maintenance
- Stockpile management
- Vegetation maintenance
- Site Access Road maintenance
- Compound maintenance
- Water management
- Ditch maintenance
- Plant maintenance
- Material processing

#### Lower Boddington

- Topsoil stripping
- Stockpile management
- Site Access Road maintenance
- Utilisation of haulage road for moving material
- Drainage and temporary ponds
- Vegetation maintenance
- Highfurlong brook viaduct
- Bulk excavation – cutting
- Water management
- Ditch maintenance

### Fir tree nursery

- Topsoil stripping
- Stockpile management
- Site Access Road maintenance
- Utilisation of haulage road for moving material
- Drainage and temporary ponds
- Vegetation maintenance
- Site access road maintenance
- Water management
- Ditch maintenance

### Greatworth Village

- Stockpile management
- Site Access Road maintenance
- Utilisation of haulage road for moving material
- Drainage and temporary ponds

### Lower Thorpe

- Topsoil stripping
- Stockpile management
- Site Access Road maintenance
- Utilisation of haulage road for moving material
- Drainage and temporary ponds
- Helmdon Road Utility Plant Crossing

### Backgrounds

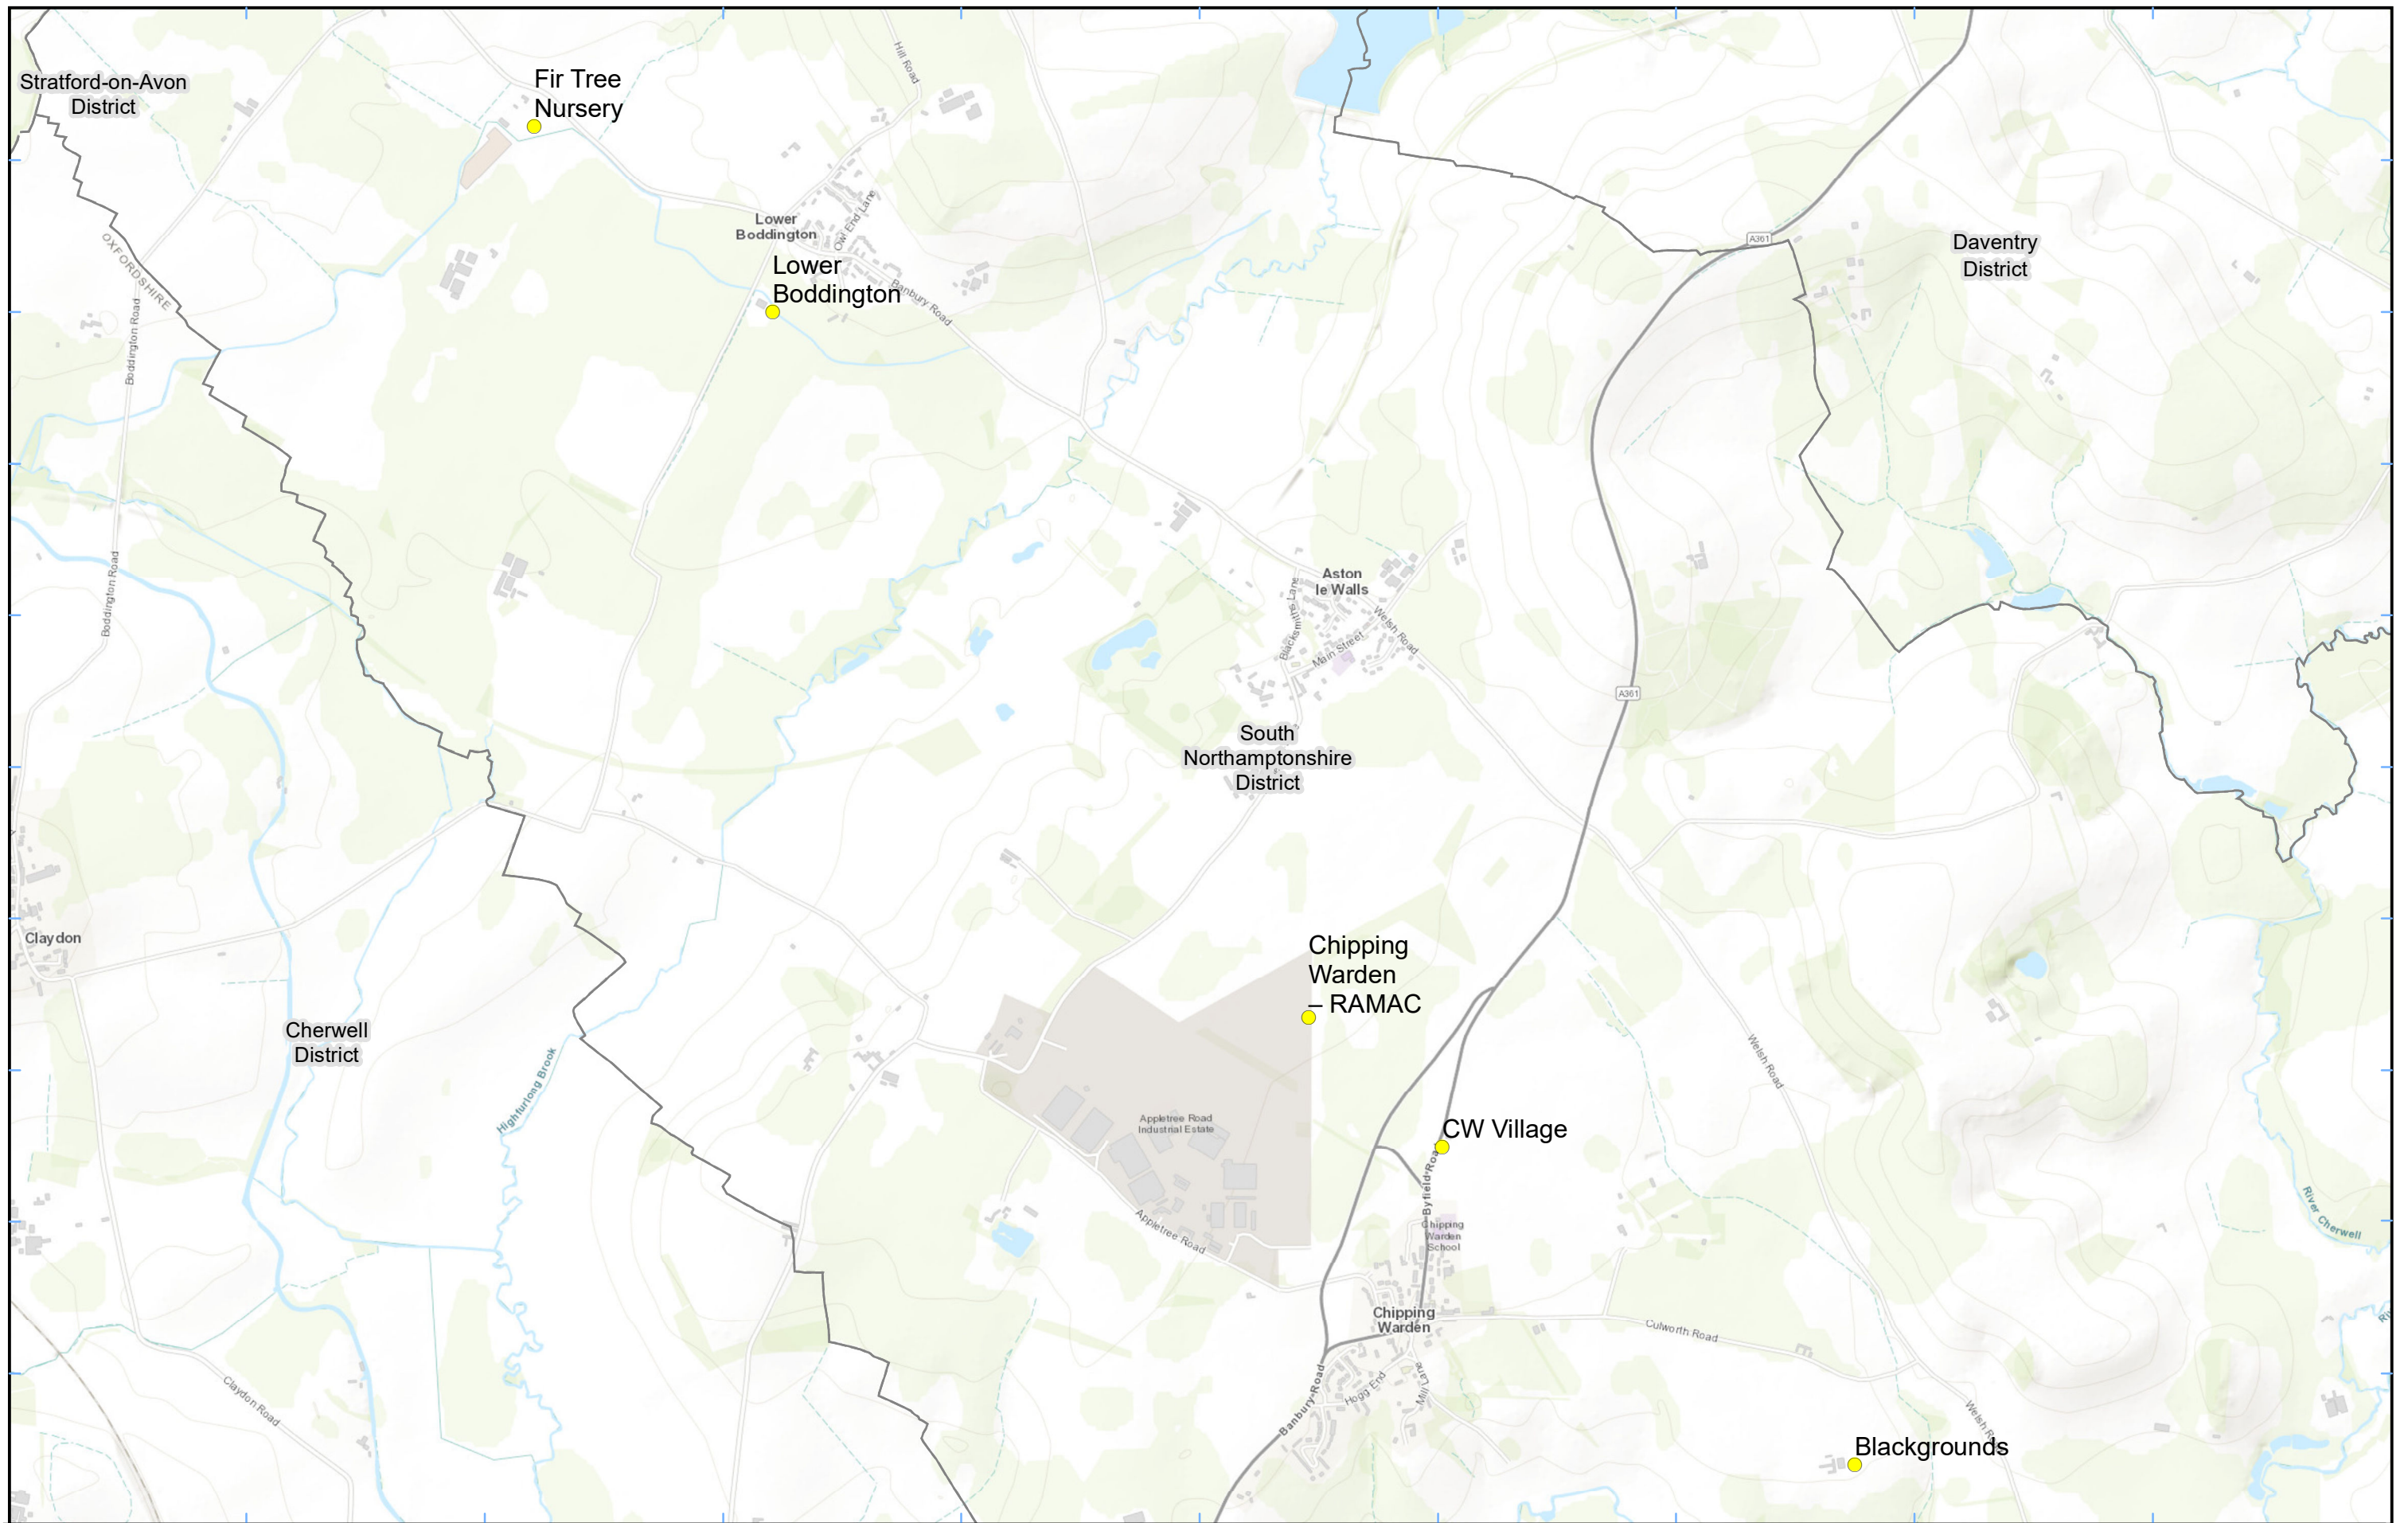

- Topsoil stripping
- Stockpile management
- Site Access Road maintenance
- Vegetation maintenance
- Utilisation of haulage road for moving material
- Drainage and temporary ponds
- Water management (checking pumps)
- Ditch maintenance

1.1.5 Dust monitoring locations and results are presented in Appendix B, Table 1, together with a line chart of monthly data from the dust monitor presented in Figure 3. All continuous dust monitoring is undertaken using indicative monitors. Despite being Environment Agency (MCERTS) certified, indicative monitors carry a higher level of uncertainty than reference monitors, and therefore cannot be strictly compared with Air Quality Standards for human health and the environment. The purpose of the monitoring undertaken is to ensure the effectiveness of the on-site mitigation.

- 1.1.6 The trigger level for PM<sub>10</sub> concentrations of 190 µg/m<sup>3</sup>, over a 1-hour period, in accordance with the updated guidance document '*Guidance on Monitoring in the Vicinity of Demolition and Construction Sites - (October 2018)*' has been applied.
- 1.1.7 Ten (10) dust monitors are installed at the worksite, where works are underway. These sites returned a medium dust risk rating.
- 1.1.8 No (0) dust trigger alerts were recorded during the monitoring period (April 2023).
- 1.1.9 Data capture was below 90% at multiple monitors due to monitor faults. The Radstone monitor was retrieved from site on the 12<sup>th</sup> April 2023.
- 1.1.10 No (0) complaints were received during the reporting period.
