

Digest of United Kingdom Energy Statistics (DUKES) table of tables

Data in tables is published on an Y-1 basis on the final Thursday of July, e.g. data for 2022 was published on Thursday 27 July 2023.

Subject and table number	Title
Total Energy	
1.1	Aggregate energy balances: gross calorific values
1.2	Value balance of traded energy
1.3	Sales of electricity and gas by sector
1.1.1	Inland consumption of primary fuels and equivalents for energy use
1.1.2	Availability and consumption of primary fuels and equivalents (energy supplied basis)
1.1.3	Comparison of net imports of fuel with total consumption of primary fuels and equivalents
1.1.4	Primary energy consumption, gross domestic product, and the energy ratio
1.1.5	Energy consumption by final user (energy supplied basis)
1.1.6	Expenditure on energy by final user
I.1	Aggregate energy balances: net calorific values
Coal	
2.1	Coal: commodity balances
2.2	Supply and consumption of coal
2.3	Supply and consumption of coke oven coke, coke breeze and other manufactured solid fuels
2.4	Supply and consumption of coke oven gas, blast furnace gas, benzole and tars
2.5	Deep mines and surface mines in production
2.6	Identified GB coal resource assessment
2.7	Imports of coal
2.8	Exports of coal
2.1.1	Coal production and stocks
2.1.2	Inland consumption of solid fuels
	Historical coal data: coal production, availability and consumption
	Historical coke and breeze data: coal carbonized and coke and breeze produced at coke ovens

Oil and oil products	
3.1	Primary oil: commodity balances
3.2	Petroleum products: commodity balances
3.3	Supply and disposal of petroleum
3.4	Additional information on inland deliveries of selected products
3.5	Stocks of crude oil and petroleum products at end of year
3.6	Additional information on inland deliveries for non-energy uses
3.7	Imports of crude oil & petroleum products by country of origin
3.8	Exports of crude oil & petroleum products by country of destination
3.1.1	Crude oil and petroleum products: production, imports and exports
3.1.2	Inland deliveries of petroleum
E.1	Gas flared and vented by oil and gas fields and terminals
F.1	Crude oil and Natural Gas Liquids production
F.3	Natural Gas Liquids net production
F.4	Disposals of crude oil
	Historical crude oil and petroleum: production, imports and exports data
	Historical crude oil and petroleum products: imports by product data
Gas	
4.1	Natural gas: commodity balances
4.2	Supply and consumption of natural gas and colliery methane
4.3	UK continental shelf and onshore natural gas production and supply
4.4	Gas storage sites and import/export facilities in the United Kingdom
4.5	Natural gas imports and exports
4.6	Liquefied Natural Gas imports by terminal
4.1.1	Natural gas and colliery methane production and consumption
E.1	Gas flared and vented by oil and gas fields and terminals
F.2	Gas production
	Historical gas data: gas production and consumption and fuel input

Electricity	
5.1	Electricity: commodity balances
5.2	Commodity balances, public distribution system and other generators
5.3	Fuel used in generation
5.4	Fuels consumed for electricity generation (autogeneration) by main industrial groups
5.5	Electricity supply, electricity supplied (net), electricity available, electricity consumption and electricity sales
5.6	Electricity fuel use, generation and supply
5.7	Plant capacity: United Kingdom
5.8	Major Power Producers Plant capacity: England and Wales, Scotland, and Northern Ireland
5.9	Capacity of other generators
5.10	Plant loads, demand and efficiency
5.11	Power stations in the United Kingdom
5.12	Plant installed capacity, by connection - United Kingdom
5.13	Capacity, net imports and utilisation of interconnectors
5.14	Estimated carbon dioxide emissions from electricity supplied
5.15	CHP generation and capacity overview
5.1.1	Fuel input for electricity generation
5.1.2	Electricity supply, availability and consumption
5.1.3	Electricity generated and supplied
	Historical electricity data
Renewables	
6.1	Renewables and waste: commodity balances
6.2	Capacity of, generation from renewable sources and shares of total generation
6.3	Load factors for renewable electricity generation
6.4	Renewable sources used to generate electricity and heat and for transport fuels
6.5	Renewables' shares of aggregated energy balances and gross final consumption for electricity, heat, transport, and overall renewables
6.6	Overseas trade of renewable fuels
6.7	Number of renewable electricity generating stations

Combined Heat and Power (CHP)	
7.1	Overall CHP deployment, use and performance
7.2	CHP installations, electrical capacity and generation by size range
7.3	CHP fuel used, capacity and generation by fuel and technology types
7.4	CHP installations, capacity total fuel use and outputs, by sector and fuel type
7.5	Large scale CHP schemes in the United Kingdom, December 2021
7.6	Savings of carbon dioxide emissions through cogeneration
7.7	Exports of electricity and heat from CHP schemes
7.8	CHP in Scotland, Wales, Northern Ireland and the regions of England
7.9	CHP in context
Weather	
1.1.7	Mean air temperatures (averages)
1.1.8	Mean air temperatures (deviations)
1.1.9	Mean heating degree days
Calorific values of fuels and density of petroleum fuels	
A.1	Estimated average gross calorific values of fuels
A.2	Estimated average net calorific values of fuels
A.3	Estimated average density of petroleum fuels
Trade	
G.1	Volume of imports and exports of fuels
G.2	Value of imports and exports of fuels
Heat sold	
J.1	Heat sold reallocation
