

Permit with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Virtus London 11 Limited

LON11 Data Centre
580 Ipswich Road
Slough Trading Estate
Slough
SL1 4HA

Permit number

EPR/DP3348QS

LON11 Data Centre

Permit number EPR/DP3348QS

Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

LON11 Data Centre is a new electronic data storage centre which includes back-up electricity generation capacity - a Schedule 1, Section 1.1 Part A(1)(a) activity under the Environmental Permitting Regulations (the burning of any fuel in an appliance with a rated thermal input of 50 or more megawatts (MW)).

The site is located in an area of light industrial and commercial developments on the Slough Trading Estate in Slough. The National Grid Reference for the site is SU 95408 80893. The nearest residential receptors are over 250 m to the south west of the site. The following designated conservation sites are within relevant screening distances of the installation: Burnham Beeches Special Area of Conservation (SAC), Chilterns Beechwoods SAC, Windsor Forest and Great Park SAC, South West London Waterbodies Special Protection Area (SPA) and Ramsar, as well as a number of undesignated local sites.

At the site there are 12 standby generators with an aggregated capacity of 72 MWth. The generators are grouped in two banks, one to the north west (emission points EP1 to EP6) and another to the south east (emission points EP7 to EP12). The generators run on ultra-low sulphur gas oil and discharge emissions to air via individual 15 metre stacks. The main emissions to air are oxides of nitrogen.

Under normal operation, electrical power is provided to the data centre from the National Grid and the combustion plant operates only for limited routine maintenance. The generators are tested one at a time to minimise air quality impact, at 0% load for 15 minutes per month, for eleven months of the year. Every year the generators are also subject to an additional test, undertaken during the twelfth month of the year. The annual test consists of running the engines sequentially at 100% load for 20 minutes, then reducing to 75% load for 120 minutes. The testing scenarios total 5.1 hours of operation per generator per year and 60.6 hours of operation in total per year. The operator has provided a management procedure that applies to this and other Virtus data centres in the locality (LON9 Data Centre and Virtus Slough Campus Data Centres) and ensures that during testing and maintenance, only one generator will be operated at a time.

In the event of a failure of the electrical supply, the operator will utilise the generators to maintain power to the data centre. The generators will be used solely for the purpose of providing a back-up power supply, with no electricity being exported from the installation.

Each generator has a dedicated fuel tank with a capacity of 29,475 litres per tank. The tanks are double-skinned steel tanks designed to provide 110% containment, fitted with leak detection, level gauges, overfill prevention valves and high and low-level alarms.

The site is covered in hardstanding, with uncontaminated surface water from the two generator compounds discharging to two soakaways via dedicated interceptors.

This site is operated independently but under the operator's common ISO 14001 accredited Environmental Management System and management structure, which applies to other Virtus data centres in the area.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

| Status log of the permit | | |
|---|------------------------------|---|
| Description | Date | Comments |
| Application EPR/DP3348QS/A001 | Duly made 04/11/2022 | Application for a combustion facility consisting of 12 gas oil fuelled engines providing emergency power to an electronic data centre. |
| Further Information received, responses to Schedule 5 notice dated 10/03/2023 | 28/04/2023 01/06/2023 | Further information on BAT status of engines, testing management procedures, drainage arrangements, site condition baseline data and revised site plan. |
| Permit determined EPR/DP3348QS (Billing ref. DP3348QS) | 24/07/2023 | Permit issued to Virtus London 11 Limited. |

End of introductory note

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/DP3348QS

The Environment Agency hereby authorises, under regulation 13 of the Environmental Permitting (England and Wales) Regulations 2016

Virtus London 11 Limited ("the operator"),

whose registered office is

**4th Floor, 20 Balderton Street
London
W1K 6TL**

company registration number 12372036

to operate an installation at

**LON11 Data Centre
580 Ipswich Road
Slough Trading Estate
Slough
SL1 4HA**

to the extent authorised by and subject to the conditions of this permit.

| Name | Date |
|---------------|------------|
| Sandra Cavill | 24/07/2023 |

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

1.1.1 The operator shall manage and operate the activities:

- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
- (b) using sufficient competent persons and resources.

1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.

1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.2 Energy efficiency

1.2.1 The operator shall:

- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
- (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
- (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

1.3.1 The operator shall:

- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
- (b) maintain records of raw materials and water used in the activities;
- (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
- (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

1.4.1 The operator shall take appropriate measures to ensure that:

- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
- (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
- (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

- 1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the "activities").

2.2 The site

- 2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.
- 2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation ("plan") specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 2.3.3 For the following activities referenced in schedule 1, table S1.1: AR1. The activities shall not operate for more than 500 hours in emergency use per annum.
- 2.3.4 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.
- 2.3.5 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
- (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and
 - (e) the waste code of the waste.
- 2.3.6 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.4 Improvement programme

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by the Environment Agency.
- 2.4.2 Except in the case of an improvement which consists only of a submission to the Environment Agency, the operator shall notify the Environment Agency within 14 days of completion of each improvement.

3 Emissions and monitoring

3.1 Emissions to water, air or land

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1 and S3.2.
- 3.1.2 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
- (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
 - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

- 3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.
- 3.3.2 The operator shall:
- (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to odour, submit to the Environment Agency for approval within the period specified, an odour management plan which identifies and minimises the risks of pollution from odour;
 - (b) implement the approved odour management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.4 Noise and vibration

- 3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.
- 3.4.2 The operator shall:
- (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to noise and vibration, submit to the Environment Agency for approval within the period

specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;

- (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.5 Monitoring

- 3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:
 - (a) point source emissions specified in table S3.1.
- 3.5.2 The operator shall maintain records of all monitoring required by this permit including records of the taking and analysis of samples, instrument measurements (periodic and continuous), calibrations, examinations, tests and surveys and any assessment or evaluation made on the basis of such data.
- 3.5.3 Permanent means of access shall be provided to enable sampling/monitoring to be carried out in relation to the emission points specified in schedule 3 table S3.1 unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

- 4.1.1 All records required to be made by this permit shall:
 - (a) be legible;
 - (b) be made as soon as reasonably practicable;
 - (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
 - (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.
- 4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

- 4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.
- 4.2.2 A report or reports on the performance of the activities over the previous year shall be submitted to the Environment Agency by 31 January (or other date agreed in writing by the Environment Agency) each year. The report(s) shall include as a minimum:
 - (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data;
 - (b) the performance parameters set out in schedule 4 table S4.2 using the forms specified in table S4.3 of that schedule;
 - (c) where conditions 2.3.3 applies, the hours of operation in any year.

- 4.2.3 Within 28 days of the end of the reporting period the operator shall, unless otherwise agreed in writing by the Environment Agency, submit reports of the monitoring and assessment carried out in accordance with the conditions of this permit, as follows:
- (a) in respect of the parameters and emission points specified in schedule 4 table S4.1;
 - (b) for the reporting periods specified in schedule 4 table S4.1 and using the forms specified in schedule 4 table S4.3; and
 - (c) giving the information from such results and assessments as may be required by the forms specified in those tables.
- 4.2.4 The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

- 4.3.1 In the event:
- (a) that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
 - (i) inform the Environment Agency,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
 - (b) of a breach of any permit condition the operator must immediately—
 - (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
 - (c) of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.
- 4.3.2 Any information provided under condition 4.3.1 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.
- 4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.
- 4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:
- Where the operator is a registered company:
- (a) any change in the operator's trading name, registered name or registered office address; and
 - (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.
- Where the operator is a corporate body other than a registered company:
- (a) any change in the operator's name or address; and

(b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual);
- (b) any change in the operator's name(s) or address(es); and
- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (a) the Environment Agency shall be notified at least 14 days before making the change; and
- (b) the notification shall contain a description of the proposed change in operation.

4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.3.7 Where the operator has entered into a climate change agreement with the Government, the Environment Agency shall be notified within one month of:

- (a) a decision by the Secretary of State not to re-certify the agreement;
- (b) a decision by either the operator or the Secretary of State to terminate the agreement; and
- (c) any subsequent decision by the Secretary of State to re-certify such an agreement.

4.4 Interpretation

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "immediately", in which case it may be provided by telephone.

Schedule 1 – Operations

| Table S1.1 activities | | | |
|-------------------------------------|--|--|---|
| Activity reference | Activity listed in Schedule 1 of the EP Regulations | Description of specified activity | Limits of specified activity |
| AR1 | S1.1 A1 (a) Burning any fuel in an appliance with a rated thermal input of 50 or more megawatts | Operation of 12 emergency standby generators with a total thermal input of approximately 72 MWth. 12 x 6 MWth engines (New Medium Combustion Plant) | From receipt of raw materials and generation of electricity to despatch of waste. Electricity produced at the installation cannot be exported to the National Grid. The emergency operational hours of the installation shall not exceed the specifications set out in condition 2.3.3. |
| Directly Associated Activity | | | |
| AR2 | Storage of raw materials | From receipt of raw materials to use within the facility. | |
| AR3 | Surface water drainage | Input to site drainage system until discharge to soakaways via bypass interceptors (emission points SL1 and SL2). Storm excess overflows into the Thames Water surface water sewer (emission points S1 and S2) . | |

| Table S1.2 Operating techniques | | |
|---|---|-------------------------|
| Description | Parts | Date Received |
| Application | Application forms B2 and B3 and all referenced supporting information, including generators testing schedule (as detailed in Section 5.1 of document: Virtus London 11 Ltd Environmental Permit Application, ref: 70091311/LON11/EPR001 dated June 2022). | Duly Made 04/11/2022 |
| Response to Schedule 5 request for further information dated 10/03/2023 | Standby Generation Management Procedure version 1.3 dated 03/06/2023 | 14/06/2023 |

| Table S1.3 Improvement programme requirements | | |
|--|---|---|
| Reference | Requirement | Date |
| IC1 | Air Quality Management Plan The Operator shall produce an Air Quality Management Plan in conjunction with the Local Authority outlining response measures to be taken in the event of a grid failure. The plan should consider and co-ordinate measures taken at other Virtus data centres operating in the locality (LON9 Data Centre and Virtus Slough Campus Data Centres). This should include but not be limited to the following considerations: | 31/01/2025 unless otherwise agreed by the Environment Agency |

| Table S1.3 Improvement programme requirements | | |
|--|---|---|
| Reference | Requirement | Date |
| | <ul style="list-style-type: none"> The response should be tailored to reflect the predicted potential impact indicated by the air dispersion modelling at individual receptors Specific timescales for response measures How local conditions during a grid failure might influence the response required, for example meteorological conditions or time of day Contingency for how the response will be carried out in the event scenario i.e. loss of power Selection of appropriate times for full-scale testing of the generators Timescales for continued review of the management plan. <p>The agreed Air Quality Management Plan shall be submitted to the Environment Agency for approval.</p> | |
| IC2 | <p>Monitoring of emissions</p> <p>The operator shall submit a monitoring plan for approval by the Environment Agency detailing their proposal for the implementation of the flue gas monitoring requirements specified in Table S3.1, in line with web guide 'Monitoring stack emissions: low risk MCPs and specified generators' Published 16 February 2021 (formerly known as TGN M5). The plan shall include, but not limited to:</p> <ul style="list-style-type: none"> When the generators are not fitted with sampling ports, a proposal to install them within the shortest practical timeline Details of any relevant safety, cost and operational constraints affecting the monitoring regime, in support of any proposed deviation from the testing regime specified in table S3.1. | 31/10/2023 unless otherwise agreed by the Environment Agency |
| IC3 | <p>BAT compliance</p> <p>For the generators emitting from the following emission points: EP1, EP2, EP3, EP4, EP5, EP6, EP7, EP8, EP9, EP10, 2P11, EP12</p> <p>The operator shall provide evidence for approval by the Environment Agency that the generators to comply with BAT emissions standards (i.e. TA Luft 2g or US EPA Tier II or an equivalent standard).</p> | 31/01/2024 unless otherwise agreed by the Environment Agency |
| IC4 | <p>Drainage</p> <p>The operator shall submit a written report for approval by the Environment Agency setting out proposed measures to minimise pollution risk as a result of leaks and spillages from the installation.</p> <p>The report shall have regard to guidance CIRIA C736: Containment systems for the prevention of pollution, and shall include, but not be limited to:</p> <ul style="list-style-type: none"> consideration of the installation of physical devices, e.g. shut-off valves with oil detection, prior to the discharge point into each soakaway (emission points W1 and W2). an updated drainage plan showing the location of any installed physical devices. <p>On approval, the operator shall implement the measures agreed to a timetable agreed in writing with the Environment Agency.</p> | 31/01/2024 unless otherwise agreed by the Environment Agency |

Schedule 2 – Waste types, raw materials and fuels

| Table S2.1 Raw materials and fuels | |
|--|----------------------------|
| Raw materials and fuel description | Specification |
| Gas oil or equivalent substitute to be agreed in writing with the Environment Agency | Sulphur content 0.001% max |

Schedule 3 – Emissions and monitoring

| Emission point ref. & location | Source | Parameter | Limit (including unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|--|--|---|-------------------------------|---|---|---|
| EP1 to EP12 Emission points from generators as shown on site plan in schedule 7 | Gas oil fuelled generator exhausts 12 x 6 MWth | Oxides of Nitrogen (NO and NO ₂ expressed as NO ₂) | No limit set | In line with web guide 'Monitoring stack emissions: low risk MCPs and specified generators' Published 16 February 2021 (formerly known as TGN M5) | Every 1500 hours of operation or once every five years (whichever comes first). [Note 1] | In line with web guide 'Monitoring stack emissions: low risk MCPs and specified generators' Published 16 February 2021 (formerly known as TGN M5) |
| | | Carbon monoxide | No limit set | In line with web guide 'Monitoring stack emissions: low risk MCPs and specified generators' Published 16 February 2021 (formerly known as TGN M5) | Every 1500 hours of operation or once every five years (whichever comes first). [Note 1] | In line with web guide 'Monitoring stack emissions: low risk MCPs and specified generators' Published 16 February 2021 (formerly known as TGN M5) |
| | | Sulphur dioxide | No limit set | - | No requirement | - |
| | | Particulate Matter | No limit set | - | No requirement | - |
| Note 1: Unless otherwise agreed in writing with the Environment Agency as a result of approval of Improvement Condition IC2. | | | | | | |

| Emission point ref. & location | Source | Parameter | Limit (incl. Unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|---|---|------------------|---------------------------|-------------------------|-----------------------------|--------------------------------------|
| W1 Emission point SL1 as shown on site plan in schedule 7. | Uncontaminated surface water via bypass interceptor | - | - | - | - | - |

| Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements | | | | | | |
|--|--|------------------|---------------------------|-------------------------|-----------------------------|--------------------------------------|
| Emission point ref. & location | Source | Parameter | Limit (incl. Unit) | Reference period | Monitoring frequency | Monitoring standard or method |
| Emission to soakaway | | | | | | |
| W2 Emission point SL2 as shown on site plan in schedule 7. Emission to soakaway | Uncontaminated surface water via bypass interceptor | - | - | - | - | - |
| W3 Emission point S1 as shown on site plan in schedule 7. Emission to Thames Water Surface Water Sewer, discharging to the Chalvey Ditches | Uncontaminated surface water (storm excess) via bypass interceptor | - | - | - | - | - |
| W4 Emission point S2 as shown on site plan in schedule 7. Emission to Thames Water Surface Water Sewer, discharging to the Chalvey Ditches | Uncontaminated surface water (storm excess) via bypass interceptor | - | - | - | - | - |

Schedule 4 – Reporting

| Parameter | Emission or monitoring point/reference | Reporting period | Period begins |
|--|--|---|--|
| Emissions to air Parameters as required by condition 3.5.1. | EP1 to EP12 | Every 1500 hours of operation or once every five years (whichever comes first). | Within 4 months of the issue date of the permit or the date when the engine is first put into operation, whichever is later. [Note 1] |

Note 1: Unless otherwise agreed in writing with the Environment Agency as a result of approval of Improvement Condition IC2.

| Parameter | Frequency of assessment | Units |
|---|--|--|
| Usage of gas oil or equivalent substitute to be agreed in writing with the Environment Agency | Annually | Tonnes |
| Generator operation for maintenance | Report to be submitted annually | <ul style="list-style-type: none"> - Total hours for the site (hours), - Total hours per generator (hours), - Total number of runs per generator (quantity) - Number of minutes per run (minutes) |
| Generator operation during emergency scenario | Within 24 hours if operation commences | <ul style="list-style-type: none"> - Date and time of grid failure, - Number of generators operating immediately after the failure, - Number of generators operating two hours after failure, - Anticipated duration of the mains supply failure (hours) |
| Generator operation during emergency scenario | Annually | <ul style="list-style-type: none"> - Total number of runs (quantity) - Duration of runs (hours) |

| Media/parameter | Reporting format | Date of form |
|---|--|-----------------------|
| Air | Emissions to Air Reporting Form or other form as agreed in writing by the Environment Agency | Version 1, 08/03/2021 |
| Other performance indicators | Form Performance 1 or other form as agreed in writing by the Environment Agency | 06/06/2023 |
| Generator operation during emergency scenario | Form Emergency Scenario or other form as agreed in writing by the Environment Agency | 06/06/2023 |

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

| | |
|--------------------------------|--|
| Permit Number | |
| Name of operator | |
| Location of Facility | |
| Time and date of the detection | |

| | |
|---|--|
| (a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution | |
| To be notified within 24 hours of detection | |
| Date and time of the event | |
| Reference or description of the location of the event | |
| Description of where any release into the environment took place | |
| Substances(s) potentially released | |
| Best estimate of the quantity or rate of release of substances | |
| Measures taken, or intended to be taken, to stop any emission | |
| Description of the failure or accident. | |

| | |
|---|--|
| (b) Notification requirements for the breach of a limit | |
| To be notified within 24 hours of detection unless otherwise specified below | |
| Emission point reference/ source | |
| Parameter(s) | |
| Limit | |
| Measured value and uncertainty | |
| Date and time of monitoring | |

| | |
|---|--|
| (b) Notification requirements for the breach of a limit | |
| To be notified within 24 hours of detection unless otherwise specified below | |
| Measures taken, or intended to be taken, to stop the emission | |

| | |
|---|----------------------------|
| Time periods for notification following detection of a breach of a limit | |
| Parameter | Notification period |
| | |
| | |
| | |

| | |
|--|--|
| (c) Notification requirements for the breach of permit conditions not related to limits | |
| To be notified within 24 hours of detection | |
| Condition breached | |
| Date, time and duration of breach | |
| Details of the permit breach i.e. what happened including impacts observed. | |
| Measures taken, or intended to be taken, to restore permit compliance. | |

| | |
|--|--|
| (d) Notification requirements for the detection of any significant adverse environmental effect | |
| To be notified within 24 hours of detection | |
| Description of where the effect on the environment was detected | |
| Substances(s) detected | |
| Concentrations of substances detected | |
| Date of monitoring/sampling | |

Part B – to be submitted as soon as practicable

| | |
|--|--|
| Any more accurate information on the matters for notification under Part A. | |
| Measures taken, or intended to be taken, to prevent a recurrence of the incident | |

| | |
|--|--|
| Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission | |
| The dates of any unauthorised emissions from the facility in the preceding 24 months. | |

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“Energy efficiency” means the annual net plant energy efficiency, the value for which is calculated from the operational data collected over the year.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission or background concentration limit.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions, as read in accordance with Schedule 1A to the Environmental Permitting (England and Wales) Regulations 2016.

“Medium Combustion Plant” or “MCP” means a combustion plant with a rated thermal input equal to or greater than 1 MW but less than 50 MW.

“Medium Combustion Plant Directive” or “MCPD” means Directive 2015/2193/EU of the European Parliament and of the Council on the limitation of emissions of certain pollutants into the air from medium combustion plants, as read in accordance with Schedule 1A to the Environmental Permitting (England and Wales) Regulations 2016.

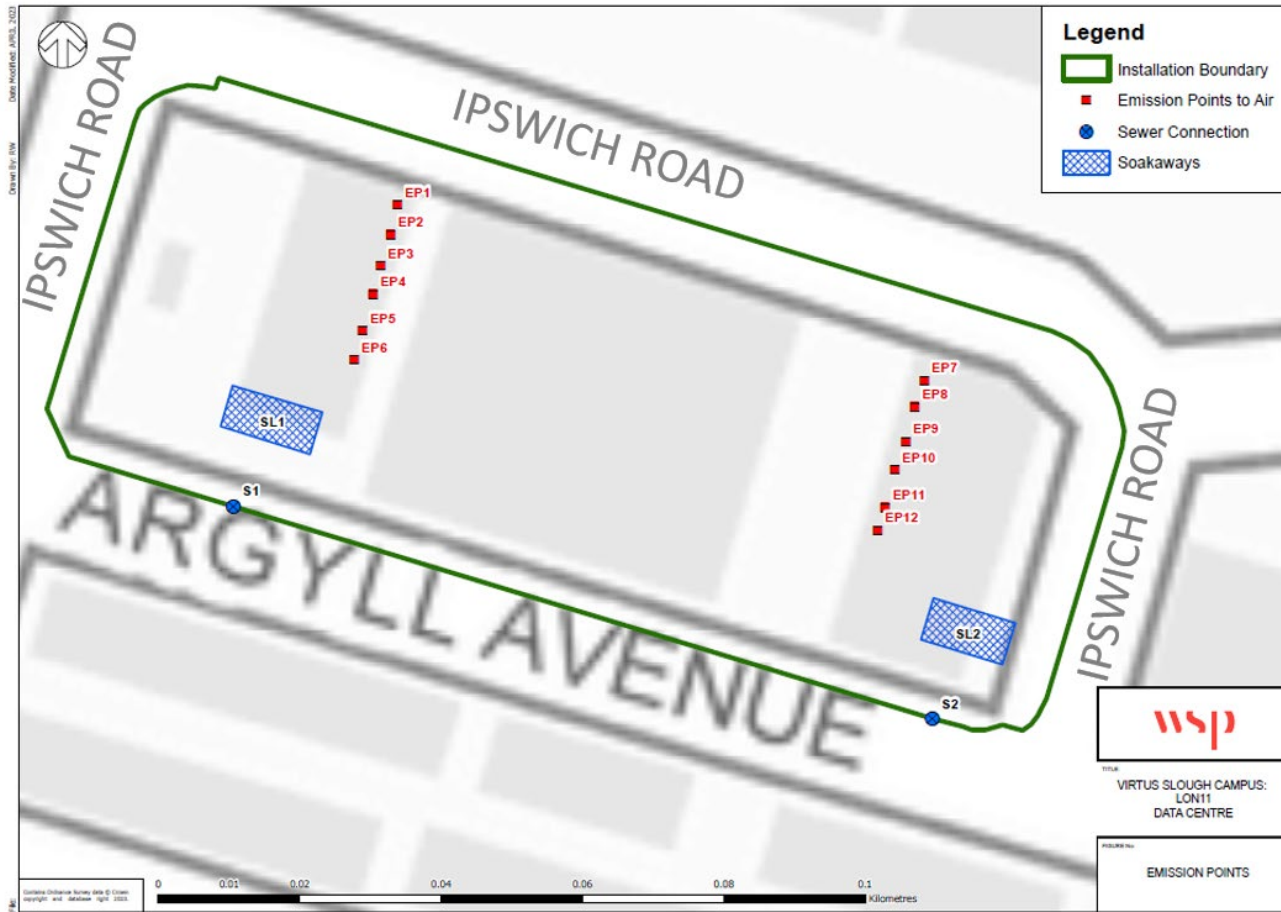

“Waste Framework Directive” or “WFD” means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste, as read in accordance with Schedule 1A to the Environmental Permitting (England and Wales) Regulations 2016.

Unless otherwise stated, any references in this permit to concentrations of substances in emissions into air means:

- in relation to emissions from combustion processes, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 3% dry for liquid and gaseous fuels other than gas engines or gas turbines, 6% dry for solid fuels; and/or
- in relation to emissions from gas engines or gas turbines, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 15% dry for liquid and gaseous fuels.

“year” means calendar year ending 31 December.
