

## Contracts for Difference: Stakeholder Bulletin

8 June 2023

### LCCC co-location guidance published

In the Smart Systems and Flexibility Plan 2021, government committed to removing barriers to flexibility and to working with the Low Carbon Contracts Company (LCCC) to better facilitate the addition of storage to Contracts for Difference (CfD) projects. As part of this ongoing work, and new government ambitions to have 1GW of electrolytic hydrogen production in operation or construction by 2025, LCCC recently published updated CfD Co-location Generator Guidance to facilitate innovative project configurations that provide value to the electricity system. Government's overall ambition is for up to 10GW of hydrogen production capacity by 2030, at least half of which will come from electrolytic hydrogen.

The updated guidance provides clarity on co-location scenarios that are permitted under the Generic CfD, including the metering arrangements that can support co-location with battery storage or hydrogen production.

LCCC will be hosting a webinar on **15 June 2023 at 13:00 – 14:00** for stakeholders to hear more about the recently published guidance documents, which will include the CfD Co-location guidance as well as the new CfD Private Network Guidance.
