Part II. Certification

Animal Health

I, the undersigned official inspector, hereby certify that the aquaculture animals referred to in Part 1 of this certificate:

AH/T157D Territory requirements (freedom from disease)

(*)[requirements for species susceptible to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (genotype HPR deleted) (ISA), Koi herpes virus (KHV), Marteilia refringens, Bonamia ostreae, and/or White spot disease

the aquaculture animals referred to above:

EITHER (*)[originate from a country/territory, zone or compartment declared free from (*)[VHS] (*)[IHN] (*)[ISA] (*)[KHV] (*)[Marteilia refringens] (*)[Bonamia ostreae] (*)[White spot disease] in accordance with the relevant GB requirements]]

OR (*)[in the case of wild aquatic animals, have been subject to quarantine in accordance with GB requirements]]

II.a. Certificate reference no.	II.b.

AH/T157F Territory requirements (freedom from disease)

(*)[requirements for vector species to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (genotype HPR deleted) (ISA), Koi herpes virus (KHV), *Marteilia refringens*, *Bonamia ostreae*, and/or White spot disease

the aquaculture animals referred to above are to be regarded as possible vectors to (*)[VHS] (*)[IHN] (*)[ISA] (*)[KHV] (*)[*Marteilia refringens*] (*)[*Bonamia ostreae*] (*)[White spot disease] in accordance with GB requirements, and:

EITHER (*)[originate from a country/territory, zone or compartment declared free from (*)[VHS] (*)[IHN] (*)[ISA] (*)[KHV] (*)[*Marteilia refringens*] (*)[*Bonamia ostreae*] (*)[White spot disease] in accordance with relevant GB requirements]]

OR (*)[have been subject to quarantine in accordance with GB requirements]]

AH/T158C Territory requirements (freedom from disease)

(*)[requirements for species susceptible to Spring viraemia of carp (SVC), Bacterial kidney disease (BKD), and Infection with *Gyrodactylus salaris* (GS)

the aquaculture animals referred to above,

(*)**EITHER** [originate from a country/territory, zone or compartment or part thereof:

(a) which meet GB requirements for (*)[SVC] (*)[GS] (*)[BKD] and

(b) where all aquaculture animals of species susceptible to the relevant diseases introduced into (*)[Jersey] or (*)[Guernsey] or (*)[Isle of Man] or (*)[Northern Ireland] or parts thereof comply with the requirements set out in AH/T158C of this certificate, *and*

(*)**EITHER** [in the case of BKD, complies with requirements for disease freedom equivalent to those laid down in retained Decision 2009/177.]

(*)**AND/OR** [in the case of (*)[SVC] (*)[GS], complies with requirements for disease freedom laid down in the relevant WOA Standard.]

(*)**AND/OR** [in the case of (*)[SVC] (*)[BKD], comprises one individual farm which under the supervision of the competent authority:

(i) has been emptied, cleansed and disinfected, and fallowed in at least 6 weeks,

(ii) has been restocked with animals from areas certified free from the relevant disease by the competent authority.]]

(*)**AND/OR** (c) [in the case of wild aquatic animals susceptible to (*)[SVC] (*)[BKD], have been subject to quarantine under conditions at least equivalent to those laid down in retained Decision 2008/946/EC.]

(*)**AND/OR** (d) [in the case consignments for which GS requirements apply, have been held, immediately prior to export, in water with a salinity of at least 25 parts per thousand for a continuous period of at least 14 days and no other live aquatic animals of the species susceptible to GS have been introduced during that period.]

(*)**AND/OR** (e) [in the case of eyed fish eggs for which GS requirements apply, have been disinfected by a method] demonstrated to be effective against GS.]]

AH/T159C Territory requirements (freedom from disease)

(*)[requirements for species susceptible to Ostreid herpesvirus 1 μ var (OsHV-1 μ var)

the aquaculture animals referred to above:

(*)**EITHER** [originate from a country/territory, zone or compartment:

(a) where OsHV-1 μ var is notifiable to the competent authority in accordance with GB requirements;

II.a. Certificate reference no.	II.b.
---------------------------------	-------

- (b) where all aquaculture animals of species susceptible to OsHV-1 μ var introduced into (*)[Jersey] or (*)[Guernsey] or (*)[Isle of Man] or (*)[Northern Ireland] or parts thereof comply with the requirements set out in **AH/T159C** (freedom from disease) of this certificate;
- (c) (*) **EITHER** [which comply with GB requirements for disease freedom,]
(*) **AND/OR** [in the case of consignments intended for a zone or compartment with a surveillance or eradication programme, meet GB requirements;]]

(*) **AND/OR** [have been subject to quarantine in accordance with GB requirements.]]

AH/T510A Territory requirements

(*)[attestation for consignments originating from an area subject to disease control measures

the animals referred to above originate from an area subject to disease control measures regarding (*)[Epizootic haematopoietic necrosis (EHN)] (*)[Viral haemorrhagic septicaemia (VHS)] (*)[Infectious haematopoietic necrosis (IHN)] (*)[Infectious salmon anaemia (ISA) (genotype HPR deleted)] (*)[Koi herpes virus (KHV)] (*)[Bonamia exitiosa] (*)[Perkinsus marinus] (*)[Mikrocytos mackini] (*)[Marteilia refringens] (*)[Bonamia ostreae] (*)[Taura syndrome] (*)[Yellowhead disease] (*)[White spot disease] (*)[the following emerging disease:];

and

the animals referred to above are allowed to be placed on the market according to the control measures laid down; and

and

the consignment is identified in accordance with GB requirements and with the following statement:

'(*)[Wild] (*)[Fish] (*)[Molluscs] (*)[Crustaceans] originating from an area subject to disease control measures'.]]

AH/A261 Animal requirements

(*)[in the case of molluscs, were subject to an individual visual check of each part of the consignment, and no molluscs species other than those specified in Part I of the certificate were detected;]

AH/A359C Animal transport

the transport conditions of the aquaculture animals referred to above meet the relevant GB requirements.

AH/A360C Animal transport (labelling)

the consignment is identified in accordance with GB requirements and with the following statement:

(*) **EITHER** [" [Wild] (*)[Fish] (*)[Molluscs] (*)[Crustaceans] intended for farming in Great Britain"]]

(*) **OR** ["(*)[Wild] (*)[Molluscs] intended for relaying in Great Britain"]]

(*) **OR** ["(*)[Wild] (*)[Fish] (*)[Molluscs] (*)[Crustaceans] intended for put and take fisheries in Great Britain"]]

(*) **OR** ["(*)[Wild] (*)[Ornamental fish] (*)[Ornamental molluscs] (*)[Ornamental crustaceans] intended for open ornamental facilities in Great Britain"]],

(*) **OR** ["(*)[Fish] (*)[Molluscs] (*)[Crustaceans] intended for restocking in Great Britain"]]

AH/A721B Animal requirements

(a) comply with GB requirements for placing on the market.

(b) are not subject to any prohibitions due to unresolved increased mortality;

(c) are not intended for destruction or slaughter for the eradication of diseases;

Placing on market aquaculture open
ornamental from British Islands
(non-GB) into GB (BI-OO)
GBHC674

II.a. Certificate reference no.	II.b.
---------------------------------	-------

AH/A722 Animal requirements

- (*) **EITHER** [have been inspected within *[72] *[24] hours of loading and showed no clinical signs of disease]
- (*) **OR** [in the case of eggs and molluscs, come from a farm or mollusc farming area where, according to the records of the farm or mollusc farming area, there is no indication of disease problems]
- (*) **OR** [in the case of wild aquatic animals, according to the best of my knowledge and belief are clinically healthy]

(*) Keep as appropriate.

Official Veterinarian / Official Inspector

By signing this certificate, I certify that the requirements laid out above and in the accompanying notes for completion have been met.

Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been retained in Great Britain (retained EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

Part I

- Box reference I.12: If appropriate, use the authorisation number for the farm or the mollusc farming area in question. Use 'other' if wild aquatic animals.
- Box reference I.13: If appropriate, use the authorisation number for the farm or the mollusc farming area in question. Use 'other' if intended for restocking.
- Box reference I.19: Use the appropriate HS codes: 0301, 0306, 0307, 030110 or 030270.
- Box reference I.20 and I.31: As regards quantity, give the total number.
- Box reference I.25: Use the option 'Breeding' if intended for farming, 'Relaying' if intended for relaying, 'Pets' if intended for open ornamental facilities, 'Game restocking' if intended for restocking, 'Quarantine' if the aquaculture animals are intended for a quarantine facility, and 'Other' if intended for put and take fisheries.

Part II

Animal Health

AH/T157D Territory requirements (freedom from disease)

This attestation certificate applies where the consignment contains species susceptible to one or more of the diseases referred to in the title. Susceptible species are listed in table B of the document published by the Secretary of State, with the consent of the Scottish Ministers and Welsh Ministers, in accordance with Article 3A of Commission Regulation No 1251/2008.

Published lists of susceptible and vector species are accessible at:

<https://www.gov.uk/guidance/import-or-export-live-fish-and-shellfish>

To be authorised into Great Britain, zone or compartment declared free from VHS, IHN, ISA, KHV, *Marteilia refringens*, *Bonamia ostreae*, or Whitespot disease or with a surveillance or eradication programme, one of these statements must be kept if the consignment contains susceptible or vector species to the disease(s) for which disease freedom or programmes(s) apply(ies). Data on the disease status of each farm and mollusc farming area in Great Britain are accessible at:

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/registers-of-authorised-aquaculture-production-businesses-and-authorised-processing-establishments/>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

**Placing on market aquaculture open
ornamental from British Islands
(non-GB) into GB (BI-OO)
GBHC674**

Relevant GB requirements:

Consignments of wild aquatic animals may be placed on the market regardless of the requirements in this attestation if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

The country, territory, zone or compartment must be declared free in accordance with the relevant WOA Standard by the competent authority of the country of origin, or via a process equivalent to Decision 2009/177.

For wild aquatic animals subject to quarantine, this must have been in accordance with Decision 2008/946

AH/T157F Territory requirements (freedom from disease)

This attestation applies where the consignment contains vector species to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (genotype HPR deleted) (ISA), Koi herpes virus (KHV), *Marteilia refringens*, *Bonamia ostreae*, and/or White spot disease.

Possible vector species and the conditions, under which consignments of such species are to be considered vector species, are listed in table A of the document published by the Secretary of State, with the consent of the Scottish and Welsh Ministers in accordance with Article 3 of Commission Regulation No 1251/2008.

Animals are regarded as possible vectors where they are species listed in Column 2 and fulfil the conditions set out in Column 3 of table A.

Consignments of possible vector species may be imported regardless of this requirement if the conditions set out in Column 4 of table A of the document published by the Secretary of State, with the consent of the Scottish and Welsh Ministers in accordance with Article 3 of Commission Regulation No 1251/2008 are not fulfilled or if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

Where applicable, to be authorised into Great Britain, zone or compartment declared free from VHS, IHN, ISA, KHV, *Marteilia refringens*, *Bonamia ostreae*, or Whitespot disease or with a surveillance or eradication programme equivalent to one drawn up in accordance with Decision 2008/896, one of these statements must be kept if the consignment contains vector species to the disease(s) for which disease freedom or programme(s) apply(ies). Data on the disease status of each farm and mollusc farming area in the Great Britain are accessible at

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/register-of-licensed-aquaculture-production-businesses-and-licensed-processing-establishments/>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

Relevant GB requirements

“Relevant GB requirements” means the country, territory, zone or compartment must be declared free in accordance with the relevant WOA Standard by the competent authority of the country of origin, or via a process equivalent to Decision 2009/177.

For the free country, territory, zone or compartment:

- (a) the relevant diseases must be notifiable to the competent authority and reports of suspicion of infection of the relevant diseases must be immediately investigated by the competent authority;
- (b) all introduction of species susceptible to the relevant diseases must come from an area declared free of the diseases; and
- (c) species susceptible to the relevant diseases must not be vaccinated against the relevant diseases.

For aquatic animals subject to quarantine, this must have been in accordance with Decision 2008/946

For aquatic animals subject to quarantine, this must have been in accordance with Decision 2008/946

**Placing on market aquaculture open
ornamental from British Islands
(non-GB) into GB (BI-OO)
GBHC674**

AH/T158C Territory requirements (freedom from disease)

This attestation only applies to consignments intended for Great Britain or part thereof which is regarded as disease-free, or subject to a surveillance or eradication programme for SVC, BKD or GS, and the consignment comprises species listed in table C of the document published by the Secretary of State, with the consent of the Welsh Ministers, in accordance with regulation 3B of the Aquatic Animal Health (England and Wales) Regulations 2009, or species listed in a document published by the Scottish Ministers in accordance with regulation 3B of the Aquatic Animal Health (Scotland) Regulations 2009 as susceptible to the disease(s) for which the disease-free status or programme(s) apply(ies).

This attestation shall also apply to consignments of fish of any species originating from waters where species listed in table C of the document published by the Secretary of State, with the consent of the Welsh Ministers, in accordance with regulation 3B of the Aquatic Animal Health (England and Wales) Regulations 2009, or species listed in a document published by the Scottish Ministers in accordance with regulation 3B of the Aquatic Animal Health (Scotland) Regulations 2009 as species susceptible to infection with GS, are present, and where those consignments are intended destinations listed in that Schedule.

Data on the areas of Great Britain or parts thereof which are regarded as disease-free, or subject to a surveillance or eradication programme for SVC, BKD or GS are accessible at:

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

Consignments of wild aquatic animals for which SVC, and/or BKD related requirements are applicable, may be placed on the market regardless of the requirements in this attestation if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

Relevant GB requirements:

If certifying the first option (option A), the aquaculture animals must originate from a country/territory/zone/compartment:

Where the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant disease must be immediately investigated by the competent authority where species susceptible to the relevant diseases are not vaccinated against the relevant diseases

For wild aquatic animals susceptible to SVC and/or BKD have been subject to quarantine conditions, at least equivalent to those laid down in Decision 2008/946

AH/T159C Territory requirements (freedom from disease)

This attestation only applies to consignments intended for Great Britain, a zone or compartment which is regarded as disease-free, or with a surveillance or eradication programme, and the consignment comprises species listed in table C of the document published by the Secretary of State, with the consent of the Welsh Ministers, in accordance with regulation 3B of the Aquatic Animal Health (England and Wales) Regulations 2009, or species listed in a document published by the Scottish Ministers in accordance with regulation 3B of the Aquatic Animal Health (Scotland) Regulations 2009 as susceptible to OsHV-1 µvar.

Data on the areas of Great Britain or parts thereof which are regarded as disease-free, or subject to a surveillance or eradication programme for OsHV-1 µvar are accessible at:

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>
<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

These requirements shall not apply to consignments intended for a quarantine facility complying with the requirements at least equivalent to those laid down in Decision 2008/946.

**Placing on market aquaculture open
ornamental from British Islands
(non-GB) into GB (BI-OO)
GBHC674**

Relevant GB requirements:

- (a) The aquaculture animals must originate from a country/territory, zone or compartment where OsHV-1 μ var must be notifiable to the competent authority and reports of suspicion of infection of the relevant disease must be immediately investigated by the competent authority
- (c) The aquaculture animals must originate from a country/territory, zone or compartment which:
 - EITHER** comply with requirements for disease freedom equivalent to those laid down in Decision 2009/177
 - AND/OR** in the case of consignments intended for a zone or compartment with a surveillance or eradication programme, which itself is also covered by a surveillance or eradication programme

Where the aquaculture animals have been subject to quarantine, this must have been under conditions at least equivalent to those laid down in Decision 2008/946.

AH/T510A Territory requirements

This attestation applies to consignments of aquaculture animals which according to Article 8 of Regulation No 1251/2008 must be accompanied by a certificate and which in compliance with the placing on the market requirements are allowed by the competent authority to leave an area subject to control provisions or a country/territory, zone or compartment with an eradication programme.

Relevant GB requirements:

The consignment must be identified by a legible label on the exterior of the container, or when transported by well boat, in the ship's manifest, with the relevant information referred to in boxes I.7 to I.13 of Part I of this certificate and the statement as detailed in the attestation.

AH/A261 Animal requirements

No further notes for completion

AH/A359C Animal transport

Relevant GB requirements:

The aquaculture animals or products must:

- (a) be placed under conditions, including with a water quality, that do not alter their health status,
- (b) as appropriate, comply with the general conditions for the transport of animals laid down in Article 3 of Regulation No 1/2005

and

- (c) the transport container or well boat prior to loading must be clean and disinfected or previously unused

AH/A360C Animal transport (labelling)

Relevant GB requirements

The consignment must be identified by a legible label on the exterior of the container, or when transported by well boat, in the ship's manifest, with the relevant information referred to in boxes I.7 to I.13 of Part I of this certificate and the statement as detailed in the attestation.

AH/A721B Animal requirements

Relevant GB requirements:

The aquaculture animals must comply with the requirements for placing on the market laid down in Regulation 1251/2008

AH/A722 Animal requirements

Regarding inspection, the 24-hour option applies only to consignments of aquaculture animals which according to Article 8 of Regulation No 1251/2008 must be accompanied by a certificate and which in

**Placing on market aquaculture open
ornamental from British Islands
(non-GB) into GB (BI-OO)
GBHC674**

compliance with the placing on the market requirements are allowed by the competent authority to leave an area subject to control provisions or a country/territory, zone or compartment with an eradication programme approved in accordance with Article 44(2) of that Directive. In all other cases the 72-hour option applies.

In the case of wild aquatic animals, the third option only applies to consignments of aquaculture animals caught in the wild and immediately transported to a farm or mollusc farming area without any temporary storage

MODEL CERTIFICATE ONLY
