Dear Mr Hyland,

**SCREENING DECISION BY THE SECRETARY OF STATE UNDER THE
ELECTRICITY WORKS (ENVIRONMENTAL IMPACT ASSESSMENT)
(ENGLAND AND WALES) REGULATIONS 2017 (“THE 2017
REGULATIONS”)**

NAME OF SCHEME: VV LINE BLUE BRIDGE HARRY STOKE CW51143

Screening decision on an application for a proposed development (“the proposed development”) to:

- Install one new tower to connect to the overhead line from an existing tower.

The Secretary of State has considered the factors set out in Schedule 3 of the 2017 Regulations, together with the information within the supplied documentation (“the Application”) by National Grid Electricity Distribution (“the Applicant”) in relation to the impacts on the environment of the proposed development and the views of South Gloucestershire Council (“the LPA”). In particular, in reaching his decision the Secretary of State notes the following factors:

1. The proposed development does not fall within Schedule 1 (mandatory EIA);
2. The proposed development falls under Schedule 2 of the 2017 Regulations as the electricity line is 132 kilovolts.

Department for
Energy Security
& Net Zero

3. The proposed development falls outside of areas which are environmentally sensitive.

Taking account of the abovementioned factors and information received, the Secretary of State concludes that the proposed works are not EIA development under the 2017 Regulations and do not require a statutory EIA as they are unlikely to have significant effects on the environment due to their nature, location and size. A copy of this letter has been sent to the LPA for information.

Yours sincerely,

Energy Infrastructure Planning
