Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Veolia ES (UK) Limited

Empire Treatment Works Stubbers Green Road Aldridge Walsall West Midlands WS9 8BL

Variation application number

EPR/XP3037SE/V009

Permit number

EPR/XP3037SE

Empire Treatment Works Permit number EPR/XP3037SE

Introductory note

This introductory note does not form a part of the notice

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. Only the variations specified in schedule 1 are subject to a right of appeal.

This variation adds an additional treatment tank (T5) and mixer unit (Mixer 4) to the existing APCr treatment process (AR3 and AR4). In addition, there are a number of healthcare wastes to be added to those already accepted on the site, for a variety of permitted treatment Activities on the site (AR2, AR3, AR5 and AR8). Some of these healthcare wastes will also be treated under a new Activity, added to the permit in this variation; repacking of wastes (AR10) – S5.3 A1(a)(iv). This Activity will be undertaken within the new Clinical Waste Building (formerly a Cyanide Plant located on the southern area of the site), prior to disposal off site. A Waste Operation Activity has also been included in this variation (A17) to allow for the storage prior to repackaging and transfer of non-hazardous healthcare wastes as part of the site's operations.

A new Pre-Operational Condition (PO5) for future development has been included in the permit, with an Improvement Condition (IP22) to specify the reporting required during the phased development of the APCr treatment plant. This Pre-Operational Condition relates to the replacement of Emission Point A6 with a new three-stage scrubber unit at Emission Point A18 and new mixer units 1 and 2, which will eventually replace Mixers 1 to 3 and Trial Mixer 4.

The main features of the installation remain the same and are as follows:

Empire Treatment Works is an Installation operated by Veolia ES (UK) Limited (formally Onyx UK Limited and Veolia ES (Onyx) Limited) at Stubbers Green Road, Aldridge, West Midlands (SK 0430 0230). The site has operated under waste management licences since the 1970's.

The installation is approximately 2km north of Aldridge and is situated adjacent to the Daw End Branch of the Wyrley and Essington Canal. The surrounding area is a mixture of residential, commercial and industrial developments. Extensive clay extraction is ongoing north and south of the installation for brick making, and neighbouring former clay pits have been extensively used for landfilling. Historically coal mining has been undertaken in the area, and underground strata have formerly been used for waste disposal, though this practice has been discontinued.

The nearest residential properties are to the north east and east of the site in Walsall Wood and Leighswood, though occupied houseboats are present in the canal basin to the east of the site. There are four Sites of Special Scientific Interest (SSSIs) within 2km of the installation: Swan Pool and the Swag, Stubbers Green Bog, Jockey Field, and Daw End Railway Cutting and a Special Area of Conservation within 10km of the installation: Cannock Extension Canal.

The main activity carried out at the site is the treatment of hazardous and non-hazardous wastes by neutralisation, settlement and filtration, with the resulting solid waste residue disposed of to landfill and the liquid effluent disposed of to sewer. Ancillary operations on the site include associated waste storage, oil/water separation, drum washing, crushing and shedding and a road tanker barrel washout facility.

Other than the emissions to landfill and sewer mentioned above, the main potential emissions from the site are gases arising from waste treatment and fugitive emissions and spillages to ground from waste handling, accidents etc. In addition, the Permit contains conditions, which control noise, dust, or odours that may potentially arise from operation of the site.

Waste is treated in a range of treatment vessels and equipment, which are enclosed and vented via chemical scrubbers, which remove gases released by the treatment processes.

The site is surfaced with hardstanding and is designed to contain any spillages. Drainage arising from the site is treated through the treatment process prior to discharge to foul sewer.

The Operator uses a system of written operating procedures to ensure that activities at the site are controlled to prevent pollution. Operations are controlled via an Environmental Management System (EMS) accredited to ISO 14001. The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit					
Description	Date	Comments			
Application received XP3037SE	Duly made 22/09/05	Application for hazardous and non-hazardous waste treatment.

Variation determined EPR/XP3037SE	17/03/17	Varied and consolidated permit issued in modern condition format.			
Application EPR/XP3037SE/V008 (variation and consolidation)	Duly made 07/01/19	Application to add an additional tank for the blending of packaged liquid wastes prior to treatment within the main tank.			
Variation determined EPR/XP3037SE	19/03/19	Varied permit issued.			
Application EPR/XP3037SE/V009 (variation and consolidation)	Duly made 06/03/2023	Application to add an additional tank for the blending of packaged liquid wastes prior to treatment within the main tank. Includes the addition of an additional mixing unit as part of the treatment process. Phased reconfiguration of the APCr treatment plant carried out under an Improvement Programme. Variation includes additional Activity for repacking and transfer of healthcare wastes.			
Variation determined EPR/XP3037SE	08/08/2023	Varied and consolidated permit issued in the modern format.			

End of introductory note

Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2016

The Environment Agency in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2016 varies

Permit number

EPR/XP3037SE

Issued to

Veolia ES (UK) Limited ("the operator")

whose registered office is

210 Pentonville Road London N1 9JY

company registration number 02481991

to operate a regulated facility at

Empire Treatment Works Stubbers Green Road Aldridge Walsall West Midlands WS9 8BL

to the extent set out in the schedules.

The notice shall take effect from 08/08/2023.

Name	Date
Peter Kelly	08/08/2023

Authorised on behalf of the Environment Agency

Schedule 1

Only conditions listed below have been varied by the consolidated permit EPR/XP3037SE.

The following conditions were varied as a result of an Operator initiated variation:

Condition 2.1.2 has been updated to reflect the additional Installations and Waste Operations Activities added to this permit.

Conditions within section 2.4 have been removed, as there are no Improvement Conditions outstanding within this permit.

Condition 4.2.2 has been updated to reflect the inclusion of Installation and Waste Operation Activities.

Table S1.1 Has been updated to include a new Installations Activity (S5.3 Repackaging of Hazardous Waste) and the associated Waste Operation Activities for waste storage and repackaging for non-hazardous healthcare wastes. There has been some amendment to the descriptions of some of the site plant involved in waste treatment and storage;

- Activities AR3 and AR4 have been updated to add the new vessel (T5) and APCr mixer (AR4) respectively;
- Lime Silo 2 has been removed (AR2), as this item does not exist; and
- The 'Braithwaite Tank' has been added as a correctly named item of plant.

Table S1.2 has been updated to reflect the changes to the Site's Operating Techniques, including document submissions, the discharge of Pre-Operational Conditions 1 to 4 and the relevant Appropriate Measures Guidance.

Table S1.3 has been updated to reflect the discharge of the Improvement Conditions from the previous Permit Variation. It also contains a new improvement programme related to the reconfiguration of the APCr treatment plant and is tied in with a Pre-Operational Condition.

Table S1.4 has been updated to reflect the discharge of Pre-Operational Conditions from the previous variation. It also contains a new improvement programme related to the reconfiguration of the APCr treatment plant and is tied in with an Improvement Condition.

Table S2.2 Has been updated to add two new columns to reflect the additional Activities on site, along with the addition of a number of healthcare wastes to the Activities. The Table was also updated to correct an error in some of the named site plant.

Table S3.1 has had the details of emissions point A6 amended to reflect a correction from the Operator that the plant is a APCr mixer and not a PFA mixer. The BAT-AELs for A6, A16 and A18 have also been added to the emissions points as a result of the variation. The requirement for monitoring at emissions points A15 and A17 have also been updated as a result of the discharge of Pre-Operational Conditions 1 to 4.

Schedule 6 has been updated to reflect terminology and definitions used in the cases for the Activities added to the permit by this variation.

Schedule 7 – Site Layout/Emissions Locations Plan has been updated to reflect the update to the Activities on site.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document.

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/XP3037SE

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/XP3037SE/V009 authorising,

Veolia ES (UK) Limited ("the operator"),

whose registered office is

210 Pentonville Road London N1 9JY

company registration number 02481991

to operate an installation at

Empire Treatment Works Stubbers Green Road Aldridge Walsall West Midlands WS9 8BL

to the extent authorised by and subject to the conditions of this permit.

Name	Date
Peter Kelly	08/08/2023

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
 - (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances and those drawn to the attention of the operator as a result of complaints; and
 - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.
- 1.1.4 The operator shall comply with the requirements of an approved competence scheme.

1.2 Energy efficiency

- 1.2.1 For the following activities referenced in schedule 1, table S1.1 (AR1 to AR15), the operator shall:
 - (a) take appropriate measures to ensure that energy is used efficiently in the activities;
 - (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
 - (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

- 1.3.1 For the following activities referenced in schedule 1, table S1.1 (AR1 to AR15) the operator shall:
 - (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
 - (b) maintain records of raw materials and water used in the activities;
 - (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
 - (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

- 1.4.1 The operator shall take appropriate measures to ensure that:
 - (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
 - (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
 - (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1, table S1.1 (the "activities").
- 2.1.2 For the following activities referenced in schedule 1, table S1.1 (AR1 to AR15) waste authorised by this permit shall be clearly distinguished from any other waste on the site.

2.2 The site

2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.
- 2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation ("plan") specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 2.3.3 Any raw materials or fuels listed in schedule 2, table S2.1 shall conform to the specifications set out in that table.
- 2.3.4 Waste shall only be accepted if:
 - (a) it is of a type and quantity listed in schedule 2, table S2.2; and
 - (b) it conforms to the description in the documentation supplied by the producer and holder.
- 2.3.5 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
 - (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and
 - (e) the waste code of the waste.
- 2.3.6 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

Hazardous waste storage and treatment

2.3.7 Hazardous waste shall not be mixed, either with a different category of hazardous waste or with other waste, substances or materials, unless it is authorised by schedule 1, table S1.1 and appropriate measures are taken.

WEEE storage

2.3.8 The storage (including temporary storage) of WEEE shall be carried out in accordance with the technical requirements of Annex VIII of the WEEE Directive.

2.4 Improvement programme

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by the Environment Agency.
- 2.4.2 Except in the case of an improvement which consists only of a submission to the Environment Agency, the operator shall notify the Environment Agency within 14 days of completion of each improvement.

2.5 Pre-operational conditions

2.5.1 The operations specified in schedule 1, table S1.4 shall not commence until the measures specified in that table have been completed.

3 Emissions and monitoring

3.1 Emissions to water, air or land

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3, tables S3.1, S3.2 and S3.3.
- 3.1.2 The limits given in schedule 3 shall not be exceeded.
- 3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
 - (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
 - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.3.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to odour, submit to the Environment Agency for approval within the period specified, an odour management plan which identifies and minimises the risks of pollution from odour;
- (b) implement the approved odour management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.4 Noise and vibration

3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.4.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to noise and vibration, submit to the Environment Agency for approval within the period specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;
- (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.5 Monitoring

- 3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:
 - (a) point source emissions specified in tables S3.1, S3.2 and S3.3; and
 - (b) process monitoring specified in table S3.4.
- 3.5.2 The operator shall maintain records of all monitoring required by this permit including records of the taking and analysis of samples, instrument measurements (periodic and continual), calibrations, examinations, tests and surveys and any assessment or evaluation made on the basis of such data.
- 3.5.3 Monitoring equipment, techniques, personnel and organisations employed for the emissions monitoring programme and the environmental or other monitoring specified in condition 3.5.1 shall have either MCERTS certification or MCERTS accreditation (as appropriate), where available, unless otherwise agreed in writing by the Environment Agency.
- 3.5.4 Permanent means of access shall be provided to enable sampling/monitoring to be carried out in relation to the emission points specified in schedule 3, tables S3.1, S3.2 and S3.3 unless otherwise agreed in writing by the Environment Agency.

3.6 Pests

3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

3.6.2 The operator shall:

- if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution from pests;
- (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.7 Fire prevention

- 3.7.1 The operator shall take all appropriate measures to prevent fires on site and minimise the risk of pollution from them including, but not limited to, those specified in any approved fire prevention plan.
- 3.7.2 The operator shall:
 - (a) if notified by the Environment Agency that the activities are giving rise to a risk of fire, submit to the Environment Agency for approval within the period specified, a fire prevention plan which prevents fires and minimises the risk of pollution from fires:
 - (b) implement the fire prevention plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

- 4.1.1 All records required to be made by this permit shall:
 - (a) be legible;
 - (b) be made as soon as reasonably practicable;
 - (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
 - (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.
- 4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

- 4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.
- 4.2.2 For the following activities referenced in schedule 1, table S1.1 (AR1 to AR15) a report or reports on the performance of the activities over the previous year shall be submitted to the Environment Agency by 31 January (or other date agreed in writing by the Environment Agency) each year. The report(s) shall include as a minimum:
 - (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data;
 - (b) the annual production /treatment data set out in schedule 4, table S4.2; and

- (c) the performance parameters set out in schedule 4, table S4.3 using the forms specified in table S4.4 of that schedule.
- 4.2.3 Within 28 days of the end of the reporting period the operator shall, unless otherwise agreed in writing by the Environment Agency, submit reports of the monitoring and assessment carried out in accordance with the conditions of this permit, as follows:
 - (a) in respect of the parameters and emission points specified in schedule 4, table S4.1;
 - (b) for the reporting periods specified in schedule 4, table S4.1 and using the forms specified in schedule 4, table S4.4; and
 - (c) giving the information from such results and assessments as may be required by the forms specified in those tables.
- 4.2.4 The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.
- 4.2.5 Within 1 month of the end of each quarter, the operator shall submit to the Environment Agency using the form made available for the purpose, the information specified on the form relating to the site and the waste accepted and removed from it during the previous quarter.

4.3 Notifications

- 4.3.1 In the event:
 - (a) that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
 - (i) inform the Environment Agency,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
 - (b) of a breach of any permit condition the operator must immediately—
 - (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
 - (c) of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.
- 4.3.2 Any information provided under condition 4.3.1 where the information relates to the breach of a limit specified in the permit, shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.
- 4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.
- 4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:
 - Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (a) any change in the operator's name or address; and
- (b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual):
- (b) any change in the operator's name(s) or address(es); and
- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.
- 4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:
 - (a) the Environment Agency shall be notified at least 14 days before making the change; and
 - (b) the notification shall contain a description of the proposed change in operation.
- 4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.4 Interpretation

- 4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.
- 4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "immediately", in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1		Description of	Limits of specified activity and waste types
Activity reference	Activity listed in Schedule 1 of the EP Regulations	Description of specified activity and WFD Annex I and II operations	Limits of specified activity and waste types
AR1	S5.6 A1(a)	Temporary storage of hazardous waste with a total capacity exceeding 50	From receipt of waste to introduction to treatment processes or off site transfer for disposal and recovery.
			Storage for recovery limited to containerised waste.
		tonnes. (D15, R13)	Containerised wastes stored in the areas as detailed on drawing emp/ppcvar/040 and the waste transfer station.
			Bulk wastes stored in vessels AR3, AR4, AR5, AR6, AR7, AR8, Lime Silo 1 (LS1), PFT19, Jumbo, S1, S2, S3, S4, S5, S6.
		2, table S2.2, column 1. Waste types for bulk storage are specified in 2, table S2.2 column 1 with one tick (✓). Wa with 2 ticks (✓✓) are not suitable for bulk storage.	Containerised waste types are as specified in schedule 2, table S2.2, column 1.
			Waste types for bulk storage are specified in schedule 2, table S2.2 column 1 with one tick (✓). Waste codes with 2 ticks (✓✓) are not suitable for bulk storage.
			From receipt of oil waste to offsite transfer of oil waste (R13 only).
			Oil wastes stored in Vessels RT1, RT2.
			Brake fluids/antifreeze not contaminated with oil shall be stored in separate containers.
			Waste types for oil storage as specified in schedule 2, table S2.2, column 5.
			For Healthcare Wastes (Activity AR10)
			From receipt and storage of hazardous waste on site to its repackaging on site or its transfer off-site.
			The amount of hazardous healthcare waste stored on site at any one time shall not exceed 30 tonnes.
		The total amount of healthcare waste stored on site within the clinical waste building at any one time, including both hazardous and non-hazardous waste, shall not exceed 30 tonnes.	
			All healthcare waste shall be stored inside the clinical waste building and shall be stored on impermeable surfacing with sealed drainage.
			Waste shall not be stored in vehicles or vehicle trailers, unless they are being received for immediate offloading or prepared for imminent transfer (that is, they will be

Activity reference	Activity listed in Schedule 1 of the EP Regulations	Description of specified activity and WFD Annex I and II operations	Limits of specified activity and waste types
			removed from site within 24 hours, or 72 hours if over a weekend).
			Pharmaceutical, chemical, anatomical and palletised waste shall be stored securely within designated areas of the building.
			Infectious clinical waste shall be stored for no longer than 14 days.
			The following waste types shall be stored on site for no longer than 6 months:
			non-infectious cytotoxic and cytostatic medicines
			dental amalgam
			other hazardous chemicals or other hazardous wastes
			Notwithstanding the limits given above where a shorter storage time period is given in an agreed management plan then that time period shall take precedence.
			No waste types shall be submitted to this activity other than those hazardous wastes specified in Schedule 2, Table S2.3.
AR2	S5.3 A1(a)(ii)	Disposal of hazardous waste with a capacity exceeding 10 tonnes per day involving physico-	Consisting of pH adjustment, redox, and settlement (including addition of coagulants and flocculants).
			Vessels SP1, SP2, SP3, SP5, Jumbo, PFT19.
		chemical treatment (D9).	Waste types as specified in schedule 2, table S2.2, column 2.
			Including production of lime slurry in Lime Tank 1 (LT1).
AR3	S5.3 A1(a)(ii)	Disposal of hazardous waste with a capacity	Consisting acidification, mixing and settlement (Sludge conditioning).
		exceeding 10 tonnes per day involving physico-	Vessels T1, T2, T3, T4, T5, Jumbo, PFT19.
		chemical treatment (D9).	Waste types as specified in schedule 2, table S2.2, column 3.
AR4	S5.3 A1(a)(ii)	Disposal of hazardous waste with a capacity exceeding 10	Consisting of acidification and mixing.
			APC mixers 1, 2, 3 and 4.
		tonnes per day involving physico- chemical treatment (D9).	Waste types as specified in schedule 2, table S2.2, column 3.
AR5	S5.3 A1(a)(ii)	Disposal of hazardous waste	Filtration of wastes.
		with a capacity exceeding 10 tonnes per day involving physico-	Filter presses in Press Building.

Activity reference	Activity listed in Schedule 1 of the EP Regulations	Description of specified activity and WFD Annex I and II operations	Limits of specified activity and waste types
		chemical treatment (D9).	Waste types as specified in schedule 2, table S2.2, column 4 and wastes produced by treatment process under activity AR2.
AR6	S5.3 A1(a)(iv)	Re-packaging of hazardous wastes with a capacity exceeding 10 tonnes per day	Unpacking, sorting and repackaging of laboratory smalls wastes within the processing building shown on plan EMP_SL_0100. Waste types as specified in schedule 2, table S2.2,
		(D14).	column 8 consisting of substances in containers of less than 5 litre capacity.
AR7	S5.3 A1(a)(ii) & S5.3 A1(a)(iv) (Aggregation of capacities)	Disposal of hazardous waste with a capacity exceeding 10 tonnes per day (in aggregate) involving: Physico-chemical treatment (D9, R4). Repackaging prior to submission for disposal (D14).	 Treatment limited to: treatment of gases from cylinders by absorption, adsorption, dissolution and neutralisation with limit not exceeding 3 tonnes of cylinders per day. Maximum of 300 tonnes of cylinders per annum. Cylinder treatment shall be carried out in accordance with the approved Operating Techniques in Table S1.2. washing of containers. crushing and shredding of washed containers arising from storage and treatment operations. crushing and shredding of containers shall be limited to less than 5 tonnes per day. Unpacking, sorting and repackaging of non-laboratory small wastes within designated locations shown on plan EMP_SL_0100. repackaging of waste shall be limited to less than 7 tonnes per day. Waste types for cylinder treatment are specified in schedule 2, table S2.2, column 6. Waste types for crushing and shredding are specified in schedule 2, table S2.2, column 6.
AR8	S5.3 A1(a)(ii)	Disposal of hazardous waste with a capacity exceeding 10 tonnes per day involving physico-chemical treatment (D9).	 in schedule 2, table S2.2, column 7. Treatment via the De-Pack system limited to: maximum of 999 tonnes of permitted wastes treated per annum. shredding and washing treatment only. shredding and washing of containers shall be limited to 10 tonnes per day. shredding and washing of wastes within designated locations shown on plan Drawing D_PACK_009A. Waste types for shredding and washing are specified in schedule 2, table S2.2, column 9. Hazardous wastes must be treated in separate batches from non-hazardous wastes. The De-pack system shall be cleaned and cleared between hazardous and non-hazardous batches.

Activity reference	Activity listed in Schedule 1 of the EP Regulations	Description of specified activity and WFD Annex I and II operations	Limits of specified activity and waste types
			Only hazardous wastes with the hazardous properties HP4, HP5, and HP14 shall be treated in the De-pack system.
			Hazardous wastes with HP6 hazardous properties shall only be processed in the De-pack system with prior written agreement from the Environment Agency.
			No wastes contained in pressurised containers shall be processed in the De-pack system.
AR9	S5.3 A1(a)(iii)	Disposal of hazardous waste with a capacity	Pre-treatment via blending prior to submission to activity AR3.
		exceeding 10 tonnes per day	Vessel SP4.
		involving blending (D13).	Waste types as specified in schedule 2, table S2.2, column 2.
AR10	Section 5.3 Part A (1)(a)(iv) Disposal or	Repackaging of hazardous waste.	From repackaging to storage of nominally empty containers and bulked wastes.
		R12 Exchange of	Repackaging is limited to:
ha	recovery of hazardous waste with a	waste for submission to any of the operations numbered R1 to R11 (repackaging)	 taking a waste package (for example a bag, jar, drum or box) out of one cart or bulk container and placing it into another cart or bulk container.
	exceeding 10 R11 (repackaging)		taking a waste package from a cart or bulk container and placing it onto a pallet or vehicle.
	involving repackaging.	D14 Repackaging prior to submission to any	taking a waste package from a pallet and placing it into a cart or bulk container.
	of the operations numbered D1 to	Healthcare waste shall not be transferred, removed or separated from its original packaging.	
		D13	Wastes that are directly mixed together during repackaging shall have the same EWC code and similar chemical composition. A reaction shall not result from repackaging waste.
			The repackaging of wastes shall not result in:
			a reaction of the blended or mixed wastes with each other
			a reaction with the container in which the wastes are being placed
		Where containers are repackaged but not directly mixed, incompatible wastes shall not be repackaged together in the same container.	
			Repackaging shall take place in the clinical waste building, as shown on the layout plan in Schedule 7 of this permit, on impermeable surfacing with sealed drainage.
			Fugitive emissions shall be minimised during repackaging.

Table S1.1	Activities			
Activity reference	Activity listed in Schedule 1 of the EP Regulations	Description of specified activ and WFD Anne and II operation	×Ι	Limits of specified activity and waste types
				Repackaging of waste shall not change either the maximum storage times for waste on site or the amount that can be stored at any one time.
				No waste types shall be submitted to this activity other than those hazardous wastes specified in Schedule 2, Table S2.3.
	Directly Associ	ated Activity

Reference	Requirement	Date
IP1 - IP21	Removed by Variation EPR/XP3037SE/V009	Completed
IP22	The Operator shall submit to the Environment Agency in writing for approval, a report to confirm commissioning of the reconfigured and phased replacement of plant used in the treatment of APCr, as outlined in Pre-Operational Condition 5, Table S1.4 and in the H1 Assessment received by the Environment Agency on 6th March 2023, reference v2 and dated February 2023. The report will contain verification of the modelling data and conclusions within the H1 Assessment or a revised H1 Assessment based on the emissions data obtained after the phased reconfiguration of the treatment plant under normal operating conditions. Monitoring and reporting will be carried out; • For the following parameters; • Ammonia; • TVOC; • Particulates; • Hydrogen Chloride; • Hydrogen Sulphide; • Nitrogen Dioxide; • Chlorine; • Sulphuric Acid; • Within 1 month following the installation and commissioning of the scrubber at emissions point A18; and • Within 1 month of the installation and commissioning of each of the new mixers (New Mixer 1 and New Mixer 2). Should monitoring results deviate from the levels predicted by the modelling revised conclusions shall be submitted for approval.	Final Report submitted in writing to the Environment Agency within 4 months of the completion of commissioning of all items of plant mentioned in PO5, Table S1.4.

20 01 30	detergents other than those mentioned in 20 01 29		✓	✓					√	
20 01 33*	batteries and accumulators included in 16 06 01, 16 06 02 or 16 06 03 and unsorted batteries and accumulators containing these batteries	11								
20 01 35*	discarded electrical and electronic equipment other than those mentioned in 20 01 21 and 20 01 23 containing hazardous components	11								
20 01 37*	wood containing dangerous substances	√ √								

Note 1 – Waste under this code can only be processed under activity A8 if agreed with the Environment Agency in writing.

Table S2.3 Permi	itted waste types and quantities for repackaging (AR10 and AR16) and storage
Maximum quantity	The total quantity of wastes accepted and stored at the site shall not exceed 30 tonnes at any one time.
Waste code	Description
18	WASTES FROM HUMAN OR ANIMAL HEALTH CARE AND/OR RELATED RESEARCH (EXCEPT KITCHEN AND RESTAURANT WASTES NOT ARISING FROM IMMEDIATE HEALTH CARE)
18 01	wastes from natal care, diagnosis, treatment or prevention of disease in humans
18 01 01	non-infectious sharps, not contaminated with chemicals or medicines
18 01 01 and 18 01 09	non-infectious sharps from vaccines delivered in mass vaccination centres, in the community and in care homes
18 01 03*	infectious waste, not contaminated with chemicals or medicines (may contain sharps) infectious gypsum wastes (for example, plaster casts and moulds)
18 01 03* and 18 01 06* or 18 01 07	infectious waste, contaminated with chemicals
18 01 03* and 18 01 09	infectious waste, medicinally contaminated (not cytotoxic or cytostatic) – (may contain sharps)
18 01 04	non-infectious offensive waste – human healthcare
	non-infectious gypsum wastes (for example, plaster casts and moulds)
18 01 06*	chemicals consisting of or containing hazardous substances
18 01 07	chemicals other than those mentioned in 18 01 06
18 01 08*	cytotoxic and cytostatic medicines
18 01 10*	amalgam waste from dental care
18 02	wastes from research, diagnosis, treatment or prevention of disease involving animals
18 02 01	non-infectious sharps, not contaminated with chemicals or medicines
18 02 02*	infectious waste, not contaminated with chemicals or medicines (may contain sharps)
10 02 02	infectious gypsum wastes (for example, plaster casts and moulds)
18 02 02* and 18 02 05* or 18 02 06	infectious waste, contaminated with chemicals
18 02 02* and 18 02 08	infectious waste, medicinally contaminated (not cytotoxic or cytostatic) (may contain sharps)
18 02 03	non-infectious offensive waste non-infectious gypsum wastes (for example, plaster casts and moulds)
18 02 05*	chemicals consisting of or containing dangerous substances
18 02 06	chemicals other than those mentioned in 18 02 05
18 02 07*	cytotoxic and cytostatic medicines
18 02 08	other waste medicines, excluding cytotoxic and cytostatic

Schedule 3 – Emissions and monitoring

Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference period	Monitoring frequency (note 1)	Monitoring standard or method
A1 [Point A1 on site plan ref. EMP_SL_0100]	Drum crusher and shredder scrubber					
A6 [Point A6 on site plan ref. EMP_SL_0100] (subject to completion of Improvement Condition 5, Table S1.3).	2_SL_0100] and Process Bay to completion of ment Condition	Particulates	5 mg/m ³	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	BS EN 13284-1
		Total volatile organic compounds (TVOC)	No limit set	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	BS EN 12619
		NH₃	No limit set	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	EN ISO 21877
A18 [Point A18 on site plan ref. EMP_SL_0100] Once pre-requisite requirements of Pre-Operational Condition 5,	APCr mixer abatement and Process Bay	Particulates	5 mg/m ³	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	BS EN 13284-1
Table S1.4 are met.		Total volatile organic compounds (TVOC)	No limit set	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	BS EN 12619
		NH ₃	No limit set	Average values of 3 consecutive measurements of	Every six months	EN ISO 21877

Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference period	Monitoring frequency (note 1)	Monitoring standard or method
				at least 30 minutes each		
A7 [Point A7/8 on site plan ref. EMP_SL_0100]	Dust filter LSDS1 serving Lime silo 1					
A9 [Point A9 on site plan ref. EMP_SL_0100]	Dust filter APCDF1 serving silo APC1					
A10 [Point A10 on site plan ref. EMP_SL_0100]	Dust filter APCDF2 serving silo APC2					
A11 [Point A11 on site plan ref. EMP_SL_0100]	Dust filter APCDF3 serving silo APC3					
A12 [Point A12 on site plan ref. EMP_SL_0100]	Dust filter APCDF4 serving silo APC4					
A13 [Point A13 on site plan ref. EMP_SL_0100]	Dust filter APCDF5 serving APC5 silo					
A14 [Point A14 on site plan ref. EMP_SL_0100]	Dust filter APCDF6 serving silo APC6					
A15 [Point A15 on site plan ref. EMP_SL_0100]	Scrubber LSRS1 serving laboratory smalls processing building	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency
A16 [Point A16 on site plan ref. EMP_SL_0100]	Scrubber for PFT19, acid storage (AR3- AR8), SP 1-5, Jumbo and APC sludge tanks and T1 to T5	Particulates	5 mg/m ³	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	BS EN 13284-1
		Total volatile organic compounds (TVOC)	No limit set	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	BS EN 12619

Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference period	Monitoring frequency (note 1)	Monitoring standard or method
		NH ₃	No limit set	Average values of 3 consecutive measurements of at least 30 minutes each	Every six months	EN ISO 21877
A17 (emission point 17 on site plan ref. EMP_SL_0100)	Cylinder processing scrubber	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency	As agreed in writing with the Environment Agency

Table S3.2 Point Source e	missions to water (othe	er than sewer) and land	d – emission limits	and monitoring requ	uirements

Trent Water Ltd sewer		COD	3,000 kg/d			agreed in writing by the
to Goscote Sewage Treatment Works		Suspended Solids	1000 mg/l			Agency.
		Total Cyanide	10 mg/l			
		Total Sulphides	1 mg/l			

Emission point ref. & location	Source	Parameter	Limit (incl. Unit)	Reference period	Monitoring frequency	Monitoring standard or method
		Total Phenols	32 kg/d			
		Monohydric phenols	250 mg/l			
		Cadmium	50 μg/l			
		Chromium	1.5 mg/l	Prior to discharge		
		Copper	3.5 mg/l	Spot sample	Prior to discharge	
		Lead	0.5 mg/l			
		Nickel	5 mg/l			
		Silver	0.4 mg/l			
		Tin	0.4 mg/l			
		Zinc	5 mg/l			
		Volume	350 m ³ /d	24 hour	When discharging	Ultrasonic Flow sens
		Discharge rate	8 l/s	Instantaneous		

Table S3.4 Process monitoring requirement	ents			
Emission point reference or source or description of point of measurement	Parameter	Monitoring frequency 1	Monitoring standard or method	Other specifications
A1, Scrubber serving drum crusher and shredder unit	NaOH concentration	Daily	Not applicable	
A16, Scrubber serving PFT19, acid storage (AR3-AR8), SP 1-5, Jumbo and APC sludge tanks and T1 to T5			Not applicable	
Footnote ¹ – Monitoring only required when o	drum crusher and shredder u	init served by the scrubbe	er A1 is in use.	

Schedule 4 – Reporting

Parameters, for which reports shall be made, in accordance with conditions of this permit, are listed below.

Table S4.1 Reporting of monitor	oring data		
Parameter	Emission or monitoring point/reference	Reporting period	Period begins
Emissions to sewer	S1	Every 6 months	1 January, 1 July
Parameters as required by condition 3.5.1.			

Table S4.2 Annual production/treatment	
Parameter	Units
Effluent discharged to sewer	tonnes

Table S4.3 Performance parameter	s	
Parameter	Frequency of assessment	Units
Water usage	Annually	tonnes
Energy usage	Annually	MWh

Table S4.4 Reporting form	s	
Media/parameter	Reporting format	Date of form
Sewer	Form sewer 1 or other form as agreed in writing by the Environment Agency	24/11/2006
Water usage	Form water usage 1 or other form as agreed in writing by the Environment Agency	24/11/2006
Energy usage	Form energy 1 or other form as agreed in writing by the Environment Agency	24/11/2006
Other performance indicators	Form performance 1 or other form as agreed in writing by the Environment Agency	24/11/2006

Schedule 5 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	
	any malfunction, breakdown or failure of equipment or techniques, ince not controlled by an emission limit which has caused, is pollution
To be notified within 24 hours of	detection
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	
(b) Notification requirements for t	the breach of a limit
To be notified within 24 hours of	detection unless otherwise specified below
Emission point reference/ source	
Parameter(s)	

Limit

Measured value and uncertainty

Date and time of monitoring

To be notified within 24 hours of detection unless other	vise specified below
Measures taken, or intended to be taken, to stop the emission	
Time periods for notification following detection of a bre	ach of a limit
Parameter	Notification period
(c) Notification requirements for the detection of any sig	nificant adverse environmental effect
To be notified within 24 hours of detection	
Description of where the effect on	
the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	
	practicable
Part B – to be submitted as soon as Any more accurate information on the matters for	practicable
	practicable
Part B – to be submitted as soon as Any more accurate information on the matters for notification under Part A. Measures taken, or intended to be taken, to prevent a recurrence of the incident Measures taken, or intended to be taken, to rectify,	practicable
Part B – to be submitted as soon as Any more accurate information on the matters for notification under Part A. Measures taken, or intended to be taken, to prevent a recurrence of the incident Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission The dates of any unauthorised emissions from the	practicable
Part B – to be submitted as soon as Any more accurate information on the matters for notification under Part A. Measures taken, or intended to be taken, to prevent a recurrence of the incident Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission The dates of any unauthorised emissions from the	practicable
Part B – to be submitted as soon as Any more accurate information on the matters for notification under Part A. Measures taken, or intended to be taken, to prevent a recurrence of the incident Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission The dates of any unauthorised emissions from the	practicable
Part B – to be submitted as soon as Any more accurate information on the matters for notification under Part A. Measures taken, or intended to be taken, to prevent a recurrence of the incident Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission The dates of any unauthorised emissions from the facility in the preceding 24 months.	practicable
Part B – to be submitted as soon as Any more accurate information on the matters for notification under Part A. Measures taken, or intended to be taken, to prevent a recurrence of the incident Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission The dates of any unauthorised emissions from the facility in the preceding 24 months.	practicable

^{*} authorised to sign on behalf of Veolia ES (UK) Ltd

Schedule 6 - Interpretation

"accident" means an accident that may result in pollution.

"application" means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

"authorised officer" means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

"background concentration" means such concentration of that substance as is present in:

- · for emissions to surface water, the surface water quality up-gradient of the site; or
- for emissions to sewer, the surface water quality up-gradient of the sewage treatment works discharge.

"best available treatment, recovery and recycling techniques" shall have the meaning given to it in the document published jointly by the Department for Environment, Food and Rural Affairs, the Welsh Assembly Government and the Scottish Executive on 27th November 2006, entitled "Guidance on Best Available Treatment, Recovery and Recycling Techniques (BATRRT) and Treatment of Waste Electrical and Electronic Equipment (WEEE).

"building" is a covered structure enclosed on all vertical sides that provides sheltered cover and contains emissions of, for example, noise, particulate matter, odour and litter.

"clinical" waste means waste from a healthcare activity (including veterinary healthcare) that:

- a) contains viable micro-organisms or their toxins which are known or reliably believed to cause disease in humans or other living organisms
- b) contains or is contaminated with a medicine that contains a biologically active pharmaceutical agent
- c) is a sharp, or a body fluid or other biological material (including human and animal tissue) containing or contaminated with a hazardous substance

and waste of a similar nature from a non-healthcare activity.

"container" is a receptacle for waste for example bags, bins, boxes, drums, IBCs and blister packs. Wastes may be packaged in more than one receptacle for example a bag in a box.

"controlled substances" means chlorofluorocarbons, other fully halogenated chlorofluorocarbons, halons, carbon tetrachloride, 1,1,1-trichloroethane, methyl bromide, hydrobromofluorocarbons and hydrochlorofluorocarbons listed in Annex I of Regulation (EC) No 2037/2000 of the European Parliament and of the Council of 29 June 2000 on substances that deplete the ozone layer, including their isomers, whether alone or in a mixture, and whether they are virgin, recovered, recycled or reclaimed. This definition shall not cover any controlled substance which is in a manufactured product other than a container used for the transportation or storage of that substance, or insignificant quantities of any controlled substance, originating from inadvertent or coincidental production during a manufacturing process, from unreacted feedstock, or from use as a processing agent which is present in chemical substances as trace impurities, or that is emitted during product manufacture or handling.

"cytotoxic and cytostatic medicines" are medicinal products that possess one or more of the hazardous properties acutely toxic, carcinogenic, mutagenic or toxic for reproduction.

"D" means a disposal operation provided for in Annex I to Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on Waste.

"disposal". Means any of the operations provided for in Annex I to Directive 2008/98/EC of the European Parliament and of the Council on waste.

"emissions to land" includes emissions to groundwater.

"emissions of substances not controlled by emission limits" means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission or background concentration limit.

"EP Regulations" means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

"groundwater" means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

"hazardous property" has the meaning given in Schedule 3 of the Hazardous Waste (England and Wales) Regulations 2005 No.894 and the Hazardous Waste (Wales) Regulations 2005 No. 1806 (W.138).

"hazardous substance" means a substance classified as hazardous as a consequence of fulfilling the criteria laid down in parts 2 to 5 of Annex I to Regulation (EC) No 1272/2008.

"hazardous waste" has the meaning given in the Hazardous Waste (England and Wales) Regulations 2005.

"healthcare waste" means waste produced during human or animal healthcare, or related research activities. It covers both clinical and offensive waste. Wastes produced by healthcare in the community, and similar types of waste produced by non-healthcare activities are included, for example:

- cosmetic body piercing and body art
- non-medicinal procedures in the hair and beauty sector
- · substance abuse
- crime scene clean-up

"impermeable surface" means a surface or pavement constructed and maintained to a standard sufficient to prevent the transmission of liquids beyond the pavement surface.

"Industrial Emissions Directive" means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions, as read in accordance with Schedule 1A to the Environmental Permitting (England and Wales) Regulations 2016.

"MCERTS" means the Environment Agency's Monitoring Certification Scheme.

"medicines" are "medicinal products" as defined in Regulation 130 of Part VIII of the Medicines Act 1968. Waste medicines (or pharmaceutical waste) include:

- expired, unused, spilt and contaminated medical products that are no longer required and need to be disposed of appropriately;
- discarded items contaminated with medicines such as bottles or boxes with residues, gloves, masks,

"mixing of hazardous waste" means mixing hazardous waste as defined by Regulation 18 of the Hazardous Waste (England and Wales) Regulations 2005.

"offensive waste" is waste that:

- is not clinical waste
- · contains body fluids, secretions or excretions
- falls within waste codes 18 01 04, 18 02 03 or 20 01 99.

"pests" means birds, vermin and insects.

"quarter" means a calendar year quarter commencing on 1 January, 1 April, 1 July or 1 October.

"recovery" means any of the operations provided for in Annex II to Directive 2008/98/EC of the European Parliament and of the Council on waste.

"repackaging" is:

 taking a waste package for example a bag, drum or box out of one cart or bulk container for example, skip and placing it into another cart or bulk container for example, skip

- taking a waste package from a cart or bulk container for example, skip and placing it onto a pallet or vehicle
- taking a waste package from a pallet and placing it into a cart or bulk container for example, skip
- transferring, removing or separating waste from its primary packaging into another container

"sealed container" for the purposes of this permit, means a container which is fully enclosed, weather proof, does not allow any solid or liquid content to escape and is lockable.

"sealed drainage" in relation to an impermeable surface means a drainage system with impermeable components which does not leak and which will ensure that:

- no liquid will run off the surface otherwise than via the system
- except where they may lawfully be discharged to foul sewer, all liquids entering the system are collected in a sealed sump

"sharps" means items that could cause cuts or puncture wounds. They include needles, hypodermic needles, scalpels and other blades, knives, infusion sets, saws, broken glass, and nails.

"Solvent Emissions Directive" means Directive 1999/13/EC (as amended by Directive 2004/42/EC) on the limitation of emissions of volatile organic compounds due to the use of organic solvents in certain activities and installations.

"Waste code" means the six digit code referable to a type of waste in accordance with the List of Wastes (England)Regulations 2005, or List of Wastes (Wales) Regulations 2005, as appropriate, and in relation to hazardous waste, includes the asterisk.

"Waste Framework Directive" or "WFD" means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste.

"year" means calendar year ending 31 December.

Where a minimum limit is set for any emission parameter, for example pH, reference to exceeding the limit shall mean that the parameter shall not be less than that limit.

Unless otherwise stated, any references in this permit to concentrations of substances in emissions into air means:

- (a) in relation to emissions from combustion processes, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 3% dry for liquid and gaseous fuels, 6% dry for solid fuels; and/or
- (b) in relation to emissions from non-combustion sources, the concentration at a temperature of 273K and at a pressure of 101.3 kPa, with no correction for water vapour content.

When the following terms appear in the waste code list in Schedule 2, they have the meaning given below:

'hazardous substance' means a substance classified as hazardous as a consequence of fulfilling the criteria laid down in parts 2 to 5 of Annex I to Regulation (EC) No 1272/2008.

'heavy metal' means any compound of antimony, arsenic, cadmium, chromium (VI), copper, lead, mercury, nickel, selenium, tellurium, thallium and tin, as well as these materials in metallic form, as far as these are classified as hazardous substances.

'PCBs' means

- polychlorinated biphenyls
- · polychlorinated terphenyls
- monomethyl-tetrachlorodiphenyl methane, Monomethyl-dichloro-diphenyl methane, Monomethyldibromodiphenyl methane
- any mixture containing any of the above mentioned substances in a total of more than 0.005% by weight

'transition metals' means any of the following metals: any compound of scandium, vanadium, manganese, cobalt, copper, yttrium, niobium, hafnium, tungsten, titanium, chromium, iron, nickel, zinc, zirconium,

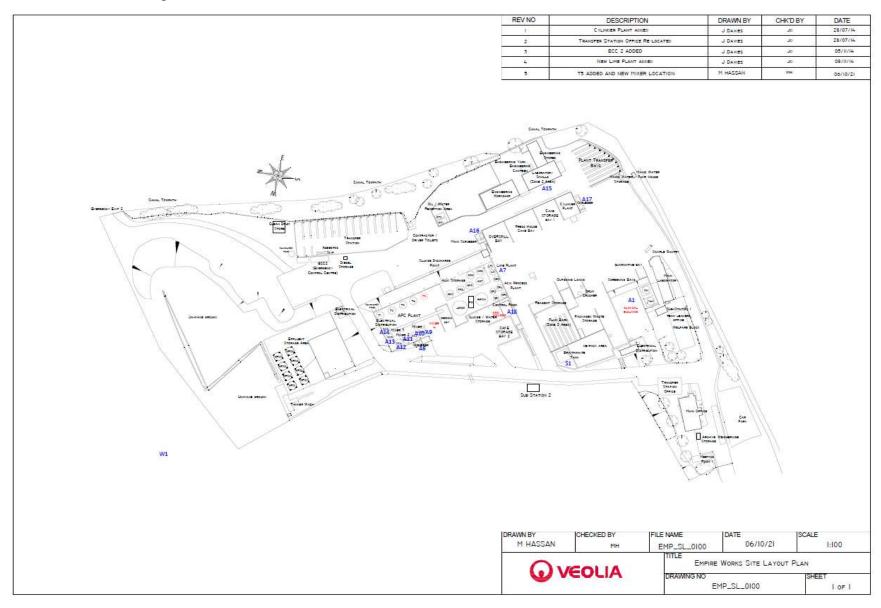

molybdenum and tantalum, as well as these materials in metallic form, as far as these are classified as hazardous substances.

'stabilisation' means processes which change the hazardousness of the constituents in the waste and transform hazardous waste into non-hazardous waste.

'solidification' means processes which only change the physical state of the waste by using additives without changing the chemical properties of the waste.

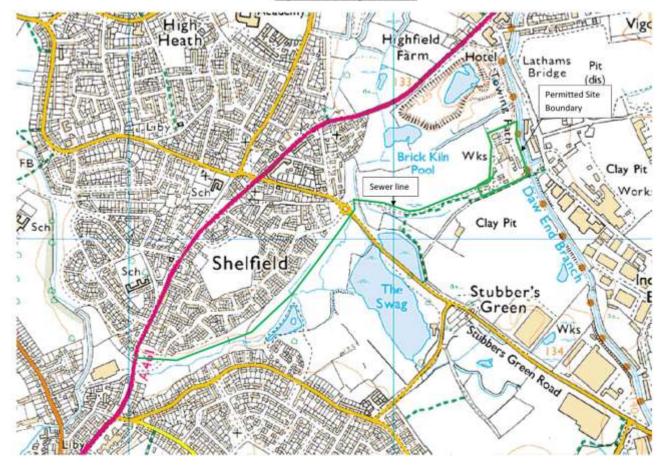

'partly stabilised wastes' means wastes containing, after the stabilisation process, hazardous constituents which have not been changed completely into non-hazardous constituents and could be released into the environment in the short, middle or long term.

Schedule 7 – Site plan

Site Plan - Layout and Emissions Points

Empire Sewer Discharge Line from 51

This plan shows the extent of the effluent pipeline (green line) that is included within the installation.
