Subject: Destruction of the environment at Bulls Field Takeley

I would like to oppose the planned deployment proposed on the farm land and natural environment in Bulls Field Takeley, this constant destruction of the flora and fauna of this part of Essex and its loss of habitat and biodiversity for the wildlife is a major threat to the ecosystem if this project goes ahead as there are rare amphibians living in the area such as newts of various species along with Frogs and toads and that is without any of the other wildlife such as hedgehogs/birds/ butterflies etc and their loss of habitat to name a few species, how this relentless destruction of the beautiful Essex countryside is considered GREEN is beyond belief, the amount of crop growing land that is being destroyed for housing in this area is staggering, the country has to already import over half its food so this relentless destruction makes no sense as once this wildlife habitat and ecosystem has been decimated it will be gone and lost forever.

Regards

J and A .Hudson.
