

Russia

Country name	Russia
State title	Russian Federation
Name of citizen	Russian
Official language	Russian (<i>rus</i>) ¹
Country name in official language	Россия (Rossiya)
State title in official language	Российская Федерация (Rossiyskaya Federatsiya)
Script	Russian Cyrillic
Romanization System	BGN/PCGN Romanization System for Russian
ISO-3166 code (alpha-2/alpha-3)	RU/RUS
English conventional name for capital	Moscow
Local name of capital	Москва (Moskva)

Introduction

Russia is by far the largest country in the world in terms of area, and is considered the legal successor to the Soviet Union (USSR)², which broke up in 1991. Russia has amongst the lowest population density in the world (overall 9/km²), with vast areas of the east being very sparsely populated. In addition to over 37,000 km of coastline, Russia has land borders with 14 other countries: Norway, Finland, Estonia, Latvia, Lithuania, Poland, Belarus, Ukraine, Georgia, Azerbaijan, Kazakhstan, China, Mongolia, and North Korea, of which 8 were part of the Soviet Union.

Geographical names policy

Geographical names in Russia are found written in Russian Cyrillic, reflecting the country's national official language and script. Where possible, names should be taken from official Russian sources and romanized using the [BGN/PCGN Romanization System for Russian](#). This romanization system differs from that used in Russia³, so romanized sources produced in Russia cannot be used for HMG products.

The US Board on Geographic Names Geographic Names Server: [GNS Search & Download WebApp \(nga.mil\)](#) is a good source of names for Russia.

¹ ISO 639 codes are given for the languages mentioned in this Factfile.

² Though interestingly the stipulation of this status was only made in the 2020 amendment to the Russian Constitution.

³ The Russian system is GOST 16876-71: <https://gostperevod.com/gost-16876-71.html>

Areas of Ukraine that have been illegally invaded by Russia, including those currently under occupation by Russia, should not be included as part of Russia on HMG products, and care should be taken to continue to reflect Ukrainian geographical names in these areas (including Crimea). See also PCGN's [Toponymic Factfile for Ukraine](#).

Language

Russian is the state official language across the whole country. In addition, Russia's 1993 constitution made provision for the status of minority languages in the ethnic republics to be recognised as additional official languages with equal status to Russian. This provision has in more recent years been diminished, for instance in the passing of a law in 2017 preventing instruction of these languages to 'non-native' (i.e. ethnically Russian) speakers. An amendment to the Constitution in 2020 solidified this diminution, affirming Russian as the language of the 'state forming people'; and a further bill proposed to the Duma in March 2022 suggested that people may only be considered 'compatriots' if they speak Russian.

Russian is a Slavic language. Most of the minority languages spoken in Russia belong to the Caucasian, Turkic, Mongolic or Uralic language families. The languages that are presently still recognised as official in their respective republics (shown in their anglicised forms) are:

Language	Republic(s)
Abaza (<i>abq</i>)	Karachayevо-Cherkesiya
Adyghe (<i>ady</i>)	Adygeya
Altai (<i>alt</i>)	Altay
Bashkir (<i>bak</i>)	Bashkortostan
Buryat (<i>bua</i>)	Buryatiya
Chechen (<i>che</i>)	Chechnya; Dagestan
Chuvash (<i>chv</i>)	Chuvashiya
Erzya (<i>myv</i>)	Mordoviya
Ingush (<i>inh</i>)	Ingushetia
Kabardian (<i>kbd</i>)	Kabardino-Balkariya; Karachayevо-Cherkesiya
Kalmyk (<i>xal</i>)	Kalmykiya
Karachay-Balkar (<i>krc</i>)	Kabardino-Balkariya; Karachayevо-Cherkesiya
Khakas (<i>khj</i>)	Khakasiya
Komi-Zyrian (<i>kpv</i>)	Komi
Mari (<i>chm</i>)	Mari-El
Moksha (<i>mdf</i>)	Mordoviya
Nogai (<i>nog</i>)	Karachayevо-Cherkesiya; Dagestan
Ossetian (<i>oss</i>)	North Ossetia-Alania
Tatar ⁴ (<i>tat</i>)	Tatarstan
Tuvan (<i>tyv</i>)	Tyva
Udmurt (<i>udm</i>)	Udmurtiya
Yakut (<i>sah</i>)	Sakha (Yakutiya)

⁴ Not to be confused with Crimean Tatar or Siberian Tatar, which although closely related are separate languages.

These languages are all written in Cyrillic script. PCGN and BGN have developed an agreed approach for the romanization of ten of these languages ([Adyge](#); [Bashkir](#); [Chechen](#); [Chuvash](#); [Kabardian](#); [Karachay-Balkar](#); [Ossetian](#); [Tatar](#); [Udmurt](#); [Yakut](#)). As noted above, the official use on maps etc. of these languages in the republics is quite limited. And in most cases, Russian geographical names will appear alone.

Additionally 13 languages⁵ have official language status in Dagestan; of these (as well as Chechen noted above) only [Avar](#) has an agreed BGN/PCGN romanization system.

In Russia's view of its sovereignty over Crimea and parts of Ukraine, Russia would include Ukrainian and Crimean Tatar in its own such list of official languages. As recorded above, HMG does not recognise Russia's annexation of Crimea or occupation of any part of Ukraine, and Ukraine should continue to be treated as a sovereign entity on HMG products.

Inventory of characters (and their Unicode encodings⁶):

The **BGN/PCGN Romanization system for Russian** contains the following letter-diacritic combinations in addition to the unmodified letters of the basic Roman script:

Upper-case character	Unicode encoding	Lower-case character	Unicode encoding
Ё	00CB	ё	00EB

All apostrophes appearing in romanization should use Unicode encoding 2019: this applies to ъ, romanized " and ъ, romanized '.

⁵ Aghul, Avar, Azerbaijani, Chechen, Dargwa, Kumyk, Lezgin, Lak, Nogai, Rutul, Tabasaran, Tat, Tsakhur.

⁶ See www.unicode.org

Administrative structure

Russia is divided into a number of different types of subdivision. The main focus for this Factfile, and of principal interest to the cartographer, are the first-order administrative level divisions (ADM1s)⁷. These are the federal subjects (субъекты Российской Федерации, sub'yeqty Rossiyskoy Federatsii), of which there are 83. Although Russia also includes the Ukrainian territories of Crimea and Sevastopol in its own view of the ADM1s, meaning that Russian sources list 85 federal subjects, the UK does not recognise the annexation of these territories by Russia and they should be shown as part of Ukraine on HMG products.

The 83 federal subjects comprise: 46 oblast' (region); 4 avtonomnyy okrug (autonomous district); 2 avtonomnyy gorod (autonomous city); 1 avtonomnaya oblast' (autonomous region); 9 kray (administrative territory) and 21 respublika (republic). Generic terms following the specific part of Russian toponyms are written with initial lower case. PCGN recommends following this style in romanization (note that the US Board on Geographic Names capitalises the generic terms).

As noted above, PCGN policy for Russia is to take the Russian Cyrillic names from official Russian sources and romanize these according to the BGN/PCGN Romanization System for Russian. The case-endings present in Russian mean that a specific name cannot simply be derived by removing the generic term (e.g. Astrakhanskaya Oblast' cannot meaningfully be represented simply as Astrakhanskaya). For that reason, PCGN recommends in the majority of cases that the full form (in its romanized version) should be used to refer to the political entity: this approach is recommended for the oblasts, krays and autonomous okrugs⁸. Russian government English-language websites in fact use anglicised forms for the federal subjects (e.g. Astrakhan Oblast)⁹. However, we would recommend, though these might usefully be used for reference purposes in English-language texts, that in keeping with the usual style of HMG mapping, these anglicised forms do not need to appear on maps.

The republics, which are each home to an ethnic majority (e.g. Chechens in Chechnya), each have a short Russian form and it is these short forms that we suggest may be used on maps if space dictates that the full form cannot be used or in an English-language text. Additionally, amongst the republics, there are arguably a few instances for which a recognisable 'conventional' name exists that differs from the romanization of the short form (e.g. North Ossetia vs. Severnaya Osetiya-Alaniya), and we would recommend that for these names too the romanization be used in reference to the 'political' entity (i.e. the republic), e.g. republic of Ingushetiya, where it appears amongst other Russian republic names (e.g. on a map or a list) but that the conventional names might be employed where deemed appropriate according to the context, for instance in a running text focusing on the particular area. We would suggest that the only sufficiently recognisable conventional names differing from the romanization are Ingushetia, Karelia and North Ossetia. For further detail, including the short forms for the republics, see the PCGN paper: [Administrative divisions of Russia](#).

⁷ Additionally, one may see reference to 8 federal districts, which are not administrative, or 4 military districts.

⁸ The geographical entity may also be represented differently: e.g. Kaliningradskaya oblast' is the name of the administrative division but Kaliningrad may be used if referring to the geographical region.

⁹ Anglicised forms of the federal subject names are listed here: http://www.gov.ru/main/regions/regioni-44_en.html

Disputes

Russia is a claimant or otherwise involved in a number of territorial disputes. Only a few significant examples are described here:

Crimea (and Ukraine)

Russia annexed Crimea in 2014 and is currently engaged in an illegal war on the sovereign territory of Ukraine. HMG does not recognise the annexation of Crimea or Russian invasion or occupation of any other part of Ukraine, and the territorial integrity of Ukraine should be maintained on HMG products.

Kuril Islands

The islands at the southern end of the Kuril Islands chain, i.e. those south-west of the Iturup Strait, are disputed between Russia and Japan. HMG's position is that Russian-language forms should be used for all geographical names in the Kuril Islands; where none exists (e.g. Habomai Islands), English-language rather than Japanese-language names should be employed. Japanese-language names may be shown in brackets if desired and the descriptor (*administered by Russia, claimed by Japan*) may also be shown.

Abkhazia and South Ossetia

Russia is one of very few states to recognise the independence of Abkhazia and South Ossetia¹¹. HMG recognises these territories as part of Georgia and they should be shown as such on HMG products. Russia maintains significant military involvement in both these areas.

¹¹ Though political leaders in South Ossetia are making ongoing attempts to instigate legal proceedings towards the integration of the territory within Russia.

Other significant locations

PCGN Approved name	Russian name (PCGN Romanization)	Conventional Name ¹²	Feature Type	Location
Baltic Sea	Балтийское море (=Baltiyskoye more)	Baltic Sea	Sea (littoral states: Denmark, Estonia, Finland, Germany, Latvia, Lithuania, Poland, Russia, Sweden)	56° 00' 00" N 18° 00' 00" E
Bering Sea	Берингово море (=Beringovo more)	Bering Sea	Sea (littoral states: Russia/USA)	60° 00' 00" N 175° 00' 00" W
Black Sea	Чёрное море (=Chërnoye more)	Black Sea	Sea (littoral states: Bulgaria/Georgia/ Romania/Russia/Turkey /Ukraine)	43° 00' 00"N 35° 00' 00"E
Caspian Sea	Каспийское море (=Kaspiyskoye more)	Caspian Sea	Sea (littoral states: Azerbaijan/Iran/ Kazakhstan/Russia/ Turkmenistan)	42° 00' 00"N 50° 00' 00"E
Caucasus Mountains <i>or</i> Greater Caucasus Range	Большой Кавказ (=Bol'shoy Kavkaz)	Caucasus Mountains	Mountain range (Georgia, Azerbaijan, Russia)	43° 21' 18"N 42° 26' 31"E
Poluostrov Kamchatka	полуостров Камчатка (=poluostrov Kamchatka)	Kamchatka Peninsula	Peninsula	56° 00' 00"N 160° 00' 00"E
El'brus	Эльбрус (=El'brus)	Mount Elbrus	Mountain	43°21'18"N 42°26'21"E

¹² PCGN recommends use of conventional names for international features. For names within Russia, the conventional names can be included in brackets after the romanized Russian name on cartographic products, and can be used in English-language texts.

PCGN Approved name	Russian name (PCGN Romanization)	Conventional Name ¹²	Feature Type	Location
Sea of Azov	Азовское море (=Azovskoye more)	Sea of Azov	Sea (littoral states: Russia/Ukraine)	46° 00' 00" N 36° 00' 00" E
