Dear Mr Drummond,

**SCREENING DECISION BY THE SECRETARY OF STATE UNDER THE
ELECTRICITY WORKS (ENVIRONMENTAL IMPACT ASSESSMENT)
(ENGLAND AND WALES) REGULATIONS 2017 (“THE 2017
REGULATIONS”)**

NAME OF SCHEME: THE COBB, LYME REGIS

Screening decision for a proposed development (“the proposed development”) to:

- Divert the existing line and move a pole

The proposed development requires Section 37 consent under the Electricity Act 1989 and are subject to the 2017 Regulations.

The Secretary of State has considered the factors set out in Schedule 3 of the 2017 Regulations, together with the information within the supplied documentation (“the Application”) by National Grid Electricity Distribution (“the Applicant”) in relation to the impacts on the environment of the proposed development and the views of Dorset Council (“the LPA”). In reaching her decision, the Secretary of State notes the following factors:

1. The proposed development does not fall within Schedule 1 (mandatory EIA);
2. The proposed development falls under Schedule 2 of the 2017 Regulations as the electricity line is to be installed above ground in a sensitive area.

Department for
Energy Security
& Net Zero

3. The development is located within the Dorset Area of Outstanding Natural Beauty. The LPA were consulted and suggested the change is unlikely to have any notable impacts on the character and appearance of the AONB.

Taking account of the abovementioned factors and information received, the Secretary of State concludes that the proposed works are not EIA development under the 2017 Regulations and do not require a statutory EIA as they are unlikely to have significant effects on the environment due to their nature, location and size. A copy of this letter has been sent to the LPA for information.

Yours sincerely,

John Mckenna
