**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear CMA

In general, I support the proposals as outlined in the consultation document. I note that in addition to climate change there are other significant 'environmental sustainability' issues which companies are working to develop collaborative solutions to, notably nature based/natural capital/biodiversity/ecological sustainability issues. The scope of 'environmental sustainability' within the current consultation is therefore too narrow and I recommend it is broadened to include these issues.

Thanks and best regards  
Dave
