The East Midlands region comprises Lincolnshire, Leicestershire, Rutland, Northamptonshire, Derbyshire and Nottinghamshire.

Key statistics for the East Midlands region

- Total Income from Farming¹ in 2022 was £939 million, an increase of 6.5% since 2021 (Source: Total Income from Farming for the regions of England).
- In 2022, the largest contributors to the gross output² value (£4.0 billion) were wheat (£737 million), poultry meat (£535 million) and fresh vegetables (£424 million). These commodities accounted for 43% of the total output (Source: Total Income from Farming for the regions of England).
- The average farm size in 2023 was 103 hectares (Table 1.1). This is the third largest average farm size of all the English regions and larger than the English average of 88 hectares.
- The predominant farm types in 2023 were grazing livestock (34% of the region's holdings) and cereal (27% of the region's holdings) farms (Figure 1.4).
- Across all farm types, average Farm Business Income³ was £124,400 per farm in 2022/23, which was an increase of 25% from 2021/22 (Figure 1.6).

¹ Total Income from Farming (TIFF) is the net income to farms once costs have been

accounted for, so is calculated as "outputs & subsidies" minus "inputs & costs". More information on aggregate agricultural accounts can be found on GOV.UK.

² Total output is the gross value of commodities produced without considering production costs or any additional income received through subsidies. More information on aggregate agricultural accounts can be found on GOV.UK.

³ In simple terms, Farm Business Income (FBI) is the output generated by the farm business minus total farm costs. More information on Farm Business Income can be found on GOV.UK.

Notes:

- 1. "[z]" means "not applicable"
- 2. Total labour includes farmers, partners, directors, spouses, salaried managers, regular and casual workers.
- 3. Casual workers are those usually employed for less than 20 weeks of the year.
- 4. Number of workers per farm calculations are averages based on the total number of farm holdings in the region.
- 5. Part time workers are those employed for less than 39 hours a week.
- 6. Percentage calculations for full and part time workers do not include salaried managers.

Section 2: Other geographical breakdowns

Further information and other geographical classifications related to the Defra June Survey can be found on our GOV.UK web page: Structure of the agricultural industry in England and the UK at June.

England regional data for aggregate agricultural accounts can be found in the Total Income from Farming for the regions of England publication on GOV.UK.

English county data for farm accounts from the Farm Business Survey can be found on the Farm Business Survey web page.

Section 3: Data notes

Figures are for commercial holdings as at June 2023 (unless stated otherwise). Years may differ between measures since this publication uses data from a range of sources and is updated twice yearly to use the latest data available.

Commercial holdings are those with levels of farming activity above a specified threshold as detailed in this publication's guidance note.
